Presented 17th January, 1907.—*Mr. Smith (Wentworth)*.. ..... *Not printed.*

105. Return to an address of the House of Commons, dated 28th November, 1906, for a copy of all orders in council, reports, letters, telegrams, correspondence, memoranda and other documents and papers, relating to or in any way touching the purchase or acquisition of land in or near the city of Halifax, since 1st January, 1902, for the purpose of constructing thereon a round-house or machine shop. Presented 17th January, 1907.—*Mr. Barker*. ..... *Not printed.*

106. Return to an address of the Senate, dated 19th June, 1906, for copies of all correspondence between the Imperial authorities and the government of Canada relating to the uniform to be worn upon state occasions by privy councillors of the cabinet, privy councillors not of the cabinet, deputy heads of departments, and by any other of the government officials. Presented 16th January, 1907.—*Hon. Mr. Landry* ..... *Not printed*

107. Return to an address of the Senate, dated 7th December, 1906, for copies of all correspondence respecting a site or sites for a public building in the town of Glace Bay, Nova Scotia, between any member of the government and all other parties; the area of the sites, the price of each, the date of the purchase, the date of each payment, the name of the seller of each site, the report or reports of the government engineer, showing lots recommended and those not recommended by him, and all notes or memoranda referring to said sites. Presented 16th January, 1907.—*Hon. Mr. McDonald (Cape Breton)* ..... *Not printed*

108. Return to an address of the Senate, dated 5th December, 1906, for a copy of all the correspondence exchanged between the department of marine and fisheries, or any person or any company whatsoever on the subject of the stranding at Matane of the steamer *Kensington*, as well as of the inquiry which has been made into this subject and of the judgment rendered by the commissioner making the inquiry. Presented 16th January, 1907.—*Hon. Mr. Landry*..... *Not printed.*

109. Return to an address of the Senate, dated 28th November, 1906, of imports of oxide of aluminum for the years 1903, 1904, 1905 and to date, 1906, with values. Presented 16th January, 1907.—*Hon. Mr. Domville* ..... *Not printed.*

109*a*. Return to an order of the Senate, dated 28th November, 1906, giving the amount of aluminum exported for the years 1903, 1904, 1905 and to date, 1906, with values. Presented 16th January, 1907.—*Hon. Mr. Domville*..... *Not printed.*

110. Supplementary return to an order of the House of Commons, dated 14th March, 1906, showing, in the case of every homestead against which, during the years 1904 and 1905, a report of non-compliance with the law, or a demand for cancellation has been received by the Dominion land office or offices; giving (*a*) the location of said quarter-section, range, township, and meridian; (*b*) the name and address of the party by whom the original entry was made; (*c*) the name and address of the party or parties (if there have been several) who endeavoured to lodge cancellations; (*d*) the reason alleged by complainaints why cancellation of entry should be allowed; (*e*) whether warning of threatened cancellation was served upon the alleged delinquent; (*f*) the action taken by the department in each case. Presented 21st January, 1907.—*Mr. Ames*..... *Not printed.*

CONTENTS OF VOLUME 13—*Continued.*

111. Return to an address of the House of Commons, dated 10th December, 1906, for a copy of all orders in council, agreements, contracts, reports, telegrams, letters, and other documents, relating to any agreement between the government, or any department of the government, and Mr. W. A. D. Lees, or any other person or persons, for fencing a part or tract of land near Fort Saskatchewan, in Alberta; and all such documents and papers aforesaid, relating to the maintenance of such fence. Presented 21st January, 1907.—*Mr. Roche (Marquette)*..... ....*Not printed.*

112. Return to an order of the House of Commons, dated 17th December, 1906, for a copy of the ordinance or regulation of the Canadian militia by which young men following the three months' short course, day attendance, are stipulated as having no right to any indemnity for their services; also a copy of the ordinance or regulation of the Canadian militia by which young men from the country are not entitled to any pay for provisionary course, night attendance. Presented 21st January, 1907.—*Mr. Robitaille*..... ....*Not printed.*

113. Extract from a Report of the Committee of the Privy Council, approved by the Governor General on the 24th day of December, 1906, in relation to the leasing of the Beauharnois Canal, in order to its utilization for the development of electricity for lighting and industrial purposes. Presented 21st January, 1907, by Sir Wilfrid Laurier ....*Not printed.*

114. Return to an order of the House of Commons, dated 14th January, 1907, showing: 1. All amounts which have been since 1st July, 1904, expended, chargeable to capital account, upon the strengthening of bridges along the line of the government railways. 2. The estimated cost of each work, which it is proposed to carry on during the fiscal year 1907-8. Presented 21st January, 1907.—*Mr. Crocket*..... .... *Not printed.*

115. Return to an order of the House of Commons, dated 14th January, 1907, for a copy of all correspondence, petitions and other papers, addressed to, or received by the department of railways and canals, from any persons, organizations, or associations, asking for the institution of a system of annuities for employees on the Intercolonial Railway. Presented 21st January, 1907.—*Mr. Macdonald*..... .... *Not printed.*

116. Return to an order of the House of Commons, dated 26th March, 1906, for a statement containing the following information concerning the water-powers in the possession and under the control of the Dominion government. 1. The province and the locality within the province where the water-power is situated. 2. A summary of the report or reports made to the government on such water-power, if any report has been made, with date of the report and name of the party who has reported. 3. The power susceptible of being developed. 4. If under lease or alienated in any way, the name of lessee or purchaser, date, duration and condition of lease or purchase. 5. If under lease or alienated, whether public tenders were called for through the newspapers before lease or alienation took place. 6. If under lease or alienated, whether any report was sought and obtained by the government previous to such alienation, and by what officer such report was made to the government, and the purport of such report, as well as its date. 7. If under lease or alienation in any way, the amount due the government for rent or price of sale and arrears. 8. If under lease or alienated, whether the conditions of alienation have been fulfilled. Presented 21st January, 1907.—*Mr. Monk.*
Printed for both distribution and sessional papers.

116*a*. Return to an address of the House of Commons, dated 28th November, 1906, for: 1. A copy of the contract or agreement by which the government has leased or alienated the water-powers on the Soulanges canal; of the tenders, if any were invited, before the disposal of said water-powers; and of any and all correspondence concerning the said powers before the disposal of the same by the government. 2. A copy of the order in council disposing of said water-powers. 3. A copy of all transfers of said water-powers since the original alienation of the same; of all correspondence relating to said transfers; and of orders in council authorizing or ratifying said transfers. 4. A copy of all reports and estimates in the possession of the government in regard to the extent and value of water-powers on the Soulanges canal. Presented 14th February, 1907.—*Mr. Monk*....*Not printed.*

116*b*. Return to an order of the House of Commons, dated 10th December, 1906, showing: (1) The water-powers, and location of same, along the Trent Canal waterways, still in possession of the government of Canada; (2) those along tributary waters under the same control; (3) the water-powers that have been leased, or otherwise disposed of; (4) the terms in each case; (5) the nature of the title in each instance. Presented 14th February, 1907.—*Mr. Hughes (Victoria)*.....*Not printed.*

116*c*. Return to an order of the House of Commons, dated 27th February, 1907, for copies of all reports and other papers in connection with the choice of the eastern outlet for the Trent Valley Canal. Presented 27th February, 1907.—*Mr. Emmerson* . ... *Not printed.*

CONTENTS OF VOLUME 13—*Continued.*

116*d*. Report of E. J. Walsh, C.E., Engineer in charge of the surveys on the Trent Valley Canal, from Lake Simcoe to Georgian Bay, accompanied by plans, profiles and estimates. Presented 15th March, 1907, by Hon. H. R. Emmerson..... *Not printed.*

117. Return to an order of the House of Commons, dated 5th December, 1906, for a copy of all letters, telegrams or documents of any description, relating to, (*a*) the appointment of Mr. F. W. Aylmer to the position of resident engineer of the Dominion Public Works at Winnipeg; and (*b*) his resignation of said position, together with all letters, telegrams, &c., interchanged between Mr Aylmer and any official of the public works department, in this connection. Presented 21st January, 1907.—*Mr. Ames*..... *Not printed.*

118. Return to an address of the House of Commons, dated 28th November, 1906, for a copy of all correspondence, tenders, offers of lease or purchase or occupation, of water powers under the control of the government of Canada, and of any deed of alienation of the same, whether by lease or otherwise, situate within one hundred miles of the city of Montreal. Presented 21st January, 1907.—*Mr. Monk*..... *Not printed.*

119. Return to an order of the House of Commons, dated 9th January, 1907, for a copy of all papers and correspondence in connection with registered letters lost between Bethany and Millbrook, and other points in the county of Durham; more especially concerning a letter posted by one Joseph Hadden, of Bethany, to the Bank of Toronto, at Millbrook. Presented 24th January, 1907.—*Mr. Ward.* *Not printed.*

120. Return to an order of the House of Commons, dated 3rd December, 1906, for a copy of all thermograph records of temperature on ocean-going vessels taken during the past season; stating names of vessel, and date of sailing, and port from whence sailing; also, stating if in cold storage chambers, cool air chambers, ventilated chambers, or unventilated chambers; also, in case of ventilated chambers, stating the method of ventilation. Presented 24th January, 1907.—*Mr. Smith (Wentworth).* *Not printed.*

121. Return to an address of the House of Commons, dated 17th December, 1906, for a copy of: 1. All reports made from time to time by the officers of the topographical surveys branch of the department of the interior, in reference to land in townships 10, 11, 12 and 13, ranges 7, 8, 9, 10, 11, 12 and 13, west of the 4th, and townships 7, 8 and 9, ranges 8, 9, 10 and 11, west of the 4th. 2. Orders in council dated the 13th December, 1886, and 21st December, 1897, setting apart certain lands, viz.: those portions of the south half of section 7, the northwest quarter of section 9, and section 21, lying south and east of the river, township 12, range 12; that part of section 35 lying south and east of the river, township 11, range 13, and those portions of sections 1 and 2, lying east of the river in township 12, range 13, all west of the 4th meridian, as reserved for watering of stock. 3. Report of inspection referred to in order in council of 21st December, 1903, showing that the land referred to in orders in council dated 13th December, 1886, and 21st December, 1897, were no longer required for the purpose for which they were reserved. 4. All other reports made from time to time to date by officers of the department of the interior regarding the character and fertility of the soil, climate, rainfall, water supply, or topographical features of the area, or any part of the area described in paragraph 1 of this resolution. Presented 28th January, 1907.—*Mr. Ames*..... *Not printed.*

122. Orders in Council authorizing the granting of permits to foreigners and foreign corporations to bring fresh fish in American bottoms to any port in British Columbia, to land such fresh fish at such port without payment of duties and tranship the same in bond to any part of the United States of America, &c. Presented 28th January, 1907, by Sir Wilfrid Laurier..... *Not printed.*

123. Return to an order of the House of Commons, dated 28th November, 1906, for a copy of all correspondence between the government, or any member or official thereof, and any member of the Royal Insurance Commission, or Mr. Shepley, K.C., or Mr. Tilley, barrister, or any other person employed by or on behalf of the government, relating in any way to the work of the commission, to the subjects and methods of conducting the inquiry, to suggestions as to what witnesses be called, what information be sought, and from whom; together with any reports received or transmitted in reference to the above; and also, for a copy of all instructions issued by the government, or any member thereof, to the commission, or any counsel employed thereat. Presented 29th January, 1907.—*Mr. Borden (Carleton)*..... *Not printed.*

123*a*. Report of the Royal Commission on Life Insurance. Presented 26th February, 1907, by Hon. W. S. Fielding..... *Printed for both distribution and sessional papers.*

CONTENTS OF VOLUME 13—*Continued.*

123*b*. Supplementary return to 123*a*. Memorandum of exhibits by companies. Presented 6th March, by Hon. W. S. Filding..... *Printed for both distribution and sessional papers.*

123*c*. Supplementary Report of the Royal Commission on Life Insurance..... *See No. 123b.*

123*d*. Return to an address of the Senate dated 14th March, 1907, for the papers referred to as Exhibits Nos. 682, 686, 688, 737, 738, 740, and 741, in Sessional Paper No. 123*b*, being a supplementary return laid on the table of this house during the present session of parliament. Presented 4th April.—*Hon. Mr. Ferguson*..... *See No. 123b.*

124. Return to an address of the Senate, dated 16th January, 1907, showing: The tenders called for the supply of sleepers for any part whatsoever of the Transcontinental Railway by the Commissioners of the Transcontinental Railway. Who are the tenderers. What are the prices asked by each of them. Who obtained the contract. At what price and for what quantity. Has the contractor begun the execution of his contract. What quantity has he delivered up to this date. To whom, and at what place. What amount of money has he received in payment. Presented 24th January, 1907.—*Hon. Mr. Landry*..... *Not printed.*

125. Return to an order of the House of Commons, dated 18th December, 1906, for a copy of all correspondence between the five companies and the one individual whose hydraulic mining leases were cancelled during the past year, and the government, or any department thereof. Presented 29th January, 1907.—*Mr. Roche (Marquette)*..... *Not printed.*

126. Return to an order of the House of Commons, dated 16th January, 1907, for a copy of all papers and correspondence during the past year in connection with the leasing of any lands adjacent to Lake Manitoba for sporting or other purposes. Presented 29th January, 1907.—*Mr. Schaffner*..*Not printed.*

127. Return to an address of the House of Commons, dated 28th November, 1906, for a copy of all correspondence between the government of Canada and the government of Australia, or any officials thereof, with reference to tariff preferences between the two countries; and all orders in council in reference thereto, for the years 1904, 1905, 1906. Presented 29th January, 1907.—*Mr. Borden (Carleton)*..... *Not printed.*

128. Return to an order of the House of Commons, dated 3rd December, 1906, showing the number of acres of Indian lands sold in each year since 1896, with the price received per acre, and where selected in each case; a statement of the manner in which said lands were sold in each case per acre, whether by public tender or private sale. If sold by tender, in how many papers were advertisements printed, in each case; also, giving the number of days from first appearance of such notice until tenders were closed, in each case; the amount paid the Indians, the expenses connected with the sales, and where the balance of these sales was deposited; also, a copy of all leases given by this government of Indian lands in the provinces of Manitoba, Saskatchewan, Alberta and British Columbia, since 1896; with a statement showing how such lands were leased, either by public tender or by private arrangement. Presented 29th January, 1907.—*Mr. Armstrong.*
Not printed.

129. Return to an order of the House of Commons, dated 9th January, 1907, showing: 1. How many cheese curing buildings in all have been erected or provided by the government. 2. Where they are located. 3. The cost of each one, including care, and any other expense or expenses in connection therewith. 4. The charge, if any, made to the users of them. 5. What amount the government paid for transporting cheese from the factory to the curing rooms. The cost in connection with each factory, and the aggregate of all such costs up to date. 6. Who paid the charge for transportation from curing room when shipping; and if paid by the government, the aggregate of such costs to date. 7. The number of cheese manufacturers who have taken advantage of these curing rooms, and how many cheese have been stored by each, year by year, and the length of time each consignment has remained in the curing room. 8. The intention of the government to continue the use of these curing rooms for the future, or to extend them. 9. What disposition is to be made of those now owned by the government. Presented 1st February, 1907.—*Mr. Sproule*....*Not printed.*

130. Return to an order of the House of Commons, dated 12th December, 1906, for a copy of all papers, and correspondence between the department of marine and fisheries and any person or persons, with reference to the sending of assistance and lifeboats to the relief of vessels recently wrecked on the north side of Prince Edward Island; and also papers and correspondence with reference to establishing life-saving stations and appliances at different points around the coast of Prince Edward Island. Presented 4th February, 1907.—*Mr. Lefurgey*..... *Not printed.*

CONTENTS OF VOLUME 13—*Continued.*

131. Return to an order of the House of Commons, dated 3rd December, 1906, for a copy of all correspondence and documents on file referring to the sale of any timber upon what is known as the "Light House" reserve, on Hope Island, in the Georgian Bay. Presented 4th February, 1907.—*Mr. Bennett*.....*Not printed.*

132. Copies of all correspondence between the Clerk of the Senate, and the Department of the Auditor General, and that of the Department of Justice, relating to the payment of sessional indemnity and travelling expenses to senators. Presented 1st February, 1907, by the Hon. The Speaker.
Not printed.

133. Pay and Allowances Regulations for the Canadian militia, to have effect from the 1st January, 1907. Presented 6th February, 1907, by Sir Frederick Borden.....*Not printed.*

134. Return to an order of the House of Commons, dated 30th January, 1907, for a copy of all accounts, vouchers, correspondence, documents and papers relating to the purchase of supplies forwarded or intended to be forwarded to Kingston, Jamaica, for the relief or assistance of sufferers from the recent disaster in that city. Presented 6th February, 1907.—*Mr. Taylor*.....*Not printed.*

135. Return to an address of the Senate, dated 23rd February, 1907, asking for the production before the house of all papers, orders, rules, charges, reports of inquiries, evidence, and judgment rendered, by any council of war or court-martial whatsoever, concerning a soldier of the ordnance corps by the name of Télesphore Roy, at Quebec, accused and found guilty of any offence whatsoever, and sentenced on that account to cells and hard labour; together with all documents relating to this matter, before and after the charge and the judgment of the military court; the names of the complainant, of the officers who sat on the court-martial, of the defender of the accused, of those who confirmed the judgment; and a copy of the record upon which were based both the judgment of the court martial and the confirmation by superior authority of the judgment rendered. Presented 6th February, 1907.—*Hon. Mr. Landry*.....*Not printed.*

136. Return to an address of the House of Commons, dated 10th December, 1906, for a copy of all orders in council, contracts, reports of experts or officials, and of all correspondence relating to the adoption and purchase of 250 subtarget guns, by the department of militia, and especially all letters passing between the Ontario Sub-Target Company (Limited), Mr. J. H. Jewell, Mr. Hartley Dewart, K.C., or any director or shareholder of the Sub-Target Company, and the Minister of Militia, or his private secretary, in reference to purchases or contracts, or agreements to purchase, either proposed or consummated, and payments made thereon or in pursuance thereof. Presented 7th February, 1907.—*Mr. Foster*.....*Not printed.*

136*a*. Supplementary return to No. 136. Presented 20th March, 1907.....*Not printed.*

137. Return to an address of the House of Commons, dated 30th January, 1907, for a copy of documents relating to the Metlakatla Indian Reserve, that is to say, a certain agreement with the province of Prince Edward Island in or about the year 1876, and mentioned in an order in council bearing date 2nd April, 1906, the said order in council and all recent correspondence dealing with the reserve. Presented 7th February, 1907.—*Mr. Borden (Carleton)*.....*Not printed.*

138. Return to an address of the House of Commons, dated 28th November, 1906, for a copy of all orders in council, agreements, valuations, reports, memoranda, letters, telegrams, correspondence, documents and papers, in connection with the sale or grant by the government of Canada, or any department thereof, since 1st January, 1905, of any public lands or public domain, other than to actual settlers. Presented 7th February, 1907.—*Mr. Borden (Carleton)*.....*Not printed.*

139. Return of the names of all persons appointed to or promoted in the Civil Service of Canada, during the calendar year 1906. Presented 14th February, 1907, by Sir Wilfrid Laurier.....*Not printed.*

140. Return to an address of the House of Commons, dated 28th January, 1907, for a copy of all orders in council, rules or regulations governing the operation and management of the Government Printing Bureau. Presented 14th February, 1907.—*Mr. Verville*.....*Not printed.*

141. Return to an order of the House of Commons, dated 3rd December, 1906, for a copy of all correspondence concerning the retirement from office of Mr. Talbot, late postmaster at Cannington, Ontario. Presented 14th February, 1907.—*Mr. Hughes (Victoria)*.....*Not printed.*

142. Return to an order of the House of Commons, dated 30th January, 1907, showing what life-saving stations are maintained on the sea coasts and inland waters of Canada, when the same were erected, respectively, and at what cost, respectively, and the cost of maintenance of each of same, during the last ten years. Presented 14th February, 1907.—*Mr. Boyce*.....*Not printed.*

CONTENTS OF VOLUME 13—*Continued.*

143. Return to an address of the House of Commons, dated 30th January, 1907, for a copy of all papers, memorials, memorandums, documents and correspondence between the provincial assembly and provincial government of Manitoba, and the Dominion Parliament and Dominion Government during the past ten years, in reference to the extension of the boundaries of Manitoba. Presented 18th February, 1907.—*Mr. Roche (Marquette)*..... *Not printed.*

144. Despatches and orders in council relative to Colonial Conference, 1907, from 20th April, 1905, to 15th February, 1907. Presented 18th February, 1907, by Sir Wilfrid Laurier.
Printed for both distribution and sessional papers.

145. Return to an address of the House of Commons, dated 28th January, 1907, for a copy of all orders in council, letters, papers, correspondence and documents relating to or connected with the resignation of Mr. Alexander Henderson as judge of the county court of British Columbia. Presented 18th February, 1907.—*Mr. Borden (Carleton)*..... *Not printed.*

146. Return to an order of the House of Commons, dated 6th February, 1907, showing the number of persons employed in the House of Commons, (*a*) as permanent employees, and in what capacity; (*b*) as sessional employees, and in what capacity; (*c*) the salary of each such employee; (*d*) the name of each employee of the house, or connected with the service of the house, as translators or otherwise, not living at Ottawa; (*e*) where each employee lives, and what his salary or remuneration is. Presented 18th February, 1907.—*Mr. Bergeron*..... *Not printed.*

146*a*. Return to an order of the House of Commons, dated 6th February, 1907, showing where all the clerical work of the House of Commons is done, (*a*) the ordinary routine work; (*b*) all the translation; (*c*) how much is paid to translators not living in Ottawa, or working at their homes in Ottawa, per day, or how paid; (*d*) how much was paid last year for all such services in the House of Commons. Presented 18th February, 1907.—*Mr. Bergeron*..... *Not printed.*

147. Copy of order in council respecting the landing of fresh fish in American bottoms and the purchase of supplies by such vessels, in ports of British Columbia,—and also copy of instructions to the collector of customs, Vancouver, B.C., respecting the same. Presented 19th February, 1907, by Hon. W. Paterson..... *Not printed.*

148. Return to an address of the House of Commons, dated 6th February, 1907, for a copy of all orders in council, reports, letters, telegrams, accounts, vouchers, documents and other papers since the 1st January, 1902, relating to the surrender of the whole or any portion of the Nipissing Indian Reserve. Presented 20th February, 1907.—*Mr. Taylor*..... *Not printed.*

149. Return to an address of the Senate, dated 29th of January, 1907, for copies of all reports received by the government or any member thereof, relating to the establishment of an experimental branch farm in Prince Edward Island, and any order in council made regarding the same; also a statement showing what tract of land, if any, has been purchased for the purposes of the said farm, where it is located, the number of acres acquired, the price paid for the same, and the name of the vendor. Presented 19th February, 1907.—*Hon. Mr. Ferguson*..... *Not printed.*

150. Return (in so far as the department of the interior is concerned) to an address of the House of Commons, dated 6th February, 1907, for a copy of all orders in council in connection with the land grants or subsidies to the following railways: The Manitoba and Southeastern Railway Company, the Lake Manitoba Railway and Canal Company, the Hudson Bay Railway Company, the Winnipeg and Great Northern Railway Company, and all other railways now part of The Canadian Northern Railway Company's system, west of the province of Ontario. Presented 21st February, 1907.—*Mr. McCarthy (Calgary)*..... *Not printed.*

151. Correspondence respecting the vacancy on the Bench of the Supreme Court of Nova Scotia. Presented 21st February, 1907, by Hon. A. B. Aylesworth..... *Not printed.*

152. A statement of the affairs of the British Canadian Loan and Investment Company, as on 31st December, 1906. Presented 22nd February, 1907, by the Hon. The Speaker..... *Not printed.*

153. Return to an order of the House of Commons, dated 6th February, 1907, showing: In respect of items "Locomotive and car shops, and land purchase at Moncton, $540,000" and "New machinery for locomotive and car shops, $72,500", in the Appropriation Act of 1906, Schedule B, page 29, all expenditures made thereunder up to December 31st, 1906, said statement to specify in respect of each payment, the date of the transaction, the nature of the goods supplied or service rendered, name of the person or company to whom the consideration was paid. Presented 25th February, 1907.—*Mr. Crocket*..... *Not printed.*

CONTENTS OF VOLUME 13—*Continued.*

154. Return to an order of the House of Commons, dated 21st January, 1907, for a copy of all reports, papers, surveys, estimates, correspondence and other documents, with reference to the proposed branch line from the Prince Edward Island Railway at or near O'Leary, to a point at or near West Cape. Presented 25th February, 1907.—*Mr. Lefurgey*..... .....*Not printed.*

155. Return to an order of the House of Commons, dated 3rd December, 1906, for a copy of all correspondence, contracts, appointments of overseers, in respect to Port Bruce Harbour, in the county of Elgin, Ontario, since 1st January, 1905; also a return showing voucher pay-sheets, amount of new material used, from whom purchased, of all day or contract work on said harbour, giving the names of overseers and when appointed, from same date. Presented 26th February, 1907.—*Mr. Marshall.* *Not printed.*

156. Return to an order of the House of Commons, dated 6th February, 1907, showing: 1. What government dredges operated in the maritime provinces during the years 1900-1, 1901-2, 1902-3, 1903-4, 1904-5, 1905-6. 2. At what ports or places in the maritime provinces dredging was carried on during said years, giving the name of the dredge operating in each place, the number of days each dredge was employed, and the number of cubic yards excavated at each place where dredging was carried on. 3. Where said dredges are at present. Presented 26th February, 1907.—*Mr. Sinclair.* *Not printed.*

157. Return to an address of the House of Commons, dated 28th November, 1906, for a copy of all orders in council, valuations, letters, telegrams, correspondence, memoranda, conveyances and other documents and papers, from the first day of January, 1900, to the present time, relating to the proposa to acquire lands at Truro, Nova Scotia, for the Intercolonial Railway, and especially all such documents as aforesaid relating to the acquisition of land purchased by the Crown from H. W. Yuill by deed bearing date on or about the 17th October, 1904; also a copy of conveyances bearing date in October, 1904, under which the said Yuill acquired the said property; also all reports touching the question of sites for the construction of a round-house at Truro. Presented 28th February, 1907.—*Mr. Borden (Carleton)*.. .....*Not printed.*

158. Return to an order of the House of Commons, dated 11th February, 1907, showing: 1. What work the Railway Department ordered and performed at public expense to rail and ballast the whole or part of a branch railway from the Intercolonial Railway to the Wallace Quarries, Cumberland County, Nova Scotia, and what length was railed or ballasted. 2. From what point and for what distance the department conveyed ballast for the said work. 3. The length of said branch line. 4. Why the said branch line was not extended to Wallace Village, and what distance farther than constructed it would be necessary to build to give Wallace Village rail connection. 5. If the department hauls cars to said Wallace Quarries at public expense, and why it is done. 6. If shunting charge on the said branch line was cancelled, when it was cancelled, and for what reason. 7. At whose instance or request, or for whose benefit the above-mentioned work was done, and the shunting charge cancelled. 8. How much the department has expended for work on construction of said branch line. 9. Who the owners or operators of the said Wallace Quarries are. 10. What the freight rates collected by the department over the said branch lines are. 11. What similar or any concessions in the matter of construction, reduction of freight rates, or cancellation of shunting charges, to or in relation to any other quarries operated at or near Wallace have been granted by the department. 12. What other quarries operating at or near Wallace, and doing business over the Intercolonial Railway, are charged freight rates or shunting charges, or both, upon or in respect to any branch line used by them. 13. What companies are so operating, and what charges the department makes against them. 14. What owners or operators of the Wallace Quarries above-mentioned are related to the minister of railways, who they are, and how related. Presented 28th February, 1907.—*Mr. McLean (Queen's)*..... *Not printed.*

159. Return to an order of the House of Commons, dated 18th February, 1907, showing: Summary of stock, implements, chattels, grain, hay, roots, and all other kinds of fodder, and their value, on the first day of December, for the years 1905-1906 on the Central Experimental Farm, Ottawa. Presented 28th February, 1907.—*Mr. Jackson (Elgin).* .. ..*Not printed.*

160. Return to an order of the House of Commons, dated 10th December, 1906, for a copy of the correspondence, telegrams, tenders, and engineer's estimate, in reference to letting the contract for the construction of extension pier at Port Daniel, in county of Bonaventure, on 30th May, 1904. Presented 1st March, 1907.—*Mr. Martin (Queen's)*..... .....*Not printed.*

CONTENTS OF VOLUME 13—*Continued.*

161. Return to an order of the House of Commons, dated 3rd December, 1906, for a copy of all correspondence, contracts, appointments of overseers, in respect to Port Burwell Harbour, in the county of Elgin, Ontario, since 1st January, 1905; also a return showing pay-sheets, amount of new material used, from whom purchased, of all day or contract work on said harbour, giving names of overseers, and when appointed from the same date. Presented 1st March, 1907.—*Mr. Marshall.* *Not printed.*

162. Copy of Deed, Joseph H. Henderson *et ux* to His Majesty the King, for 34.78 acres of land in the city of Halifax, N.S., for the Intercolonial Railway. Presented 1st March, 1907, by Hon. H. R. Emmerson..... *Not printed.*

163. Return to an order of the House of Commons, dated 3rd December, 1906, showing: 1. The present indebtedness to the Dominion Government of the Montreal Turnpike Trust, (*a*) on capital account; (*b*) for arrears of interest. 2. The amount collected at each toll-gate belonging to the said Turnpike Trust during the year ending 31st December, 1905. 3. The names of all parties who have commuted their tolls, and the amount of commutation paid in each case. 4. The amounts expended on each section or road division under the control of said trust, during the said year, ending 31st December, 1905, and the contracts given out during the year, with the name of the contractor, and the date and amount involved in each case. 5. The amount paid out during the said year at each toll-gate and check-gate for salaries of day and night keepers, and other expenditures at each of the toll-gates maintained. 6. The names of all parties holding passes for free use of the road, under the control of said trust, during the said year. 7. The expense of the said trust during the said year, for rent, salaries of the office, giving name and remuneration of each official. 8. The actual indebtedness in detail of the said trust, outside of its bonds, due to the government of Canada. 9. The amount collected during the year 1905 from municipalities, under special agreements made, as their share, pro rata, of the bonded indebtedness of the Turnpike Trust. Presented 1st March, 1907.—*Mr. Monk*..... *Not printed.*

164. Return to an order of the House of Commons, dated 16th January, 1907, showing: 1. What amounts were paid into the office of the receiver general during the fiscal year 1905-1906 on account of contractors' deposits for security, and by what contractors these sums were paid. 2. The deposits forfeited to the government during the said fiscal year, names of the contractors and the amounts so forfeited. 3. Cheques received as security from contractors during the said fiscal year, held by the departments which received them, and from whom they were received. 4. The total amount now in the hands of the receiver general and of the several departments, respectively, belonging to this account. Presented 1st March, 1907.—*Mr. Foster*..... *Not printed.*

165. Return to an address of the House of Commons, dated 10th December 1906, (in so far as the department of customs is concerned), for a copy of all orders in council, correspondence, and all other papers, relating to the Standard Chemical Company (Limited), or Peuchen & Co., in its dealings with the Customs and Inland Revenue Departments, from the date of the incorporation of the said company to the present date. Presented 1st March, 1907.—*Mr. Robitaille*..... *Not printed.*

166. Return (in so far as the department of the interior is concerned) to an address of the Senate dated 7th February, 1907, calling for the orders in council of the 11th of May, 1885, and the 5th of March, 1895, allotting lands in the Northwest Territories under the authority of the Act of 1884, chapter 25, section 7, and all orders in council passed since 1895, relating to grants of lands for this purpose. Also copies of all contracts between the Canadian Northern Railway Company and the government relating to the construction of a line of railway to the Hudson Bay or any portion of the said line of railway. Presented 21st February, 1907.—*Hon. Mr. Ferguson*..... *Not printed.*

167. Return to an order of the House of Commons, dated 9th January 1907, showing all timber lands in the railway belt in the province of British Columbia, sold or leased by the government, or any department thereof, since the 1st July, 1896, the description and area of such lots, the applications made therefor, the notice of advertisement for sale or tender, the tenders received, the amount of each tender, the tenders accepted, the name and address of the person or company to whom each lot was sold or leased. Presented 4th March, 1907.—*Mr. McCarthy (Calgary)*.. *Not printed.*

167*a*. Return to an order of the House of Commons, dated 11th March, 1907, showing: The timber lands sold or leased by the department of the interior subsequent to the date of those included in Sessional Paper No. 90, brought down to the house on the 9th of April, 1906; the description and area of such lands, the applications made therefor, the notice of advertisement for sale or tender, the tenders received, the amount of each tender, the tenders accepted, the name of the person or com-

CONTENTS OF VOLUME 13—*Continued.*

pany to whom each lot was sold or leased, and the name and address of each person or company to whom any of such leases have been transferred. Presented 9th April, 1907.—*Mr. Ames. Not printed.*

167*b*. Return to an order of the House of Commons, dated 8th April, 1907, showing, in respect of timber berths Nos. 824, 1062, 1107, 1108, 1171 and 1212, all bonuses, rentals or dues paid to date by the lessees or other assigns to the government, together with a copy of all applications, correspondence, reports, advertisements, tenders, leases, transfers, or memoranda of any description, and a copy of the regulations of the department of the interior in force at the time said timber berths were leased, and the corresponding regulations in force at the present time. Presented 26th April, 1907.—*Mr. Boyce* ..... *Not printed.*

168. Return to an order of the House of Commons, dated 4th March, 1907, showing : 1. How much money has been paid by the government of Canada in the form of bounties on lead. 2. To what companies the same has been paid. 3. Where the mines are located. Presented 4th March, 1907.—*Mr. Marshall*..... ..... *Not printed.*

169. Return to an address of the House of Commons, dated 11th February, 1907, for a copy of all correspondence, reports and letters, between this government and the government of the United States, relating to rural free delivery. Presented 5th March, 1907.—*Mr. Armstrong*..... *Not printed.*

170. Return to an order of the House of Commons, dated 11th February, 1907, showing the names of the employees of the Brandon Post Office during the year ending June 30th, 1906, and salaries received by them, respectively ; also names and salaries of those now employed in the office ; also amount paid by the postmaster for help and expenses for year ending June 30th, 1906. Presented 5th March, 1907.—*Mr. Roche* (*Marquette*)..... ....*Not printed.*

71. Return to an order of the House of Commons, dated 3rd December, 1906, for a copy of all correspondence, contracts, appointments of overseers, in respect to Port Stanley Harbour, in the county of Elgin, Ontario, since 1st January, 1905 ; also a return showing pay-sheets, amount of new material used, from whom purchased, of all day or contract work on said harbour, giving names of overseers, and when appointed from the same date. Presented 5th March, 1907.—*Mr. Marshall. Not printed.*

172. Return to an order of the House of Commons, dated 28th January, 1907, showing : In respect of the special inspection undertaken in April last of all unpatented homesteads entered for prior to 1st September, 1905, in the Alameda, Battleford, Regina and Yorkton land districts (referred to in Part I, page 4, of the Report of the Department of the Interior, 1905-6 : (*a*) the report of the Inspector of Dominion Land Agencies ; (*b*) the instructions issued to the several land agents and homestead inspectors ; (*c*) all correspondence between the department of the interior and the aforesaid agencies in respect to the necessity or desirability of such inspection, the manner in which it should be conducted, and the action to be taken in consequence of the facts brought out by such inspection. Presented 6th March, 1907.—*Mr. Ames*..... .....*Not printed.*

173. Return to an address of the Senate, dated 13th June, 1906, for a copy of the correspondence exchanged between the Honourable Mr. Landry and the Right Honourable Sir Wilfrid Laurier, and between the latter and the Department of Militia and Defence, on the subject of the refusal by that department to translate and to cause to be published in French the regulations for the militia which were published, in English only, in the *Canada Gazette*, of the 5th May last. Presented 5th March, 1907.—*Hon. Mr. Landry*..... .....*Not printed.*

174. Return to an order of the House of Commons, dated 18th February, 1907, for a copy of all regulations submitted by the government to trans-Atlantic steamship companies for their guidance in regard to stowing of perishable products, or temperatures to be maintained in cold storage, or cold air chambers, or ventilation required in ordinary storage chambers on their steamships. Presented 7th March, 1907.—*Mr. Smith (Wentworth)*.....*Not printed.*

175. Return to an order of the House of Commons, dated 23rd January, 1907, for a copy of all correspondence and written communications between judges of the Provincial Courts and the Minister of Justice, or any member or official of the government, since the passing of the Dominion Act 4-5 Edward VII, chapter 31, in reference to section 7 of said Act, or in reference to judges acting as executors, administrators or trustees of estates, directors or managers of companies, corporations or firms, or arbitrators, umpires or referees in matters of controversy, or engaging in other extrajudicial work ; and including a copy of a circular letter to judges issued by the Minister of Justice, and referred to by the Minister in *Hansard* for First Session of 1906, at page 869, and of the answers of the judges to the circular. Presented 8th March, 1907.—*Mr. Lennox*.....*Not printed.*

CONTENTS OF VOLUME 13—*Continued.*

176. Return to an order of the House of Commons, dated 28th January, 1907, for a copy of the report of Mr. C. W. Speers, General Colonization Agent, in respect of the special inspection and enumeration which was made of the Doukhobor colonies during the year 1905-6, together with the instructions which led up to it, and the report of the inspectors engaged in the work (without census sheets), and any correspondence in connection with or arising out of the same. Presented 8th March, 1907.—*Mr. Ames*.....*Not printed.*

177. Return to an order of the House of Commns, dated 28th February, 1907, for a copy of all correspondence in regard to the mission of W. L. Mackenzie King, Deputy Minister of Labour, to England, to secure legislation by the British Parliament to prevent fraudulent representations being made in that country to induce emigration to Canada; also a copy of the legislation enacted as a result of such mission. Presented 8th March, 1907.—*Mr. Smith (Nanaimo)*.....*Not printed.*

178. Return to an order of the House of Commons, dated 18th February, 1907, for a copy of the report respecting the selection and location of 3,500,000 acres in the Peace River District of British Columbia, which has been prepared upon the exploratory survey mentioned by the Minister of the Interior on the 7th February in the House of Commons. Presented 11th March, 1907.—*Mr. Borden (Carleton)*.....*Printed for sessional papers.*

179. Return to an order of the House of Commons, dated 20th February, 1907, showing all timber licenses over Indian lands in the territorial district of Algoma granted or rented by the government since 1896; returns of such licenses or rentals, the area covered by each of the same, the names and address of the several licensees, and the prices or rentals paid, respectively, and any conditions which may be attached to the same, respectively. Presented 12th March, 1907.—*Mr. Boyce*.....*Not printed.*

180. Return to an order of the House of Commons, dated 25th February, 1907, for a copy of all correspondence, documents and papers, accounts, agreements, grants and memoranda respecting the application for and sale of timber lands in the townships of Fisher, Haviland and Tilley, in the district of Algoma, on the 21st of November, 1900, by the Superintendent General of Indian Affairs, to Messrs. Wilson, Reeser and Philp. Presented 12th March, 1907.—*Mr. Boyce*.....*Not printed.*

181. Return to an order of the House of Commons, dated 10th December, 1906, for a copy of all reports made by superintendents of experimental farms in Canada regarding the results of experiments made during the past season to test the value of fish scrap produced at the government reduction works at Canso, Nova Scotia, as a fertilizer. Presented 12th March, 1907.—*Mr. Sinclair*. *Not printed.*

182. Return to an order of the House of Commons, dated 25th February, 1907, showing what statistical matter has been omitted from the Canada Year-book, 1905, which it has been customary to include in the Year-book of former years; and also where such omitted information can be found if published elsewhere. Presented 12th March, 1907.—*Mr. Kemp*.....*Not printed.*

183. Return to an order of the House of Commons, dated 11th February, 1907, showing: 1. What control the government has over the teachers in the Indian schools of Canada. 2. Whether or not the teachers are compelled by law to have certificates before accepting a position in the Indian schools of Canada. 3. How many teachers in the Indian schools of Canada have first class certificates, how many second class certificates, how many third class certificates, and how many are teaching on permits. 4. What standard of school books are used in said schools, and if said books are issued under instructions, from the department of Indian affairs, or issued by the department, or by what authority said books are issued, and who has charge of the issuing of such books. 5. Any regulations relating to education of Indians passed by this government since 1896, and the nature of said regulations. 6. The regulations, if any, that have been passed since 1896 relating to teachers in Indian schools. Presented 13th March, 1907.—*Mr. Armstrong*.....*Not printed.*

184. Return to an order of the House of Commons, dated 25th February, 1907, for a copy of all correspondence had between the Attorney General of New Brunswick, or any other member of the New Brunswick government, and the Minister of Justice, or any other member of the Dominion government, touching or in any way relating to the reorganization of the Supreme Court of New Brunswick. 185. Return to an order of the House of Commons, dated 20th February, 1907, showing: 1. The names of every officer, non-commissioned officer and man, of the Second Rifles Royal Canadian Regiment, the Canadian Mounted Rifles, the Royal Canadian Field Artillery, and the Strathcona Horse, and the South African Constabulary, who enlisted from the province of British Columbia, in order to take part in active military operations in South Africa. 2. The names of all British Columbians

CONTENTS OF VOLUME 13—*Continued.*

who served with or embarked for service with the British forces in South Africa who were not members of the above corps. 3. The names of all British Columbians who were regularly appointed to the medical staff, and were actively engaged in said military operations. 4. The names of nurses, hospital dressers, and orderlies, resident in British Columbia, who were actively engaged in said military operations. Presented 13th March, 1907.—*Mr. Ross (Yale-Cariboo)*... .....*Not printed.*

186. Return to an order of the House of Commons, dated 23rd January, 1907, for a copy of all correspondence, with the papers and reports made by superior officers of the Department of Marine and Fisheries, or by Captain Wakeham, or any other person, regarding the dismissal from the service of R. P. Dubé, second mate on board *La Canadienne*; also for a copy of the report made by the said R. P. Dubé to the Department of Marine and Fisheries regarding the fire on the *Aberdeen*, on the 10th November, 1905. Presented 13th March, 1907.—*Mr. Gauvreau*..... .....*Not printed.*

187. Return to an order of the House of Commons, dated 11th February, 1907, for a copy of the record and all proceedings in the suit in the Exchequer Court of Canada between the King, on the information of the Attorney General of the Dominion of Canada, and H. E. Lyon, plaintiffs, and Malcolm McKenzie and Felix A. Montalbetti, defendants, including all correspondence in connection therewith between the Department of Justice and the Department of the Interior, or any officers thereof, respectively, and between either of the said departments, or any officers thereof, and any other person or persons whatsoever; and including all documents or memorandum in any way relating to the said suit, including instructions to counsel engaged therein on behalf of the plaintiffs; and also all documents on file in the Department of the Interior, relating to the northeast quarter of section 35, in township 7, range 4, west of the 5th meridian. Presented 18th March, 1907.—*Mr. Herron*..... .....*Not printed.*

187*a*. Supplementary return to No. 187. Presented 10th April, 1907..... .....*Not printed.*

188. Return to an order of the House of Commons, dated 23rd January, 1907, showing: All sales of Dominion lands of 160 acres and upwards, in Manitoba, Saskatchewan and Alberta, which have been made by the government, exclusive of school lands, since the 1st January, 1905, with the price obtained, and dates of sale. Presented 19th March, 1907.—*Mr. Lake*.....*Not printed.*

189. Return to an address of the Senate, dated 6th March, 1907, for copies of all correspondence between the government of Canada or any member thereof with any person whatsoever, and any report from any officer of the government regarding the question of pensions by the state to deserving persons of advanced age; and also a copy of a Bill referred to by the Right Honourable the Minister of Trade and Commerce during a speech made by him in the Senate on the 28th February last, dealing with the sale of annuities by the government of Canada. Presented 19th March, 1907.—*Hon. Mr. Ferguson*..... ..... *Not printed.*

190. A statement in pursuance of section 17 of the Civil Service Insurance Act for the year ending 30th June, 1906. Presented (Senate) 15th March, 1907, by Hon. R. W. Scott.....*Not printed.*

191. Return to an address of the House of Commons, dated 28th March, 1906, for copies of all orders in council, reports, memoranda, correspondence, valuation, documents and papers, of every kind and nature and description, relating to the property situated on the south side of Spring Garden Road, in the city of Halifax, upon which the old drill shed was or is situated; or relating to the leasing, conveying, disposal, or user of the said property, or of any property conveyed to the crown in consideration or in part consideration therefor. Presented 22nd March, 1907.—*Mr. Fowler*..*Not printed.*

192. Return to an order of the House of Commons, dated 11th February, 1907, for a copy of all reports or correspondence between the Railway Commission and the Department of Justice, concerning the trial of one Atkinson, on a charge of manslaughter, in connection with the collision which took place on the Grand Trunk Railway at Richmond, Quebec, in August, 1904. Presented 22nd March, 1907.—*Mr. Worthington*..... .....*Not printed.*

193. Return to an order of the House of Commons, dated 6th February, 1907, for a copy of all correspondence, telegrams, orders in council, and all other papers and documents in possession of the government, or any member or official thereof, in any way relating to the purchase by the government of what is known as the Warburton property in Charlotteown, for a rifle range, and a right of way for approach to the Hillsboro' bridge. Presented 25th March, 1907.—*Mr. Lefurgey.* *Not printed.*

193*a*. Supplementary return to No. 193. Presented 15th April, 1907..... ..... *Not printed.*

CONTENTS OF VOLUME 13—*Continued.*

194. Return to an address of the House of Commons, dated 17th December, 1906, for a copy of all orders in council, advertisements for tenders, tenders, specifications of every kind, plans, drawings, reports, letters, telegrams, correspondence, contracts, agreements and other documents and papers of every kind, touching or relating to the construction of immigration buildings in the city of Winnipeg, since 1st January, 1900. Presented 25th March, 1907.—*Mr. Borden (Carleton).* *Not printed.*

194*a*. Supplementary return to 194. Presented 19th April, 1907..... *Not printed.*

195. Return to an order of the House of Commons, dated 4th March, 1907, showing: The number of desks of every kind and description, with prices of the same, bought for the House of Commons by the government, since 1896. (Particulars of purchases by Stationery Branch and the Sergeant-at-Arms.) Presented 25th March, 1907.—*Mr. Bergeron*..... *Not printed*

196. Return to an order of the House of Commons, dated 4th March, 1907, showing: 1. The chief differences in principle between the Ross rifle and the Snider-Enfield, the Martini-Henry and the Lee-Enfield. 2. The average annual number of each, the Ross rifle and the Lee-Enfield rifle, manufactured. 3. The various kinds of rifle "sights" for which adoption has been sought in recent years. 4. The number of accidents to men in Canada from each, the Lee-Enfield and the Ross rifle. 5. The breakages or disabled rifles of each class recorded. Presented 25th March, 1907.—*Mr. Hughes (Victoria).* *Not printed.*

197. Return to an address of the House of Commons, dated 17th December, 1906, for a copy of all orders in council, advertisements for tenders, tenders, specifications, plans and drawings, reports, letters, telegrams, correspondence, contracts and other documents and papers of every kind, touching or relating to the construction of a post office building at Vancouver, British Columbia. Presented 27th March, 1907.—*Mr. Borden (Carleton)* ..... *Not printed.*

198. Return to an order of the House of Commons, dated 11th February, 1907, for a copy of all letters, reports and other papers connected with the cutting of a channel into a lake at Red Head, Shelburne Co., N.S., for the purpose of connecting it with the sea. Presented 2nd April, 1907.—*Mr. Gunn.* *Not printed.*

199. Return to an order of the House of Commons, dated 14th January, 1907, showing: The number of miles of government telegraph lines, respectively, in each of the provinces and districts of Canada, the points between which they run, and the various stations on each line, and population of the same, the working expenses and receipts, respectively of each station and line for the ten years ending December 31st, 1906; the amount that has been spent yearly during the ten past years, (*a*) on construction of new lines or extensions; (*b*) on repairs and maintenance of existing lines; and the total expenditure for, (*a*) construction; (*b*) repairs and maintenance of the present government telegraph lines, and the receipts and working expenses thereof by years. Presented 27th April, 1907.—*Mr. Foster*..... *Not printed.*

200. Return to an address of the House of Commons, dated 28th March, 1906, showing: 1. What proprietary rights, or rights of licensing, or control or other rights, if any, are vested in the government of Canada or the crown, in the right of Canada in respect to (*a*) sea fisheries; (*b*) inland fisheries in each province. 2. What such rights are vested in each provincial government or the crown in the right of each provincial government, in respect of the matter aforesaid. 3. What rights, powers or jurisdiction to lease or otherwise regulate or control, manage or interfere with sea or inland fisheries, are exercised by the federal government or any department thereof. 4. What such rights, powers or jurisdiction, if any, are exercised by any provincial government or department thereof. 5. What jurisdiction to legislate is possessed or exercised by, (*a*) the parliament of Canada; (*b*) any provincial legislature with respect to: (*c*) sea fisheries, or (*d*) inland fisheries in regard to: (*e*) proprietary rights; (*f*) licensing; (*g*) other regulations; (*h*) control or management. 6. Whether any differences or disputes between any provincial government and the federal government now exist with respect to any of the matters above mentioned; and, if so, a statement of the exact nature and form of such disputes or differences. Presented 10th April, 1907.—*Mr. Borden (Carleton)*....*Not printed.*

201. Copy of amendment to the Postal Convention of January, 1888, between Canada and the United States. Presented 11th April, 1907, by Hon. R. Lemieux..... *Not printed.*

202. Return to an order of the House of Commons, dated 18th February, 1907, for a copy of all correspondence, telegrams, reports, and all other information in the possession of the government, or any member or official thereof, in reference to winter communication, and the construction of a tunnel between Prince Edward Island and the mainland of Canada. Presented 12th April, 1907.—*Mr. Martin (Queen's)*..... *Not printed.*

CONTENTS OF VOLUME 13—*Continued.*

202*a*. Supplementary return to 202. Presented 17th April, 1907.....*Not printed.*

203. Return to an order of the House of Commons, dated 30th January, 1907, showing what wrecks have been reported to the Department of Marine and Fisheries of Canada, which have occurred on the Great Lakes, that is, Lakes Huron and Superior, since the first day of May, 1882; showing what loss of life occurred as a consequence of each wreck, the reported or ascertained cause of the wreck, showing in each case whether there was an investigation into the cause of the wreck, the tonnage and approximate value of each vessel and cargo lost. Presented 12th April, 1907.—*Mr. Boyce.* *Not printed.*

204. Return to an order of the House of Commons, dated 3rd December, 1906, for a copy of all correspondence between the postmaster general's department and any person or persons, relating to the forbidding the use of the mails to the newspaper known as *Lowrey's Claim*, and copies of the articles complained of. Presented 15th April, 1907.—*Mr. Gallihcr*..... *Not printed.*

205. Return to an order of the House of Commons, dated 29th November, 1906, showing the names, places of residence, places or ports where shipped, and dates when shipped, of the officers and crews of the steamers *Minto*, *Stanley* and *Princess*; and also of the dredges *W. S. Fielding*, *St. Lawrence* and *George MacKenzie*. Presented 12th April, 1907.—*Mr. McLean (Queen's)*.. .....*Not printed.*

205*a*. Return to an address of the Senate dated 27th February, 1907, asking for a statement showing: 1. How many men are now or have been employed on the government steamer *Montcalm*, giving the name of each, the date of his employment, the nature of his duties, the amount of his remuneration, and stating in each case whether the employment has been permanent or temporary. 2. What service or services has the said steamer been engaged in, since her construction. If there have been different services the statement to show definitely the time devoted to each service. 3. At what places in the St. Lawrence or elsewhere has the said steamer operated in ice-breaking, and to what extent has such operation resulted in opening passages for ordinary shipping. 4. What has been the total cost of maintenance of said steamer, including wages, fuel, repairs, board of crew, and other expenses, from the time she commenced service (the date to be stated) up to the 25th instant. 5. And showing the tonnage, horse-power, and original cost of said steamer. Presented 17th April, 1907.—*Hon. Mr. Ferguson*..... *Not printed.*

206. Return to an order of the House of Commons, dated 17th December, 1906, for a copy of all correspondence between the Winnipeg Board of Trade and any other body or individual and the government or any department thereof, relating to the restriction of fishing on Lake Winnipeg. Presented 12th April, 1907.—*Mr. Roche (Marquette)*..... *Not printed.*

207. Return to an order of the House of Commons, dated 17th December, 1906, for: 1. A copy of all leases and agreements between the government, represented by the Deparment of Marine and Fisheries, and (*a*) the Athabasca Fish Company (J. K. McKenzie, Selkirk, Manitoba), or their assigns, Messrs. Butterfield & Dee; (*b*) A. McNee, Windsor, Ontario; (*c*) the British American Fish Corporation of Montreal and Selkirk (F. H. Markey). 2. A copy of all reports, correspondence or documents, relating to or touching upon the application for securing of, transfer of, or enjoyment of any privileges under said leases. 3. A statement of all rentals, bonuses, or payments to the government in respect of such leases to date. 4. All information in the possession of or procurable by the government with reference to (*a*) the number of tugs, boats and men employed; (*b*) the quantity and value of nets used; (*c*) the number and value of fish taken; (*d*) the quantity of fish exported under each of said leases during the last period of twelve months, for which such figures are available. Presented 12th April, 1907.—*Mr. Ames*.. . .....*Not printed.*

208. Return to an order of the House of Commons, dated 9th January, 1907, showing, in respect of all contracts since 1st January, 1904, between the government and the Gallena Oil Company, of Toronto, for supplies to any of the railways of the government: 1. The tenders upon which contracts were based, and all tenders made by other parties for such contracts. 2. All correspondence and communications of the department and officers thereof, with the several tenderers or contractors, relating to such contracts, or tenders or supplies; also all correspondence and communications between such officers, relating to such tenders, contracts or supplies. 3. All advertisements, notices, statements, accounts, papers and vouchers, relating to such contracts or supplies, or payments thereof. Presented 15th April, 1907.—*Mr. Ames*..... *Not printed.*

209. Return to an order of the House of Commons, dated 9th January, 1907, for a copy of all reports, instructions, plans, agreements or documents, of every description, in the possession of the government, concerning, relating to, or touching upon the location, the erection, or the equipment of new

CONTENTS OF VOLUME 13—*Continued.*

locomotive and car shops at Moncton, or the purchase of new machinery for the same. Presented 15th April, 1907.—*Mr. Ames*..... *Not printed.*

210. Return to an order of the House of Commons, dated 11th of March, 1907, showing the total amount of money in banks, to the credit of the government, at the end of each month during the year 1906, and the name of each bank. Presented 15th April, 1907.—*Mr. Armstrong*.....*Not printed.*

211. Return to an order of the House of Commons, dated 20th February, 1907, showing all the mineral, coal and other lands, water-powers, and other franchises in the vicinity of Grand Falls, on the Hamilton River, and also in the District of Mackenzie; and also in the Territory of Ungava, that have been applied for, leased, granted, disposed of, or otherwise dealt with, since the year 1896; together with the names and addresses of the applicants, lessees and purchasers, the prices paid, the quantity of land alienated, and the conditions, if any, attached to each of the grants or dispositions. Presented 17th April, 1907.—*Mr. Boyce*.....*Not printed.*

212. Return to an order of the House of Commons, dated 11th March, 1907, for a copy of all papers, reports and correspondence, in connection with the Doukhobor colonies in Saskatchewan, from October 1st, 1906, to date. Presented 17th April, 1907.—*Mr. Cash*..... *Not printed.*

213. Return to an address of the House of Commons, dated 8th April, 1907, for a copy of all memorials, petitions, resolutions, correspondence or documents of any description in the possession of the government, relating to or referring to the recent appointment of a senator to represent the district of Rougemont. Presented 17th April, 1907.—*Mr. Ames*.....*Not printed.*

214. Return to an order of the House of Commons, dated 11th February, 1907, showing: 1. What works of a public nature have been undertaken in the counties of Compton, Richmond and Sherbrooke, respectively, by any department of this government since 1896 to date. 2. All sums of money, apart from the usual expenditure in connection with the maintenance of postal and customs department, that have been expended in these counties, respectively, since that date. 3. For what purposes these sums were expended, and to whom paid. Presented 19th April, 1907.—*Mr. Worthington.* *Not printed.*

215. Return to an address of the House of Commons, dated 18th December, 1906, for a copy of all orders in council, advertisements for tenders, tenders, specifications of every kind, plans, drawings, reports, letters, telegrams, correspondence, contracts, agreements and other documents and papers of every kind, touching or relating to the construction of a post office in the city of Winnipeg, since the year 1900. Presented 19th April, 1907.—*Mr. Borden (Carleton)*.....*Not printed.*

216. Return to an order of the House of Commons, dated 11th February, 1907, for a copy of all letters, reports and other papers connected with the building of a wharf at North East Harbour, Shelburne County, N.S. Presented 19th April, 1907.—*Mr. Perley*.....*Not printed.*

217. Return (in part) to an order of the House of Commons, dated 6th February, 1907, for a copy of all letters, accounts, vouchers, cheques, correspondence and documents relating to any amount paid to Mr. R. T. McIlreith, barrister, of Halifax, for legal services, by the government of Canada, during each of the fiscal years ending, respectively, 30th day of June, 1902, 1903, 1904, 1905 and 1906. Also relating to all amounts similarly paid to any legal agent or representative of the government at Halifax during each of the fiscal years ending, respectively, 30th June, 1891, 1892, 1893, 1894, 1895, 1896 and 1897. Presented 19th April, 1907.—*Messrs. Crocket* and *Johnston*.....*Not printed.*

218. Return to an order of the House of Commons, dated 10th December, 1906, for a copy of all papers and correspondence, relating to the adoption and the application of section 9 of the Act of 1885, amending the Consolidated Revenue Act of 1883, now subsection 4 of section 148, of chapter 34 of the Revised Statutes of Canada; this Act treating of two-year maturing spirits in bond. Presented 19th April, 1907.—*Mr. Robitaille*.....*Not printed.*

219. Report of Mr. Augustus Power, K.C., Commissioner appointed to report on the matter of Louise F. Wiley *vs.* Fred. T. Congdon. Presented 19th April, 1907, by Hon. F. Oliver.....*Not printed.*

220. Extracts from a report of the Committee of the Privy Council, approved by the Governor General on 26th May, 1906, and 5th July, 1906, respecting certain ordinances passed by the council of the Yukon Territory. Presented 20th April, 1907, by Hon. F. Oliver.....*Not printed.*

221. Return to an order of the House of Commons, dated 4th March, 1907, showing: All coal lands leased, sold, or otherwise disposed of, from the 1st of January, 1906, to date, giving the area disposed of, the party to whom, the consideration therefor, the assignments made, if any, the date thereof, and the name of the assignee in each case. Presented 24th April, 1907.—*Mr. Lake.* *Not printed.*

CONTENTS OF VOLUME 13—*Concluded.*

222. Census of Statistics. Bulletin 1, Wage-earners by Occupations. Presented 25th April, 1907, by Hon. S. A. Fisher . ..... *Not printed.*

223. Return to an address of the Senate dated 7th December, 1906, for copies of all correspondence respecting a site or sites for a public building in the town of Glace Bay, N.S., between any member of the government and all other parties ; the area of the sites, the price of each, the date of the purchase, the date of each payment, the name of the seller of each site, the report or reports of the government engineer, showing lots recommended and those not recommended by him, and all notes or memoranda referring to said sites. Presented 15th April, 1907.—*Hon. Mr. McDonald (Cape Breton)*..... *Not printed.*

224. Return to an order of the House of Commons, dated 28th November, 1906, for a copy of all correspondence and other papers since the year 1896, between the city of Toronto, the Harbour Commissioners of Toronto, or any other persons, and the Dominion government, relating to, (*a*) the dredging or deepening of Toronto Harbour and the approaches thereto at the eastern and western gaps, or the shoals outside of said entrances ; (*b*) the building of breakwaters, piers or other works for or in connection with such entrances at the eastern and western gaps to said harbour. Presented 27th April, 1907.—*Mr. Macdonnell*..... *Not printed.*

225. Supplementary return to 166. Presented (Senate) 28th February, 1907.... .....*Not printed.*

226. Return to an address of the Senate dated 20th March, 1907, asking for all correspondence between the government of Canada or any department thereof, and the government of Prince Edward Island, in 1901 or 1902, respecting the per capita allowance payable to that province, as provided for in the British North America Act, and how the said allowance should be computed on the population of the province, as ascertained by the census of 1901. Presented 5th April, 1907.—*Hon. Mr. Ferguson*.....*Not printed.*

227. Return to an order of the Senate, dated 6th February, 1907, asking for a statement indicating in so many columns : 1. The names, christian names, age and nationality, of all persons who have been appointed to any position in the customs house at Quebec, since the 1st of July, 1906. 2. The names of the persons who were replaced by those new appointments, specifying at the same time whether the persons so replaced were replaced by reason of their death, their retirement, or their dismissal, and by whom they have been replaced. 3. The names of the persons who recommended each of these new appointments. Presented 27th April, 1907.—*Hon. Mr. Landry*.....*Not printed.*

REPORT

OF THE

POSTMASTER GENERAL

FOR THE

YEAR ENDED JUNE 30

1906

REPORT

OF THE

DEPUTY POSTMASTER GENERAL

1905-1906

POST OFFICE DEPARTMENT,
OTTAWA, 20th October, 1906.

To the Honourable
RODOLPHE LEMIEUX, K. C., M. P.,
Postmaster General of Canada.

I have the honour to submit for your consideration the several statements annexed hereto comprising the report for the year ending 30th June, 1906. An examination of these statements will show that the operations for the year have been marked by a considerable expansion of the service.

The main points of increase are as follows :—

In	the	number	of	Post Offices, an increase of	262
"	"	"	"	Postal Note Offices, " "	780
"	"	"	"	Money Order Offices, " "	182
"	"	"	"	Savings Bank Offices, " "	22

In the number of miles of Railway used for the conveyance of mails, there has been an increase of 1,095 miles and this, taken together with the increased mileage on lines already in use, gives a total increase in the Railway mail service of 2,768,908 miles. There has also been an increase in mail service by water routes of 247,175 miles and by land service an increase of 176,338 miles ; thus giving a total increase in miles of mail service during the year of 3,192,421.

The expansion of the service mentioned has involved an increase in the expenditure amounting to $287,049.44.

The estimated increase in the number of letters and post cards sent during the year is 41,836,000, which is more than 13 per cent as compared with the preceding year.

There has, also, been an increase of $5,006,197.69 in the amount of money orders issued and of $827,995.02 in the amount of postal notes paid during the past fiscal year.

The cost to the Department of maintaining the postal service in the Yukon and Atlin districts, in excess of the revenue from those districts, amounted to $104,404.18.

The gross revenue of the Post Office for the year amounted to $7,708,142.27, and the expenditure, which includes that on the Yukon and Atlin districts, amounted to $6,696,376.96. The surplus, therefore, from the operations of the year is $1,011,765.31.

"Postage Due" Stamps.

A system of accounting for short paid postage collected by Postmasters, by means of special stamps known as "Postage Due" stamps, has been adopted by the Department. These stamps are to be affixed to short paid mail matter and cancelled by Postmasters when such matter is delivered to the addressee, and are not to be used for any other purpose. They cannot be used for the payment of ordinary postage, nor are they to be sold to the public.

The denominations of these stamps are 1, 2 and 5 cents.

Reduced Rates on Single and Reply Post Cards from Australia.

The Postal Administration of the Commonwealth of Australia has given notice that the rates of postage on post cards sent from Australia to Canada have been reduced from 1½ pence to one penny each for single post cards and from 3 pence to 2 pence for reply post cards dating from January 1, 1906.

Parcel Post between Canada and Dutch Guiana (Surinam).

By an arrangement with the Postal Administration of British Guiana the exchange of parcels by Parcel Post between Canada and Dutch Guiana (Surinam) will be carried on by way of Halifax and British Guiana, instead of by way of England as heretofore. It has thus become possible to make a reduction in the rates of postage on parcels sent from Canada to Dutch Guiana, and the following are to be substituted for the rates given on page lxxiii of the Postal Guide for 1906 :—

1 lb , 36 cts.; 2 lbs., 46cts.; 3 lbs., 56 cts.; 4 lbs., 78 cts.; 5 lbs., 88 cts.; 6 lbs., 98 cts.; 7 lbs., $1.08 ; 8 lbs., $1.30 ; 9 lbs., $1.40 ; 10 lbs., $1.50 ; 11 lbs., $1.60.

Parcel Post between Canada and Trinidad

A Convention has been arranged between the Postal Administrations of Canada and Trindad for the direct exchange of parcels by Parcel Post. The limit of weight for a single parcel is seven pounds and the rates on parcels sent from Canada to Trinidad are as follows :—

1 lb., 16 cts.; 2 lbs., 32 cts.; 3 lbs., 48 cts,; 4 lbs., 64 cts.; 5 lbs., 80 cts.; 6 lbs., 96 cts.; 7 lbs., $1.12. Parcel Mails for Trinidad are made up at St. John, N. B.

Postage Stamps.

The Postage Stamp output, as reference to the tabulated statement in Appendix J to this report will show, very considerably exceeds that of the preceding fiscal year. In value it discloses an increase of $866,095.75, the amount having been $7,068,927.85 as compared with $6,202,832.10, which was the value of the issue for 1904-05 ; whilst in quantity it exceeds by 51,320,616 pieces the output of the previous year, the figures for the year under review being 387,908,230 as against 336,587,614 for the previous fiscal year. The growth in value, therefore, was nearly 14% ; in quantity, a little more than 15⅕%. The number of licensed stamp vendors in the Dominion on June 30, 1906, was 1,200, showing an increase during the year of 192.

The details of the operations of the several branches of the department will be found in the several appendices, but the following tables contain in compendious form the results of the past year's work :

TABLE showing the number of Post Offices in operation; also estimated number of Letters and other Articles of Mail Matter posted in the Dominion of Canada during the Year ended June 30, 1906.

Province.	Number of Offices in operation at end of fiscal year, 1906.	Estimated Number of Letters and other Articles of Mail Matter posted in the Dominion of Canada during the year ended June 30, 1906.							
		Letters.	Post Cards.	Registered Letters.	Free Letters.	Third Class Matter.		Fourth Class (Packets of Ordinary Merchandise open to examination).	Closed Parcels for United Kingdom and other countries.

INCREASE IN LETTERS CARRIED.

The estimated increase in the number of letters carried during the year (based on the sale of stamps) is 26,351,000. The increases for the years since 1896 have been as follows:—

1897	7,802,000
1898	11,145,000
1899	15,400,000
1900 (2c. rate adopted)	27,917,500
1901	23,357,000
1902	21,978,000
1903	22,163,000
1904	23,399,000
1905	26,351,000
1906	38,103,000

INCREASE IN REVENUE, &c.

The net revenue for year ended June 30, 1906, compared with the previous year, shows an increase of $807,969.86.

PREVIOUS INCREASES.

1898	$324,871 27
1899	*344,878 77
1900	1,053 25
1901	237,208 02
1902	466,933 91
1903	478,001 65
1904	286,196 99
1905	473,047 93

* Decrease.

The surplus of revenue over expenditure for the year ended June 30, 1906, was $1,011,765.31.

APPENDIX C

ACCOUNTING POST OFFICES

MONEY ORDER AND OTHER TRANSACTIONS

APPENDIX C.

MONEY ORDER TRANSACTIONS.

The number of Money Order Offices in operation on the 30th June, 1906, was 2,676, an increase of 182 over the previous year.

The total number of Orders issued during the year was 2,178,549, showing an increase over the previous year of 254,419. The aggregate value was $37,355,673.37, an increase over the previous year of $5,006,197.69.

Of the Orders issued during the year 1,425,148 with a value of $26,133,565.05 were payable in the Dominion. Compared with the previous year there was an increase in number of 146,735, and in value of $2,723,079.51.

753,401 Orders with a value of $11,222,108.32 were payable abroad. Compared with the previous year there was an increase of 107,684 in number, and an increase of $2,283,045.08 in amount.

The number of Orders issued abroad and payable in Canada was 436,954 with an aggregate value of $6,533,200.88, being an increase of 51,270 in number and $930,791.81 in amount.

The number of Orders issued in Canada on the United States was 407,013, and the value $5,333,513.83, an increase of 37,322 in number and of $832,629.60 in amount.

The following statement will show the very large increase in the Postal Note payments in the United States :—

	Number. 1905.	Amount. 1905.	Number. 1906.	Amount. 1906.
Money Orders. ...	369,691	$4,500,812 13	407,013	$5,333,513 83
Postal Notes.	193,822	324,863 89	317,406	554,531 36
Totals..... ...	563,513	$4,825,676 02	724,419	$5,888,045 19

The number of Orders issued in the United States on Canada was 366,609, and the value $5,126,144.44, an increase of 44,989 in number and $724,945.58 in amount.

The rates for the conversion of Canadian money into that of France and into that of Germany were fixed at 5·10 francs and 4·16 marks to the dollar, respectively, when business was established in 1883.

Experience showed that the rates of exchange would permit the Department paying larger sums in those countries for each dollar deposited in Canada and the rates were raised on the 1st July, 1905, to 5·15 francs in the cases of France, Belgium, Italy, Switzerland and other countries using the franc and to 4·18 marks in the cases of Germany and the German post offices abroad.

Direct exchange with Orange River Colony and Turks Island went into operation on the 1st October, 1905 ; with Western Australia on the 1st February, 1906, and with Denmark, Iceland and the Faroe Islands on the 1st April, 1906.

Exchange with the Malay Peninsula (Federated States) through the British Office commenced on 1st September, 1905.

In the interest of remitters it was deemed advisable to change the mode of service for Bosnia, Herzegovina and Montenegro from Great Britain to Austria on the 1st November, 1905. The charges made by the British Offices for the intermediary service are now saved to remitters.

APPENDIX C—*Continued.*

Advices for British Bechuanaland and Basutoland have been forwarded via Cape Colony since 1st December, 1905, and remitters save the charges previously made by British Office.

Arrangements are being made for direct exchanges with the Bahamas, Mexico, Panama Canal Zone and Holland and negotiations are also under way to improve the service with Jamaica, Turks Island and the United Kingdom.

The average value of Money Orders issued during the year was $17.11, and the average commission received from the public was 10·459c.

The total receipts from all sources amounted to $253,444.22, and the total expenditure, including the salaries of the inside service at Ottawa, to $215,720.83 leaving an excess of receipts over expenditure of $37,723.39.

The average value of money orders issued in Canada, including both the local and foreign classes, and the average commission received thereon are shown in the following statement embracing the past eleven years :—

	Average value of Orders issued.	Average commission received.
1896	$ 11 56	9·42 cents.
1897	11 17	9·063 "
1898	12 46	9·371 "
1899	13 63	10·095 "
1900	15 08	10·908 "
1901	15 51	10·651 "
1902	16 28	9·204 "
1903	16 10	9·285 "
1904	15 86	9·417 "
1905	16 81	10·054 "
1906	17 11	10·459 "

APPENDIX C—*Continued.*

The following statement shows the receipts and expenditure for the year :—

Receipts.

Commission from public		$ 227,845 77
Profit in exchange with other countries		21,848 65
Void money orders issued between 1st July, 1904 and 31st March, 1905		3,749 80
		$ 253,444 22

Expenditure.

Salaries at head office, Ottawa :—		
Permanent clerks	$43,696 97

a. This increase in the cost of management arises from the exhibition for the first time as a charge against the money order system, of the salaries of clerks in city post offices, engaged exclusively in the money order duties ; also from the preliminary expenses incurred in organizing money order exchange with a number of additional countries, as stated in the report for the year ended June 30, 1883. *b.* Including the amount of the 'Void' orders of the previous years. *c.* Including payment for services partly chargeable to preceding year. * Under the system of accounts introduced July 1, 1888, these items cannot be given separately.

APPENDIX C—*Continued.*

EXCHANGE of Money Orders between Canada and other Countries for the years of 1904-1905 and 1905-1906, was as follows :—

	Issued in Canada.				Payable in Canada.

APPENDIX E

TRANSACTIONS

OF THE

POST OFFICE SAVINGS BANK

APPENDIX E.

POST OFFICE SAVINGS BANK.

The aggregate balance at the credit of depositors on June 30, 1906. was $45,736,-488.51, or an increase of $368,727.83; the average to the credit of each depositor being $276.75, as against $274.09 on June 30, 1905.

The number of accounts opened during the year was 37,681, or an increase of 2,305 over the previous year, and 879 accounts were transferred from the Dominion Government Savings Bank at Toronto. The number of accounts closed was 39,536, an increase of 534 over the previous year. The number of accounts remaining open at the close of the year was 164,542, or a decrease of 976, as compared with a decrease of 3,054 the preceding year.

The deposits were 233,803 in number, an increase of 10,522 over the previous year, and amounted to $10,805,458, an increase of $301,588. The average amount of each deposit was $46.21 as compared with $47.04 in the previous year.

The deposits in the Dominion Government Savings Bank at Toronto were transferred to the Post Office Savings Bank in November, 1905, and amounted to $559,593.31.

Repayments numbered 106,923, a decrease of 3,234, with a total amount of $12,324,529.26, an increase of $195,428.03; the average withdrawal being $115.26 as compared with $110.11 the previous year.

The interest paid to depositors was $91,034.46 and the interest accrued and made principal on June 30, 1906 was $1,237,171.32, making a total of $1,328,205.78, an increase of $7,694.08.

The number of offices authorized to transact business was increased from 989 to 1,011.

The claims of moneys of deceased depositors which were examined and paid during the year were 1,226 as compared with 1,305 for the previous year.

Annexed is a tabular statement of the annual operations of the Post Office Savings Bank since its organization in April, 1868.

STATEMENT (in accordance with the Act 52 Vic., chap. 20, sec. 12) of the Post Office Savings Bank transactions for the year ended June 30, 1906, and of the total amount due to depositors on that date.

APPENDIX H

REPORT OF MISSING LETTERS

CLASS A---REGISTERED LETTERS

APPENDIX H.

REPORT of all cases occurring within the Year ended June 30, 1906, of abstraction from, or loss of, Letters containing Money, sent through the Post Office in Canada; showing the particulars of each case, and stating the results of the proceedings instituted therein by the Department.

CLASS A.—REGISTERED LETTERS.

No.	Name of Writer.	Where mailed.	When mailed.	Alleged Contents.	Address of Letter.		Evidence of Loss or Abstraction.	Result of Proceedings instituted in each case by the Department.	Class in Recapitulation.
					Name.	Place.			
			1905.	$ cts.					
1	Alex. Cameron. . .	Stanley, B.C....	Jan. 15	75 00	Jno. A. McDonald.	Mabou, N.S....	Stated not to have been received by the person addressed.	This letter duly reached the Mabou post office where, further trace of it could not be found. Value of contents made good by the postmaster.	3
2	Mrs. D. McLean.	Vancouver.....	Feb. 28	15 00	M. E. Debbs,..	Shellbrook, M..	Stated to have been received without contents.	This letter duly reached the Prince Albert post office, en route to destination, where it is believed to have been tampered with by a dishonest official who is not now in the post office. Loss made good by the postmaster of Prince Albert.	5
3	Postmaster.....	Bloomfield, O...	April 6	45 00	Bank of Montreal	Ottawa.....	" "	This letter was received by the Toronto and Montreal Railway post office from the Bloomfield post office in an open condition and without contents. Money evidently accidentally lost in the Bloomfield post office. Loss borne by the postmaster.	5
4	R. Brown.....	Winnipeg.	" 10	5 00	Mrs. R. Brown..	Montreal..... .	" "	No evidence to account for the alleged discrepancy.	[illegible]
5	B. P. Abnel	Pugwash, N.S...	" 18	16 00	F. H. White....	St. Andrews, N.B.	" "	" " ..	7
6	L. Denis.....	Verdun, Q.....	" 21	3 00	L. Denis.....	Ste. Adele, Q...	" "	" " .	7
7	J. A. Bleakley....	Kemptville. ...	" 25	3 25	A. E. Hill	Toronto	Stated not to have been received by the person addressed.	This letter was lost by a letter carrier of the Toronto post office, who made good the value of its contents.	3
8	L. Treacy	North Bay, O...	May 22	22 00	Mrs. J. Chalmers	St. Mary's, O...	" "	Value of contents made good by the postmaster of North Bay, who was unable to show any evidence of the despatch of the letter from his office.	3

9	R. A. Darling	Shebo, Sask.....	"	26	25 00	Miles Dale.....	Vossen, Sask. ..	" "	This letter duly reached Yorkton, whence it was despatched to Yorkton and Winnipeg Ry. post office and its receipt acknowledged. Subsequently however the letter could not be found. Value of contents made good by the railway mail clerk.	3
10	Miss M. Hemeon..	West Berlin, N.S	"	30	1 82	T. Eaton Co ...	Toronto.....	Stated to have been received without contents.	This letter is believed to have been mis-treated at the West Berlin post office. Loss made good by the postmaster of West Berlin.	5
11	John Gillson.....	London.....	June	3	25 00	Mrs. J. Willis .	Sunderland, O..	" "	No evidence to account for the alleged discrepancy.	7
12	Dr. Richard	Viger, Q.....	"	5	3 75	A. Decary	Montreal.	Stated not to have been received by the persons addressed.	These letters duly reached the Montreal post office where they were lost by a letter carrier. Value of contents made good by the letter carrier.	3
13	J. A. Matteau....	Lac Bellemare, Q	"	5	50 00	La Cie Ferronnerie Letang.	"			
14	Geo. Caron.....	Les Escoumains, Q.	"	10	21 00	D. Bouchard....	Tadousac.....	Only $16 stated to have been received.	This letter was tampered with by a party who had obtained access to the interior of the Les Escoumains post office. Loss made good by the postmaster.	5
15	M. Desnoyers....	St. Michel de Rougemont, Q.	"	12	8 60	J. L. Bordera...	Granby..	Only $3.48 stated to have been received.	This letter, which was mis-delivered by the Granby P O., was subsequently returned to the P.O., but without full amount alleged to have been inclosed. Loss made good by the postmaster.	5
16	Miss H. Taker...	Grand Entry, Q.	"	13	15 00	Dr. Solomon....	La Verniere . ..	Stated not to have been received by the person addressed.	Contents made good partly by Postmaster of Grand Entry and, partly by postmaster of Grindstone Island --the former having neglected to enter the letter on the letter-bill of the mail for Grindstone Island by which he alleges it to have been despatched from his office, and the latter for having neglected to report non-receipt of letter to the P.O. Inspector.	3
17	Jos. H. Belsey ...	Penetanguishene	"	13	3 00	B. & H. B. Kent	Toronto .. .		These letters duly reached the Toronto P.O., where further trace of them could not be obtained. Value of contents made good by the official who had received the letters.	3
18	Miss Martin.....	" ..	"	13	0 50	Star Music Store	"	... ...		
19	Mr. Beck.....	" ..	"	13	15 00	G. Beck.....	Deer Park....			
20	... .	Elm Creek, M..	"	27	17 00	T. Eaton Co ...	Toronto.....	Stated to have been received without contents.	No evidence to account for the alleged discrepancy.	7
21	H. W. W. Allen..	Winnipeg.....,	"	30	15 00	Dr. A. A. Stewart	"	" ' ..	" " ..	7

APPENDIX H—*Continued.*

A.—REGISTERED LETTERS.—Report of all cases occurring within the Year ended June 30, 1906, of abstraction from, or loss of, Letters containing Money, sent through the Post Office in Canada—*Continued.*

No.	Name of Writer.	Where mailed.	When mailed.	Alleged Contents.	Address of Letter.		Evidence of Loss or Abstraction.	Result of Proceedings instituted in each case by the Department.	Class in Recapitulation.
					Name.	Place.			
			1905.	$ cts.					
22	Miss Forget.....	Ste. Irènee les Bains, Q.....	June 30	2 00	Miss A. Mamie.	Varennes.	Stated not to have been received by the person addressed.	There being no evidence of the despatch of this letter from Ste. Irenée les Bains P. O., the postmaster made good the value of its contents.	3
23	R. Sowerby	Shediac, N. B...	July 17	12 00	Cavers Bros.....	Galt, Ont	Stated to have been received without contents.	No evidence to account for the alleged discrepancy.	7
24	——————.....	Callender, Ont..	.....	120 00	Traders' Bank..	North Bay.....	Stated not to have been received by the person addressed.	This letter was stolen by an individual who improperly obtained access to the interior of the North Bay post office. The evidence however was not sufficient to secure his conviction. Value of contents made good by the postmaster of North Bay.	3
25	O. T. Hance.....	Hanceville.....	" 28.	45 00	McLennan & McFeely.	Vancouver.....	" "	These letters are stated to have been despatched from Hanceville to 150 Mile House, but not to have reached the latter P.O. Value of contents made good by the contractor, the evidence pointing to the conclusion that the letters disappeared while in transit between Hanceville and 150 Mile House.	8
26	M. Lee.....	"	" 28.	40 00	Canadian Bank of Commerce.	Victoria			
27	M. Lee...	"	" 28.	46 69	Bank of B. N. America.	Ashcroft...			
28	M. Lee.....	"	" 28.	1 29	E. G. Prior.....	Kamloops,. ..			
29	Mrs. J. E. Melanson.	Plympton Station.	" 31.	0 75	T. Eaton Co....	Toronto	" "	There being no evidence of the despatch of this letter from the Plympton P. O., the loss was made good by the Postmaster.	3

30	Wm. K. Paterson.	Dominion, Y'kn	Aug.	2.	30 00	R. K. Patterson.	Kingston.	Stated to have been received without contents. The letter was insured.	Investigation failed to show at what point this letter was mis-treated. As it was insured by the Department, the amount for which it was insured was made good.	5
31	W. Booth	North Brook....	"	3.	14 50	Jas. Coristine Co., L'td.	Montreal.. ...	Stated not to have been received by the person addressed.	These letters were mis-delivered by an official of the Montreal P.O. Value of contents made good by the official in question.	3
32	J. D. Monpetit....	St. Telesphore..	"	4.	80 02	Jas. Coristine Co., L'td.	"			
33	Dr. St. Marie.....	Gracefield	"	7.	5 00	T. Eaton Co....	Toronto	" "	The Gracefield post office was entered by burglars on the night of the 7th Aug. and this letter stolen. No clue to the perpetrators of the robbery.	9
34	Joseph Therrien ..	Ste. Anne des Monts.	"	14	40 00	Wm. McLimont & Sons.	Quebec, Q.....	Only $30 stated to have been received.	No evidence to account for the alleged discrepancy.	7
35	D. R. Dewar.	Glen Roberson, O.	"	17	21 70	Angus McMillan Fraser.	Ottawa.....	Stated to have been received without contents.	" " ..	7
36	Bank of Toronto..	Gaspé.....	"	24	33 00	Cyriac Coulombe.	Chlorydormes, Q.	Stated not to have been received by the person addressed.	There being no evidence of the despatch of this letter from Gaspé, the value of its contents was made good by the postmaster.	3
37	Irene Smulski.....	Leduc	"	26	30 00	D. Smulski.....	Skaro.....			
38	C. V. Houghton..	Fernie.....	"	—	20 00	Mrs. E. J. Houghton.	Edison.. ..	"	These letters are stated to have been contained in the mail made up by Calgary and Edmonton railway post office for Edmonton, but not to have reached the latter office. Value of contents made good by the Edmonton and Calgary clerk, who had failed to properly record the letters on the letter-bill.	3
39	Wm. Levesley....	Harmattan, Alta	"	29	15 00	Codville Smith Co.	Calgary.....			
40	Howard Bros...	Eagle Hill.....	"	—	10 00	McPherson Fruit Co.	Calgary.....	"	These letters were stolen by an assistant in the Calgary post office, against whom the evidence was not sufficient to secure conviction. Value of contents made good by the individual in question.	8
41	Mrs. Jas. C. Ernst	Martin's Point, N.S.	Sept.	2	1 00	*The Evening Mail*	Halifax	"	This letter was duly despatched from Martin's Point to Halifax, where it is believed to have been stolen by an employee who is not now in the service.	4
42	John Newall.. ...	Eden, M..	"	5	10 00	R. M. Campbell.	Star City.....	"	The mail in which these letters were contained was destroyed in the wreck of the mail car when nearing Dingley.	10
43	Mrs. Stearns.....	Virden	"	6	10 00	Miss Stearns . .	Maple Creek....	"

RAILWAY MAIL SERVICE.

During the fiscal years 1905-06, 1095·15 miles of additional railway were utilized for mail purposes, making a total actual track mileage over which mail were carried on June 30, 1906, of 20,274.

The following statement shows the details of such additional service :—

Railway.	Terminal Points.	Distance in Miles.	Service.
Berlin & Bridgeport.	Berlin - Bridgeport	2·5	Daily B. C.
Canadian Northern..	Humbolt—Edmonton..	399·9	Daily P. C.
"	Hartney Junction—Virden	87·8	"
"	Neepawa—Rossburn	83·3	Tri-weekly B. C.
"	James Bay Junction—Parry Sound	4·5	Daily B. C.
"	Oak Point—Oak Point Junction	54·	Tri-weekly B. C.
"	Barrows—Melfort	138·8	"
Canadian Pacific	Foster Junction—Knowlton	5·3	Daily B. C.
"	Lipton—Strassburg	46·	Tri-weekly B. C.
"	Wetaskiwin—Camrose	25·	"
"	Lacombe—Alix	26·6	"
Cape Breton Electric	North Sydney—Sydney Mines	3·75	Daily B. C.
Chatham & Wallaceb'rg Electric	Chatham—Wallaceburg	18·	"
Great Northern of B.C.	New Westminster—Vancouver	13·6	Semi-daily B. C.
"	Grand Forks—Phœnix	23·8	Daily B. C.
Halifax & South Western	Halifax—Liverpool	111·8	"
Orford Mountain	Kingsbury—Windsor Mills	10·	"
Preston & Galt Electric	Preston—Galt	3·5	"
Temiscaming & Northern Ontario	New Liskeard—Heaslip	21·	Tri-weekly B. C.
Tilsonburg, Lake Erie & Pacific	Tilsonburg—Ingersoll	16·	Daily B. C.
	Total	1,095 15	

CHANGES IN EXISTING SERVICES.

During the year there have been established the following increases in the frequency of railway mail service :—

Railway.	Terminal Points.	Distance in Miles.	Particulars.
Canadian Northern.	Belmont—Brandon	43·1	Increased from tri-weekly to daily B.C.
"	Winnipeg—Dauphin	160·5	Additional tri-weekly service by B. C.
Canadian Pacific	Montreal—St. Philippe	18·43	Additional daily service by B. C.
"	Harriston—Mount Forest	7 5	" "
"	Larivière—Mowbray	33·1	Increased from semi to tri-weekly B.C.
"	Molson—Lac du Bonnet	22·	" " "
"	S. S. Marie—Sudbury	178·9	Additional weekly service by B. C.
"	Winnipeg—Stonewall	19·9	Additional daily service by B. C.
"	Calgary—Strathcona	190·6	" "
"	Calgary—Macleod	106·7	Change from B. C. to P. C. service.
"	Brandon—Souris	24·5	" " "
"	Arcola—Regina	109·	Increased from tri-weekly to daily B.C.
"	Cranbrook—Kimberley	18·7	" " "
Grand Trunk Ry.	Brantford—Goderich	84·87	Change from B. C. to P. C. service.
"	Brantford—Tilsonburg	34·73	Additional daily service by B. C.
"	Coteau Jct—Valleyfield	5·4	" "
"	Blackwater Jct—Midland	75·52	Change from B. C. to P. C. service.
Sydney & Glace Bay Electric	Sydney—Glace Bay	14·	Additional daily service by B. C.
Temiscaming & Northern Ontario	North Bay—New Liskeard	113·	Change from B. C. to P. C. service.

APPENDIX L—*Continued.*

DETAIL of service performed by postal and baggage car during the fiscal year 1905–06.

POSTAL CAR.

Frequency.	Miles.
Daily, including Sundays	12,121·94
Daily, excluding Sundays	31,266·97
Tri-weekly	714·63
Weekly	546·02
	44,649·56

Or when reduced to a daily (except Sunday) basis, 45,857·54 miles.

BAGGAGE CAR.

Frequency.	Miles.
Daily, including Sundays	4,045·22
Daily, excluding Sundays	23,349·15
Five times a week	45·25
Tri-weekly	2,056·52
Semi-weekly	721·14
Weekly	2,491·15
	32,708·43

Or when reduced to a daily (except Sunday) basis, 29,790·12.

REPORT

OF THE

DEPUTY MINISTER OF THE INTERIOR

1905-6

DEPARTMENT OF THE INTERIOR,
OTTAWA, October 27, 1906.

The Honourable FRANK OLIVER,
Minister of the Interior.

SIR,—I have the honour to submit the report of the Department of the Interior for the year ending June 30, 1906, being the thirty-third annual statement of the department since its inception in 1873.

The general result of the work, as evidenced by the returns submitted by the various branches, has, on the whole, been highly satisfactory. In fact, the year has been a record one in the history of the department, both as regards immigrant arrivals and the granting of free homestead entries. There has been further an increase of $697,439.56 in the total gross revenue as compared with the previous twelve months, and the area of land disposed of by the various land companies holding grants from the Crown was nearly double the acreage sold during the year 1904-5.

From a public standpoint, these results are certainly very gratifying, for nothing, at the present stage of our national life, could contribute more largely to the extension of the trade and commerce of Canada, the development of its varied resources, and the consequent general prosperity of the country, than the settlement, by a suitable class of agriculturists, of the vast areas of arable land composing the western provinces. Too optimistic an estimate can scarcely be made of the agricultural wealth of western Canada when its possibilities are gauged by the bountiful harvests resulting from the tillage of what after all is but an insignificant part of the whole, in so far as the extent of the wheat fields is concerned. That the opening to the plough of these western lands has been one of the most potent factors in the ever increasing prosperity of the country during the last decade, should be considered as the strongest possible ground for prosecuting with increased vigour the land and immigration policy to which the satisfactory results now reported are chiefly attributable.

It has been found advisable again this year, in order to expedite the printing of the general report, to publish the report of the Surveyor General separately, and it will,

therefore, except as to the Surveyor General's own portion thereof, appear as a supplementary report under Part III.

The same remark applies to the whole report of the Chief Astronomer, which will appear in monograph form under Part V.

NEW APPOINTMENTS.

Mr. G. U. Ryley, who had been employed in the department since 1882, and who for the last twenty-two years was in charge of the Timber and Mines Branch, resigned this office on November 1, 1905, to accept a responsible position with the Grand Trunk Pacific Railway Company. Mr. Ryley, during the many years that he was attached to the permanent staff of the department at headquarters, proved himself to be a highly competent officer, and contributed largely, by his professional knowledge as a Dominion land surveyor, and by the zeal which he displayed in the discharge of his duties, to the present efficient organization of the Timber and Mines Branch.

Mr. R. H. Campbell, who has been a permanent officer of the department since 1887, was appointed on November 7, 1905, to succeed Mr. Ryley as chief of the Timber Branch. Mr. Campbell, who had previous to his promotion been charged more particularly with the administration of grazing lands, and who has a full knowledge of the regulations and of the timber resources and lumber industry of the west, is altogether well qualified to satisfactorily discharge the duties of his new office.

MINES BRANCH.

Reference should be made also to the establishment of a separate branch in connection with the administration of mines and mining lands in the western provinces, in the Yukon, and in the Northwest Territories, where the title to a considerable extent of land, both as regards the surface and under rights, is still vested in the Dominion. In view of the large increase of work affecting this particular service, and the distinctive character of the duties appertaining to the office under which matters of this class are dealt with, it has been deemed advisable, in the public interest, to establish a separate branch at headquarters through which all matters relating to mines and mining lands will in future be administered. The present arrangement, it is felt, will conduce to the more efficient and expeditious transaction of the work connected with this service. Mr. H. H. Rowatt, who has been a member of the department since 1887, and who for the last twelve years had been closely connected with the mining business of the department, was on July 1, last, appointed chief clerk in charge of the new branch. Mr. Rowatt being fully conversant with the laws and regulations respecting mines and mining lands, and thoroughly familiar with the work of the branch, there is no doubt that he is fully competent to render efficient service.

I desire to report also the appointment on May 31, 1906, of Mr. N. O. Coté as chief clerk in charge of the Patents branch, vice Mr. W. M. Goodeve deceased.

Mr. Coté has been in the employ of the department for twenty-eight years, nineteen of which he spent as assistant to the head of the Patents branch. He has on three different occasions held the responsible position of commissioner for the settlement of Northwest Half-breed claims, and his long connection with the department has enabled him to gain a thorough knowledge of the general business of the Patents branch, which specially fits him for the office of chief clerk of patents.

I beg to report also the promotion to chief clerkships of Mr. P. B. Symes and Mr. J. A. Coté. The former is to-day the oldest official of the department, having first been appointed on June 1, 1870. He has for a number of years past been acting as chief assistant to the surveyor general, and it was felt that the importance of his duties, coupled with his length of service, fully entitled him to a chief clerkship.

Mr. Coté has been in the service of the department for twenty-five years, the last fifteen of which he has been attached to the staff of the deputy minister. In view of the large increase in the correspondence and the general work of the deputy's office it was deemed necessary to appoint a responsible officer to be placed in charge of this particular work, and Mr. Coté being possessed of the necessary qualifications for the office was promoted to a chief clerkship on May 31, 1906.

DEATHS.

It is my painful duty to report the death of an old and respected officer of the department in the person of Mr. W. M. Goodeve. Mr. Goodeve first entered the Government of Canada before confederation, namely, on February 8, 1866, being then but seventeen years of age; he therefore had an uninterrupted service of forty years at the time of his death, which occurred on March 31 last. Throughout his long and useful career he proved himself to be at all times a model officer, indefatigable and conscientious in the discharge of his onerous duties as chief clerk of patents, which position he held for twenty-one years, and ever beyond reproach in all his official and public dealings. He was possessed to the full of the most sterling qualities, both of the heart and of the mind, which endeared him to all with whom he came in contact. His demise has been a serious loss to the department with which he was connected for so many years, and which he served so faithfully.

I regret to report also the death of two old and faithful officials, in the persons of Mr. John Satchell and Mr. Joseph Beaudoin. The former, who was first appointed on February 1, 1880, died on November 25, 1905, and Mr. Beaudoin, who was originally employed by the Department of Agriculture since 1885, and who was transferred to this department in 1892, died on April 8, 1906.

* Including scrip.

REVENUE.

The gross revenue of the department from all sources, as will be seen from the above statement, amounted to $2,533,858.12, which is a net increase of $697,439.56 over the receipts of the previous twelve months.

It will be observed that the largest item of increase was on account of Dominion lands proper, the total revenue under this head for the last decade being $13,139,941.78, as compared with $2,343,835.95 for the preceding ten years. When it is considered that the bulk of this revenue is made up of homestead fees and mining, grazing, timber and hay dues, the enormous increase above mentioned must be accepted as the strongest possible indication of the substantial and rapid development which has been going on in the settlement of western lands during the past few years.

Total	174,331	52,771	27,779	80,550

HOMESTEAD ENTRIES AND SALES.

The foregoing statements, which are in fact a concise expression of the work done by the department during the year, are most satisfactory. Forty-one thousand eight hundred and sixty-nine entrants, representing a total population of 105,420 souls are positively known to have taken up homesteads in western Canada during the twelve months ending June 30, 1906. When it is considered that 27,251 of these entrants were persons coming from outside of Canada, or who had not received previous entry, it will be seen that approximately over 65,000 of the immigrants who came to Canada last year actually settled on the government free lands. This fact is of interest when considering the question of immigration generally, as it indicates very clearly that from official statistics, of the accuracy of which there cannot possibly be any question, over one-third of the immigrant arrivals for the year ending June 30, last, are known to be located on free homesteads as independent agriculturists.

The total number of entries recorded is the largest by over 10,000 of any year since the inception of the department, and represents a total revenue in fees alone of $417,834.25. During the last five years there were 144,823 entries in all granted, from which a total revenue of $1,443,247.51 has been derived. It will also be observed that out of the 41,869 entries granted last year, 20,582 were made by persons coming from the United States or the British Isles.

Reference should also be made here to the large increase in the number of letters patent issued during the past year. While there were but 2,665 letters patent issued in 1896, the number had risen to 12,370 for the past year. This increase was not unexpected in view of the fact that over 100,000 entries had been granted during the years 1902-3-4 and 1905, and it must follow that within the next few years, when the 144,823 settlers who entered for homesteads during the past five years earn title to their holdings, there will be a still further increase in the number of patents issued. The consideration at headquarters of the applications for patents and the subsequent issue of the title deeds involves a considerable amount of work, and provision should

be made in advance to meet the new requirements in the way of suitable office accommodation, in order to prevent congestion in the work and delay in the issue of the letters patent.

CORRESPONDENCE.

The following statement shows the number of letters received and sent by the department in each year since its establishment :—

Departmental Year ended October 31.	Letters Received.	Letters Sent.	Total.
1874	3,482	4,120	7,632
1875	1,974	2,189	4,163

1902	167,200	185,548	352,748
1903 (From June 30, 1902 to July 1, 1903)	185,582	223,463	409,045
1904 (From June 30, 1903 to July 1, 1904)	222,316	274,675	496,991
1905 (From June 30, 1904 to July 1, 1905)	245,470	302,723	548,193
1906 (From June 30, 1905 to July 1, 1906)	407,794	529,465	937,259

The number of registered letters during the Departmental year 1906 was: Received, 6,993; Sent, 32,447.

CORRESPONDENCE AND OFFICE ACCOMMODATION.

I desire to draw particular attention to this matter, as I consider it one of very grave importance in connection with the proper transaction of public business and the general administration of the department. The correspondence has assumed such proportions of late years, as shown from the foregoing statement, that it has become physically impossible with the limited space at the disposal of the department to handle the same with the efficiency and promptness which the importance of the subjects dealt with would demand in the public interest. When it is considered that nearly one million letters were handled through the registration branch during the past twelve months alone, over 400,000 of which were letters received from all parts of the world from persons making inquiry in a large proportion of cases about

matters which had already come up for consideration, one scarcely realizes the enormous amount of work required to attach each letter to the file to which it properly belongs. With the limited accommodation now provided in the Langevin Block, and owing chiefly to the fact that it has been found necessary to transfer some of the most important branches of the department to rented quarters in other parts of the city, the greatest difficulty is being experienced in having the official documents properly recorded. Steps are now being taken to rearrange the offices of the Patents and Registration branches, consequent upon the moving of the Timber and Mines offices to the Canadian building, but nevertheless it is felt that such arrangement can only be of a temporary character, for there is no doubt that with the rapid development of western lands the business of the department will continue to increase for many years to come. The question, therefore, of providing adequate quarters for the department is one of serious moment, and one which should receive careful and early consideration.

DOMINION LANDS.

Under Part I. will be found the report of the Commissioner of Dominion Lands upon the operation of his office during the past year.

Particular attention is called to the statements accompanying this report from the inspector of Crown timber agencies, and the chief clerk of the Timber and Mines branch, as they contain full details as to the general result of the work performed in this important division of the department, as well as in each agency and sub-agency.

SPECIAL INSPECTION WORK.

As will be observed from the report of Mr. Leech, Inspector of Dominion Lands Agencies, a special inspection of all unpatented homesteads entered for prior to September 1, 1905, was undertaken early in the spring of the year. This step was deemed advisable in view of the large demand for free homesteads from incoming settlers, and in order to ascertain whether lands held under entry were actually occupied by the holders thereof. This inspection, as stated by Mr. Leech, entailed considerable work, but the result was highly satisfactory. It relieved 885 homesteads to which the entrants had forfeited their rights through non-occupation, and it helped to demonstrate the fact that the bulk of the 15,834 homesteads inspected were duly occupied by the bona fide settlers who had made entry therefor.

It may be stated also in this relation that although the various offices in the outside service have been taxed to their utmost capacity, owing to the rush of land seekers desirous of securing information respecting suitable homesteads open for entry, and the largely increased number of applicants for entries or patents, the work on the whole has been performed in a highly satisfactory manner, no complaints of a serious character from the public having reached the department.

IRRIGATION AND CANADIAN IRRIGATION SURVEYS, 1905.

The development of irrigation works continues steadily through Southern Alberta and Southwestern Saskatchewan. The larger schemes of the Alberta Railway and Irrigation Company and the Canadian Pacific Railway Company are being pushed on

steadily to completion, and these companies will be in a position in a short time to supply water for irrigation purposes to large areas of land.

The Commissioner of Irrigation has, since his appointment, been making an inspection of numerous small irrigation schemes, and these are now being put into proper order. The irrigation of lands for the production of fodder crops to be used in connection with stock-raising will be one of the most important objects that will be served by the smaller schemes which are projected.

In the province of Alberta the number of ditches constructed is 159, the length of canals and ditches is 832·36 miles, and the area of land to be irrigated by these canals and ditches 2,880,056 acres.

In the province of Saskatchewan the number of ditches constructed is 110, the length is 189·68 miles, and the area to be irrigated by these ditches as constructed 36,916 acres.

In connection with the diversion of water from the St. Mary's river, however, there is a danger of complications owing to the proposed diversion of the waters of that river by the government of the United States. It is desirable that some arrangement should be reached with the United States which would conserve the vested interests of the irrigation companies, and of those persons in Canada who are dependent on the St. Mary's river for a supply of water for irrigation purposes.

A contract was entered into during the present year with the Robins Irrigation Company, of London, England, for the irrigation of a tract of 380,573 acres lying to the west of Medicine Hat. The sources of water supply will be the Bow and Belly rivers, and the carrying out of the scheme will involve a large expenditure for the construction of the necessary diversion canals and other works, but it will greatly assist the progress in agriculture of a district which requires irrigation to develop its full possibilities.

IMMIGRATION.

Comparative statement of arrivals at inland and ocean ports during the ten years ending June 30, 1906.

ARRIVALS.

Year.	Great Britain and Ireland.	Other Countries.	United States.	Total.
1896-7	11,383	7,921	2,412	21,716
1897-8	11,173	11,608	9,119	31,900
1898-9	10,660	21,938	11,945	44,543
1899-00	* 5,141	* 10,211	* 8,543	23,895
1900-01	11,810	19,352	17,987	49,149
1901-02	17,259	23,732	26,388	67,379
1902-03	41,792	37,099	49,473	128,364
1903-04	50,374	34,785	45,171	130,330
1904-05	65,359	37,255	43,652	146,266
1905-06	86,796	44,349	57,919	189,064
	311,747	248,250	272,609	832,606

* Arrivals for six months only

The report of the Superintendent of Immigration and of the various officers under his control, will be found under Part II. of the general report. Last year's immigration has been the largest in the history of Canada. One hundred and eighty-nine thousand and sixty-four arrivals in all were recorded during the twelve months ending June 30, last, being an increase of 42,798 over the previous year.

The detailed statements as to the nationality, occupation and destination of immigrant arrivals which accompany the superintendent's report, have been prepared with the greatest possible care, and the figures given may, therefore, be accepted as being strictly accurate. From these statements it will be seen that of the total arrivals 131,268 came via ocean ports, and that the remainder, namely 57,796 persons, came direct from the United States.

It will be seen from the tables that apart from the British Isles and the United States of America there were arrivals from fifty-four different countries of the world, representing the chief races of the five continents. It is interesting to note in this relation that 46 immigrants came from South Africa, 171 from the West Indies, 340 from Newfoundland, 89 from New Zealand, 7 from Persia and 18 from Egypt. These figures are given here simply to show that the opportunities offered by Canada to capital and labour have aroused the attention of persons in the most remote parts of the world who are desirous of improving their social and material condition by removing to a new country.

The one aim and well established policy of the department during the past few years has been to make Canada better known in the outside world, so as to attract capitalists and desirable settlers to develop her vast natural resources. That this policy has been productive of the desired results is amply demonstrated by the fact that during the past ten years 832,606 persons landed in Canada from every part of the world; of these 584,356 came from the British Isles and the United States. During the same period 174,331 free homesteads were taken up in the western provinces by actual settlers, 80,550 of which were made by persons coming from the British Isles and the United States. The record is certainly a very extraordinary one and should be accepted as most conclusive evidence that the methods adopted and followed by the department are based on sound principles, and are conducive to the best possible results.

BRITISH IMMIGRATION.

Attention is called in this relation to the reports of the High Commissioner for Canada and of the Commissioner of Emigration in London, and also to the reports of the various agents operating in the British Isles and in France and Belgium. As will be seen, the result of the work in the Old Country has been highly satisfactory. Reference has already been made to the large increase in the number of British arrivals during the past year. The time would appear to be most opportune for continuing with increased vigour the propaganda which has been conducted in Great Britain during the past few years. With the increase in the amount of bonus to the booking agents which was decided upon some time ago, and the renewed efforts that are being put forth on the part of our agents as a result of your recent visit to the Old Country, there is no doubt that Canada will continue to receive a still greater share of the emigration from Great Britain to North America. It is, therefore, proposed to follow

with increased energy the methods already employed in the way of advertising, and of properly educating prospective emigrants as to the advantages offered by Canada as a suitable field for settlement.

CONTINENTAL IMMIGRATION.

The total immigration from countries other than Great Britain and the United States numbered 44,349, as compared with 37,255 for the previous year. The termination of the arrangement with the North Atlantic Trading Syndicate and the withdrawal of the bonus system in connection with bookings from the continent will make it necessary to adopt some new plan for carrying on our work in European countries where restrictive laws regarding emigration are in force. So far as France and Belgium are concerned, the present methods followed by our agents there would appear to be quite satisfactory, and settlers who reach Canada from these two countries belong as a whole to a very desirable class. As for the other continental countries, however, where an open propaganda is not permissible under existing laws, it is recommended that such methods be devised to carry on the work as the circumstances in each different country may warrant.

IMMIGRATION FROM THE UNITED STATES.

The work in the United States, which for a number of years past has been under the immediate direction of Mr. W. J. White, inspector of agencies, has been attended with highly satisfactory results. It will be observed by reference to the comparative statement of arrivals that the total number from the United States during the past decade was 272,609, of which 57,919, or nearly one-fifth, came during the twelve months ending June 30 last. The information contained in the inspector's report with regard to the methods employed in inducing members of the farming community in the Western States to move to Canada, as well as his observations with respect to the opposing influences with which our agents have to contend, will no doubt be read with interest.

IMMIGRATION OFFICES IN WESTERN CANADA.

Special attention is also invited to the very exhaustive report submitted by the Commissioner of Immigration at Winnipeg upon the work of the service under his control. Winnipeg being the chief distributing point for incoming settlers, it necessarily follows that with the increased arrivals the work devolving upon the commissioner and his staff has been unusually heavy during the past season. It is gratifying to note in this relation that, as pointed out by the commissioner, the general business of his office would appear to have been performed to the entire satisfaction of the immigrants and of the public generally.

Much valuable information will be found in the commissioner's report as to the present standing of some of the chief colonies that have been established in the west by incoming foreigners within the last few years. These colonies, although founded within a comparatively recent date, are reported to be making substantial progress, the settlers composing them being on the whole prosperous and contented. The summary of the seventy-two district reports embodied in the commissioner's statement will also prove of much interest to persons seeking information in concise form with

regard to the various points at which new settlers start for their homesteads, as well as to the existing conditions and prospects of each locality reported upon, many of which are but the nuclei of what will no doubt in a few years become prosperous towns.

JUVENILE IMMIGRATION.

The report of Mr. G. Bogue Smart, chief inspector of British immigrant children and receiving homes, will, I am sure, be read with special interest. The work of inspection in connection with juvenile immigration has, since the organization of this particular branch of the department, been so systematized that accurate and reliable information is readily obtainable as to the actual condition of every child sent out to Canada under the auspices of the Home Government Board at London, and placed in homes throughout the country. This system of inspection, under the control of the government, has done more to remove the prejudice which at one time existed against this class of immigration than any other means that could have been devised. There is to-day, as pointed out by the chief inspector, an ever increasing demand for this class of immigrant, and such of them as have been placed in private homes are reported on the whole to be giving very good satisfaction.

REPORT OF THE CHIEF MEDICAL OFFICER.

The report of Dr. H. P. Bryce, the chief medical officer, will be found to contain very interesting statistics with regard to the inspection of immigrants at the various ports of landing. There were in all 480 deportations effected, which is not a large percentage when compared with the total number of arrivals. Special attention is called to the striking statements contained in the following paragraph which appears in Dr. Bryce's report, from which it will be seen that not only should the country be thankful for the large increase in the number of desirable immigrants who landed at our ports during the past season, but that from a physical and mental standpoint these additions to our population were of the most desirable character:—

'It would be improper to conclude this report without again referring to what may be called the immunity little short of marvellous of the whole country during this year from outbreaks of acute contagious diseases, directly traceable to the movements of immigrants over thousands of miles and going into hundreds of municipalities and thousands of homes. Practically not a single outbreak has been brought to the attention of the department. . . . . .

'Looking over the whole field of operations for the year, however, whether on the one hand as regards the number and quality of immigrants admitted to Canada and their freedom, whether from contagious disease or from more serious, deep-seated maladies, and on the other hand to their reception in all the provinces, shown by their ready distribution and abundant employment amongst our people, and the mutually satisfactory results measured whether by statistical results or common report, it may fairly be said, comparing the present with the past history of large immigration whether to Canada in the early years of the last century, or of the large immigration in more recent years to the United States, that never have so many persons of a good class relatively come to any country in a single year, and nowhere have so many immigrants been so cordially received or more generously treated.'

SURVEYS.

During the calendar year of 1905, forty-nine parties were engaged on the survey of Dominion lands. Of these, six were located in Manitoba, eight in Saskatchewan, twenty-six in Alberta, three in British Columbia, one in the Yukon Territory, and five were engaged partly in one province and partly in another. Two of the parties were in charge of inspectors, examining surveys made under contract.

During the first six months of the present year fifty-three parties were at work. Of these, twelve were working in Manitoba, ten in Saskatchewan, twenty-four in Alberta, four in British Columbia and three partly in one province and partly in another.

The following table shows the distribution of parties paid by the day, and of those working under contract:—

Parties.	In Manitoba.	In Saskatchewan.	In Alberta.	In British Columbia.	In the Territories.	Partly in one Province and partly in another.	Total.
1905—Paid by the day..	5	4	12	3	....	5	29
Under contract ..	1	4	14	.....	1	....	20
1906—Paid by the day..	4	7	11	4	....	3	29
Under contract ..	8	3	13	.....	... .	....	24

The total mileage of the forty-six parties engaged on surveys in 1905 was 16,523 miles, an average of 359 miles for each party. Owing to the nature of their work the parties of Messrs. Wheeler, Belleau and Laurie are not included in the statement of mileage.

Survey operations this year, 1906, are on about the same scale as in 1905. It is expected that about 200 townships will be subdivided.

In view of the probable construction at an early date of railways through the country lying to the north and west of Edmonton, it has been deemed advisable to establish base lines and principal meridians so as to be prepared to subdivide townships anywhere when wanted for settlement. The lines run through a country which is wooded, generally very rough and at a considerable distance from settlements. Pack horses are used for transport and trails have to be opened for them. Surveying such a country is a difficult and expensive undertaking. A number of parties have been kept at this work for several years; although the surveyors in charge are among the most competent in the service, and have displayed great energy, the progress has been slow. The fifth meridian has still to be produced northward to the Peace river and base lines extended from it westerly.

Apart from the subdivision of new territory, the department is frequently called upon to retrace and restore old surveys. When twenty or thirty years have elapsed since the original subdivision of a township was made, it is often found that the posts have disappeared or the mounds have become obliterated. In wooded country, where no mounds or pits were formerly made, the corners being marked by wooden posts and bearing trees, all marks of the survey disappeared after the first forest fire. When

the lands are taken up, the new settlers naturally ask that the section lines be properly marked so that they may know the limits of their lands. Every effort is made to meet their wishes, and several of the survey parties are constantly engaged upon this work.

Errors in old surveys are a great source of trouble. Formerly the surveys of Dominion lands were not made with the degree of care and precision now prevailing. Townships were subdivided under contract as at present, but a rigid system of inspection on the ground and of examination of the plans and field notes had not yet been organized. Without proper inspection it was unavoidable that bad surveys should now and then escape detection and be accepted. The most frequent error is one of ten chains in the position of a quarter-section corner. It is suspected that the surveyor measured only half of the section line and that his chainman made an error of one tally. The whole mile not being measured, the error passed unnoticed. The result is that the quarter-sections, instead of being 160 acres each, are 130, 150, 170 and 190 acres respectively. When the settler who is complaining of an error in his lines has no neighbours there is nothing to prevent the correction of the survey, and this is done by one of our surveyors at the first opportunity. Generally, however, several settlers are interested; some wanting the error corrected while others object to any change being made. Such cases are very troublesome; notwithstanding the efforts of our surveyors to bring the parties to agree to a fair adjustment of their boundary lines, a satisfactory arrangement is seldom reached.

A few surveys were made last year at remote places. Lots were laid out to accommodate settlers at Cumberland House and Le Pas, on the Saskatchewan. Parts of several townships were subdivided west of Lesser Slave lake, beyond the limits of the old settlement. Lots were also laid out at Vermilion, on the Peace river: it will, no doubt, surprise many people to learn that a large and flourishing settlement exists there, 350 miles north of Edmonton.

The triangulation of the railway belt in British Columbia, undertaken for establishing reference marks for the subdivision of the belt, was continued by Mr. P. A. Carson. The work is being taken up where it was left by Mr. W. S. Drewry, and will be extended westward. The main object of the season's operations was to establish permanent marks at the stations to be occupied, to erect signals for observing angles next season and to select a place for measuring a base line.

Mr. J. A. Macdonell, with his assistant, Mr. J. A. Belleau, has continued the exploration of the lands in the Peace river district of British Columbia lying immediately to the west of the province of Alberta, and out of which are to be selected the three and one-half millions of acres granted by the province to the Dominion as compensation for the lands in the railway belt alienated prior to the transfer of the belt to the Dominion. The land has not yet been finally selected.

Mr. W. Thibaudeau, C.E., has completed under contract a survey of the Klondike region of the Yukon Territory, the object being to locate canals for conveying to the gold district the waters of the Klondike and its tributaries. No great progress can be made by the district without sufficient water for hydraulic mining and sluicing. Several projects are submitted by Mr. Thibaudeau, whose report, with estimates of cost, is appended to the report of the surveyor general.

Mr. A. O. Wheeler, topographer of the department, made a topographical survey of the Cougar valley in the Selkirk range. Remarkable natural caves, to which the name of Caves of Cheops has been given, have been discovered in this valley; a plan and an interesting description of the caves have been prepared by him, and are appended to the report of the surveyor general. Mr. Wheeler has also made good progress with the survey of the Rocky Mountains Park, upon which he has been engaged for the last two years.

Surveys in the Yukon Territory are being continued under the supervision of the director of surveys at Dawson. The surveys of thirty-six group lots were confirmed during the year ending June 30, 1906. In addition to these, returns have been received of the Frooks hydraulic concession on Flat creek, and of the surveys of base lines on Caribou creek and Lion gulch, on Eureka creek, right and left forks, on Flat creek and Isaac's gulch and on Bullion creek.

In November, 1905, Mr. John Stocks, late Deputy Commissioner of Public Works, was reappointed Chief Engineer of Irrigation and the irrigation office was removed from Regina to Calgary. Mr. John Stewart, D.L.S., was subsequently appointed Commissioner of Irrigation in succession to Mr. John Stocks. During the first six months of 1906, three parties in charge of Messrs. R. J. Burley, P. M. Saunders and J. F. Hamilton were engaged on irrigation surveys. Gauge readings on a number of streams were continued as in former years.

The office work at headquarters has unfortunately not kept pace with the progress of the surveys in the field. From the beginning of 1905 to date, no less than forty-four men left the office staff or were transferred to other offices. These changes and the substitution of untrained men in the place of those who left, have seriously interfered with the business of the office. Some 500 plans of townships in which surveys have been made remain unissued, and other work is equally in arrears.

Hereunder is the usual table of subdivision or settlement surveys work completed each year since the commencement of the surveys, with the result of last season's operations added:—

—	Acres.	Number of Farms of 160 acres each.
Previous to June, 1873	4,792,292	29,952
1874	4,237,864	26,487
1875	665,000	4,156
1876	420,507	2,628
1877	231,691	1,448
1878	306,936	1,918
1879	1,130,482	7,066
1880	4,472,000	27,950
1881	8,147,000	50,919
1882	10,186,000	63,662
1883	27,234,000	170,212
1884	6,435,000	40,218
1885	391,680	2,448
1886	1,379,010	8,620
1887	643,710	4,023
1888	1,131,840	7,074
1889	516,968	3,231
1890	817,075	5,106
1891	76,560	476
1892	1,395,200	8,720
1893	2,928,640	18,304
1894	300,240	1,876
1895	406,240	2,539
1896	506,560	3,166
1897	428,640	2,679
1898	859,840	5,374
1899	1,022,720	6,392
1900 (first six months)	735,480	4,596
1900-1901	1,603,680	10,023
1901-1902	2,553,120	15,957
1902-1903	6,173,440	38,584
1903-1904	12,709,600	79,435
1904-1905	10,671,520	66,697
1905-1906	4,973,920	31,087
Total	120,484,455	753,023

INTERNATIONAL BOUNDARIES AND OPERATIONS OF THE ASTRONOMICAL BRANCH OF THE DEPARTMENT.

The re-survey and re-demarcation of the international boundary along the 49th parallel has been continued this year by the commissioners, Dr. W. F. King for Great Britain, and Mr. O. H. Tittmann and Dr. C. D. Walcott for the United States. The Canadian part of the field work is under the direction, as heretofore, of Mr. J. J. McArthur, D.L.S.

This season's work has been in the Cascade mountains and the Fraser River valley. Good progress was made, but, owing to delays due to smoke, the hopes, which were expressed in my last annual report that this section would be completed this season, have not been fully realized. A small portion remains to be completed next year.

Dr. R. A. Daly, geologist to the survey, has completed the field work of his investigations along the 49th parallel between the summit of the Rocky mountains and the sea. Collection of the fauna of the region has been continued under the direction of Mr. J. M. Macoun, of the Geological Survey Department.

The demarcation of the Alaska boundary under the award of 1903 and the supplementary agreement of March 25, 1905, has been continued by Commissioners King

and Tittmann. There have been four Canadian parties at work, one under Mr. J. D. Craig, D.L.S., at Port Snattisham and Whiting river, one under Mr. W. F. Ratz, D.L.S., at Taku river, one under Mr. A. J. Brabazon, D.L.S, in the neighbourhood of Alsek river, and one under Mr Geo. White-Fraser, D.T.S., who was working in conjunction with the United States parties in the region of the passes from Lynn canal to the Yukon river. On behalf of the United States, one party has been at work between Alsek river and Yakutat bay, three about the Chilkat river, the Dyea and White passes and the mountains south therefrom, besides two representatives of the United States Commissioner accompanying Messrs. Craig and Ratz.

An agreement has been entered into with the government of the United States for the re-survey and re-marking of the international boundary line between Richelieu river and St. Croix river.

The course of this portion of the boundary was defined by the first article of the treaty of 1842, and was surveyed by a joint commission in 1843 to 1845. The necessity of renewal arises from the fact that the line has been in many places overgrown by timber, many of the monuments have been broken or have disappeared, and the placing of marks additional to those of the original survey has become necessary at many points, including railway and highway crossings, and places where the original monuments are not intervisible.

Dr. King was appointed commissioner for the performance of this work by order in council of July 7, last. Mr. Tittmann, Superintendent of the United States Coast and Geodetic Survey, has been appointed commissioner on behalf of the United States.

The field operations are in charge of Mr. G. C. Rainboth, D.L.S., of Aylmer, Que., and Mr. J. B. Baylor, of the United States Coast and Geodetic Survey.

Operations were begun about the end of July at Hall's Stream, on the boundary of the state of New Hampshire, and carried westward along the northern boundary of the state of Vermont, and the southern boundary of the province of Quebec. It has been determined to reset the old cast-iron monuments, where they are in good condition, in solid cement bases, and to use granite or concrete for the new monuments.

The boundary between Alaska and Canada rests upon the treaty of 1825 between Great Britain and Russia. In this treaty the line of demarcation between the territories of the two contracting powers upon the continent of North America and adjacent islands was defined as commencing at the southernmost point of Prince of Wales island, passing along Portland channel and thence following the mountains within a certain distance of the coast as far as the 141st meridian of longitude west from Greenwich, and thence following this meridian northward to the Arctic ocean. By the treaty of 1867 between the United States and Russia, the Russian territories were transferred to the United States, retaining the same definition of the boundary line with the British possessions.

This definition may be divided into two parts: the first part of the line follows natural features, while the second, the 141st meridian, is a line independent of such, and to be determined by the processes of astronomy and geodesy merely.

The line from the southern point of Prince of Wales island to the 141st meridian presented difficulties both in the identification of the natural features by which the

line was defined, and in the legal interpretation of the descriptive clauses of the treaty. As a consequence of diverging views on these points a wide strip of territory was claimed by both countries. To determine the natural features a joint topographical survey was made in 1893 to 1895 under the convention of July, 1892. The questions of interpretation of the description and of final identification of the natural features intended by the treaty were determined by the London tribunal of 1903. A small portion of the boundary line as regards which the tribunal failed to identify the mountains intended by the treaty of 1825 was settled by the supplementary agreement of 1905.

All this had reference only to the line east and south from the initial point of the 141st meridian. As regards the latter there was no dispute; it was recognized by all that it was a fixed geographical line only needing accurate survey to mark it on the ground.

In 1887 Mr. Wm. Ogilvie, D.L.S., took a series of lunar observations at a point on the Yukon river near the 141st meridian, and determined therefrom the position of the meridian.

Lunar observations, however, cannot give determinations of longitude at all comparable in accuracy with latitude observations. These last may give results with a probable error of but a few feet. The relative want of precision of longitude determinations by lunar observations (the only method available in the circumstances in which Mr. Ogilvie was placed) is shown by the fact that some two years later another determination, by the same method, at the same place, was made by an officer of the United States Coast and Geodetic Survey, with a result differing from Mr. Ogilvie's by nearly 1,000 feet. In 1895-96 Mr. Ogilvie took a second series of observations at this point, and surveyed the meridian north and south for several miles.

This survey, though not made under international agreement, has been in practice accepted for customs and local purposes, pending a final determination of the boundary.

In January, 1897, a treaty between Great Britain and the United States, providing for the appointment of commissioners to survey and mark the line, was agreed to and signed, but failed of ratification by the United States Senate.

A few years afterwards the Canadian government built their telegraph line through British Columbia and along the course of the Yukon river to, or near, the 141st meridian, thus rendering possible a determination of longitude by the accurate method of telegraphic exchange of time.

Negotiations for the treaty to provide for the demarcation of the meridian were not, however, resumed until after the London tribunal had, by their award, terminated the controversy over the boundary line of the Alaska coast strip.

As a result of the resumed negotiations a convention was signed on April 21 last, duly ratified, and ratifications exchanged on August 16.

The convention provides that each government shall appoint one commissioner, and that these commissioners shall determine by the telegraphic method a convenient point on the 141st meridian, and shall trace and mark a north and south line passing through said point. The line is to be marked by intervisible objects, natural or

artificial, and the line, when or where thus marked, in whole or in part, shall be deemed to define the 141st meridian permanently for all international purposes.

Dr. W. F. King has been nominated as H. M. Commissioner under this convention. Mr. O. H. Tittmann represents the United States.

The commissioners at once proceeded to have the necessary telegraphic determination made, in order that survey operations may be begun next spring. A short account of how the longitude determination was carried out will be found in Dr. King's report, which forms appendix No. V. to this report.

In Dr. King's report, with its appendices, will also be found a statement of the work done by the Astronomical Branch of the department including the astrophysical and other work at the observatory, the determination of geographical positions of points in Canada, and the service for the distribution of time in the government buildings, together with an account of the progress of the trigonometrical survey of Canada.

The purpose of this survey is, as was stated in my last annual report, to afford an accurate basis for the control of existing surveys, and of the detail surveys which are in progress under various departments of the public service. A conference of representatives of the departments interested will be advisable in order to ensure proper co-ordination by means of the trigonometrically determined points, and to avoid duplication of work.

THE ROCKY MOUNTAINS PARK OF CANADA.

The report of the Superintendent of the Park forms Part VI. of the general report.

According to the statements submitted by the superintendent, 30,136 persons visited the park during the past season, which is an increase of 10,298 over the previous year. From this it will be seen that this national resort is steadily growing popular favour, not only in Canada, but amongst health-seekers and tourists from other countries. In connection with this increased attendance it is gratifying to note that the revenue derived from the park is now more than double the amount required for current expenditure and maintenance. The total receipts under this head during the past fiscal year amounted to $18,883.83, being an increase of $4,824.28 over the previous twelve months.

The superintendent's recommendation that the northern limit of the park reserve should be extended to the Saskatchewan river, is one worthy of careful consideration. As pointed out by Mr. Superintendent Douglas, the present northern boundary is altogether theoretical, and the adoption of a natural boundary, such as the Saskatchewan river, would afford much better facilities for the protection of game, and would add to the park a district the marvellous beauty of which is reported to be unsurpassed.

The suggestion of the superintendent with reference to the establishment of permanent quarters within the park for caged animals, would also appear to be a very timely one. The specimens of birds and wild animals now in captivity are proving to be a source of great attraction to visitors, and there is no doubt that the establishment, on a permanent basis, of a zoological garden in which would be shown specimens representative of the bird and other animal life within the park reservation, would add a most attractive feature to our great national resort, and prove of much interest to the tourist and student of natural history.

As will be observed from the superintendent's report, the construction of a system of waterworks and sewerage at Banff, reference to which was made in the last annual report, has now been almost completed. This will supply a long-felt want, as the residents of Banff have had to contend with serious difficulties in this relation in the past, and the abundant water-supply which will thus be afforded will be conducive to the further beautifying of the town.

The superintendent's report on the whole is most satisfactory, and the information which it contains with regard to the park generally will be read, no doubt, with much interest.

I wish to call particular attention also to the superintendent's statement with regard to the herd of buffalo now kept within the animal paddock in the park. The herd now numbers 61 head in all, there having been a natural increase of ten head during the year. All the animals are reported to be in a healthy and thriving condition. When it is considered that this herd of buffalo is the only one of any extent in Canada, and that it will, no doubt, before many years be the largest herd in the world, it is fortunate that steps were taken some years ago to preserve the few specimens that remained of the noble animals that roamed in countless numbers over the western prairies in the early seventies. A small remnant of these is known to be still in existence in one of the far northwestern districts, and it has been suggested that an effort should be made to capture a few of these animals for the purpose of improving the breed of the buffalo now in captivity in the park. The suggestion is one which in my opinion should be acted upon. The cost of capturing a few of these wild animals would be small when compared with the benefit to be derived to the herd, which must be considered to-day as forming a very valuable asset of the Dominion.

SCHOOL LANDS.

The report of Mr. Checkley, the chief clerk in charge of the School Lands Branch, will be found under subdivision 30, of Part I. of the general report. As will be observed there were important sales of school lands held in both the provinces of Alberta and Saskatchewan during the past season, the average price obtained for lands sold in the former province being $11.55 per acre, and in the latter $14.32. In Alberta there was in all an area of 120,692.32 acres of land sold, the amount realized therefrom being $1,394,316.16, and in Saskatchewan the total acreage disposed of was 26,662.93 acres, for the sum of $381,714.40.

Statements will be found accompanying the chief clerk's report giving full particulars with regard to the present position of the various school lands funds.

THE YUKON TERRITORY.

The report of the Commissioner of the Yukon Territory will be found under Part VII. of the general report.

The gold yield for the past year amounted to $6,539,402.85, as compared with $8,227,200 for the previous year. The commissioner attributes this decrease to the exceptionally dry summer and to the fact that operations on many mining properties have been suspended pending the installation of dredges and hydraulic plants. The affairs of the territory on the whole would appear to be in a very satisfactory con-

dition, but as to this you have been able to fully inform yourself as a result of the visit which you made to Dawson in the month of August last. It is gratifying to note that, owing to the economy which has been exercised in the administration of the territory, the commissioner is in a position to report a surplus of $62,627.02, as compared with a deficit of $24,530.37 for the fiscal year 1904-5.

REPORT OF THE SUPERINTENDENT OF MINES.

The report of Dr. Eugene Haanel, superintendent of Mines, which forms Part VIII. of the general report, contains much interesting and valuable information upon the operations of his office during the past season. As will be observed, special attention has been given to the investigation of the iron industry of Canada. The matter, from a commercial point of view, is one of more than ordinary importance, and the result of the systematic investigation which has been commenced under the direction of the superintendent of mines in Nova Scotia, western Ontario, and the country along the Ottawa valley, will be awaited with interest.

It is satisfactory to note also that the results obtained from the electric smelting experiments that were conducted at Sault Ste. Marie last winter would appear to have demonstrated the practicability of the process for the successful smelting of Canadian iron ore, of which there are such inexhaustible deposits in various sections of the country.

Reference is also made by the superintendent to the appointment of the commission for the investigation of the zinc resources of British Columbia. The commission, which was composed of Mr. Walter Renton Ingalls, editor of the *Engineering and Mining Journal,* New York city, as chief of staff, Mr. Philip Argall, M.E., of Denver, Colorado, and Mr. A. C. Carde, of Nelson, B.C., completed its work during the past season, and the report upon the result of its investigation has been issued separately.

I wish to call attention also to the appendix to the superintendent's report in which is reproduced a description of the Heskett-Moore process for treating ferruginous ore for the manufacture of iron and steel. It is a most interesting paper, in which is explained the process for the direct conversion of iron ore into malleable iron or steel, and thus rendering unnecessary the intermediate process of pig iron.

FORESTRY.

The reports of the superintendent of forestry and of the officers working under his direction, will be found under Part IX. of the general report.

The result of the past year's operations would appear to have been most gratifying. The various branches of this service have now been established on a satisfactory basis.

The Act that was passed at the last session of parliament establishing permanent forest reserves, will somewhat enlarge the scope of the forestry branch, inasmuch as it provides that the fish and game within these reserves shall be looked after by that branch. While it may be necessary to frame some new regulations with regard to

these particular subjects, it is not proposed to make any change in the general mode of operation of this service, as at present organized.

Detailed statements and full particulars with regard to tree-planting, forest protection, and the fire-guarding service, will be found in the reports of the various officers who are charged with these particular duties.

I have the honour to be, sir,
Your obedient servant,

W. W. CORY,
Deputy Minister of the Interior.

PART I

DOMINION LANDS

No. 1.

REPORT OF THE COMMISSIONER.

DEPARTMENT OF THE INTERIOR,
OTTAWA, September 29, 1905.

W. W. CORY, Esq.,
Deputy Minister of the Interior,
Ottawa.

SIR,—I beg to submit my report for the year ending June 30, 1906, on the Dominion Lands Branch of this department, together with the reports of the Inspector of Dominion Lands Agencies and the agents of Dominion lands for the several districts.

STATEMENT OF WORK.

	1899.	1900.	1901.	1902.	1903.	1904.	1905.	1906.
Files dealt with	24,611	26,527	31,153	35,877	54,784	76,426	90,474	116,338
Correspondence—								
Letters sent	16,284	18,897	21,620	25,954	37,169	52,458	66,411	91,408

It will be observed that the volume of work has increased in a remarkable manner, and there is every prospect of it continuing to do so for some years to come. Some additions have been made to my staff in consequence, but in order to keep pace with the work more assistance will be required.

I have the honour to be, sir,
Your obedient servant,

J. W. GREENWAY,
Commissioner of Dominion Lands.

No. 2.

REPORT OF INSPECTOR OF DOMINION LANDS AGENCIES.

DEPARTMENT OF THE INTERIOR,
OFFICE OF INSPECTOR OF DOMINION LANDS AGENCIES,
BRANDON, August 21, 1906.

J. W. GREENWAY, Esq.,
Commissioner of Dominion Lands,
Ottawa, Ont.

SIR,—I beg to submit my report for the departmental year ending June 30, 1906.

I am pleased to be able to report that the past year has, in respect to progress, development and general prosperity, been the banner year for the Canadian west. In the matter of homesteading and settling upon the lands, this also applies. The new settlers, too, are of the enterprising, industrious class, and are fast converting the bald prairies into waving grain fields and thrifty well-stocked farms. Land values have advanced materially, especially in newly settled districts and along the lines of railway. Work in most all the lands offices has increased rapidly; some offices showing an increase of over 50 per cent upon the business transacted the previous year. Regina office made a new record, when 1,796 homestead entries were granted in June. Battleford office had granted 1,615 entries in April. When it is remembered that for the year ending June 30, 1896, just ten years ago, the total homestead entries for the year granted in Manitoba, the Northwest Territories and British Columbia only amounted to 1,857, some idea can be gained of the rate of business increase.

The increase in homestead entries over 1904-5 amounts to..	11,015
The increase in applications for patent over 1904-5 amounts to..	3,476
The increase in cancellations of land entries over 1904-5 amounts to..	3,428
The increase in letters received at local offices over 1904-5 amounts to..	99,836
The increase in letters sent out by local offices over 1904-5 amounts to..	79,469
The increase in homestead inspections made over 1904-5 amounts to..	22,800

SPECIAL INSPECTION WORK.

Special inspection of all unpatented homesteads entered for prior to September 1, 1905, was undertaken in April last, in the Alameda, Battleford, Regina and Yorkton land districts, with a view to cancelling summarily all entries which had stood for one year and over, where no improvements had been made upon the homestead, and no residence performed, in order that the land should be made available for re-entry. This entailed an enormous amount of work for the homestead inspectors, and much additional work for the land offices affected. It has, however, made available for re-entry many desirable quarter sections, and cleared up most effectually any homestead blanketing which had been attempted. This work was not completed at the close of the fiscal year, but at that time the following work had been accomplished:—

	Inspections Reported.	Summary Cancellations made.
Alameda district	1,516	42
Battleford district	1,259	60
Regina district	8,469	397
Yorkton district	4,590	386
Total	15,834	885

SALE OF STOCK WATERING RESERVES.

In June last I held six sales by public auction of stock watering reserve lands. Those sales were well attended, and the prices ranged from $3 to $16.50 per acre. The following is a list of the places at which sales were held, with dates, numbers of parcels sold, number of acres sold and the price realized:—

	Parcels sold.	Acres sold.	Prices realized.
			$ cts.
Calgary, June 1	11	1,539	9,768 00
High River, " 4	57	7,524.17	44,186 58
Pincher Creek, " 6	38	4,661.64	18,511 85
Macleod, " 8	36	4,010.85	19,293 35
Lethbridge, " 11	18	1,774.25	5,384 40
Medicine Hat, " 13	3	476	1,508 00
Total	163	19,985.91	98,652 18

ROCKY MOUNTAINS PARKS.

The tourists and visitors to the parks are coming in increasing numbers, so much so that the present hotel accommodation is quite inadequate. Increased accommodation is required at the government baths. The government roads out from Banff, Laggan and Field are very popular. The completion of the waterworks system now under construction at Banff will be a great boon. The buffalo herd is doing well, and increasing rapidly. The completion of the bridle trail to the 'Caves' in Cougar mountain will make that an interesting point for mountain tourists.

My duties being spread over the four western provinces, and very close and constant supervision being required, have entailed a great amount of travel, a statement of which is as follows:—

	Miles by rail.	Miles driven.	Total.
July, 1905	2,745	100	2,845
August, "	1,889	60	1,949
September, "	2,509	80	2,589
October, "	3,210	75	3,285
November, "	2,871	90	2,961
December, "	2,599	65	2,664
January, 1906	4,990	20	5,010
February, "	120	.....	120
March, "	6,408	20	6,428
April, "	3,057	22	3,079
May, "	4,651	55	4,706
June, "	2,829	75	2,904
Total	37,878	662	38,540

Statement 'A' attached hereto shows the principal transactions for the year by the Dominion lands agents.

Statement 'B,' a list of sub-agents and a statement of the principal work performed by them.

Statement 'C,' a list of the homestead inspectors, and a statement of the principal work performed by them.

Your obedient servant,

R. E. A. LEECH,
Inspector of Dominion Lands Agencies.

No. 3.

REPORT OF THE AGENT AT ALAMEDA.

DEPARTMENT OF THE INTERIOR,
DOMINION LANDS AND CROWN TIMBER OFFICE,
ALAMEDA, SASK., July 19, 1906.

The Commissioner of Dominion Lands,
Ottawa, Ont.

SIR,—I have the honour to submit the annual report of this office for the year ending June 30, 1906.

The crop of last year was even better than anticipated, as wheat averaged 25 bushels per acre and graded No. 1 Northern. The crop outlook so far this year is excellent. No damage of any kind has been reported.

The majority of the settlers taking up homesteads in this district this year are Canadian and American. There has been a noticeable increase of settlers from Great Britain.

So great has been the demand for homesteads that it was found necessary, last year, to survey a number of townships west of the Soo line, and homesteads are now being taken up as far west as Willow Bunch, where there is an old half-breed settlement.

Owing to the instructions asking for a general inspection of all the homesteads in the district, lists were prepared of all entries granted up to September 1, 1905, except lands patented or lands on which the file showed the duties were being performed. Three homestead inspectors have been employed on this work for the last three months, and up to the present time 1,771 reports have been received, and I am pleased to say that out of this number only 46 have been summarily cancelled, and not one case of a 'blanketed' homestead has been reported. These special inspections, together with the large increase in the general routine work, made it impossible to cope with the work during the regular office hours, so that much overtime has been put in by each member of the staff.

Mr. H. P. Gibson, who for some years has been senior assistant in this office, found it necessary to resign, owing to ill health. This gentleman was a most efficient and painstaking officer. Mr. R. G. Evans has been added to the staff as temporary clerk.

The number of homestead entries granted during the fiscal year was 2,371, an increase of 715 over the previous year.

Appended is a statement of work performed during the fiscal year.

Letters received		19,010
Letters written		17,304
Patents recommended		1,072
Entries cancelled		783
Homestead entries		2,371
Land sales		25

Timber permits issued		201
Timber seizures		2
Hay permits issued		119
Grazing rents		2
Mining fees		17
Seed grain collections		11
Total revenue		$30,520.27

Your obedient servant,

R. CLAUD KISBEY,
Agent of Dominion Lands.

No. 4.

REPORT OF THE AGENT AT BATTLEFORD.

DEPARTMENT OF THE INTERIOR,
DOMINION LANDS AND CROWN TIMBER OFFICE,
BATTLEFORD, August 2, 1906.

The Commissioner of Dominion Lands,
Ottawa, Ont.

SIR,—I have the honour to submit my report for this agency for the year ended June 30, 1906.

The year just ended shows a very material increase in the number of homestead entries made, as seen below:—

1904-5.		1905-6.	
Homestead entries.	3,618	Homestead entries.	7,873
Total revenue. . .	$38,752	Total revenue. . .	$80,263

Ever since the opening of spring large numbers of settlers have been daily passing through this place on the way to their homesteads, most of them being largely composed of Canadians and Americans, and many having their complete outfits of horses and agricultural implements. The German colony to the south is also being added to steadily.

The prosperity reported last year still continues. This season so far has been most favourable for the crops, rain having been abundant throughout the district with the exception of the Tramping Lake region, where a deficiency is reported, but not sufficient to cause serious injury. No damage has been done by hail so far.

Last year's grain crop was disposed of at high prices by the farmers. On the other hand the price of beef stock for export was low, and not many were shipped, but the local demand caused by railway construction and incoming settlers made up for this.

The following is a statement of the work performed during the past year:—

Homestead entries	7,873
Land scrips located	243
Land sales	15
Townsite sales	30
Timber permits issued	149
Hay permits issued	62
Applications for homestead patent	113
Homestead entries cancelled	1,657
Letters received	35,393
Letters written	29,576

Your obedient servant,

L. P. O. NOEL,
Agent of Dominion Lands.

No. 5.

REPORT OF THE AGENT AT BRANDON.

DEPARTMENT OF THE INTERIOR,
DOMINION LANDS OFFICE,
BRANDON, MAN., August 15, 1906.

The Commissioner of Dominion Lands,
Ottawa, Ont.

SIR,—In forwarding the annual report for the year ending June 30, 1906, I beg to say the prosperity of the country is steadily increasing, and this will be one of the best years the country has experienced. The acreage in crop is much larger than last. The farmers are going into the different grains and roots, instead of wheat raising exclusively as in former years. Everything has been most favourable; the early spring allowed the getting in of the grain in the proper time; then the rains of May and June made the growth strong and rapid, and there is every prospect of a bountiful and early harvest.

Great attention is being paid to stock raising, many of the farmers importing the best breeds of horses, cattle, sheep and swine. In horses the Clyde seems to have the preference; among the cattle, you will find the Polled Angus, Herefords, Galloways, Shorthorns, Holsteins, Ayrshires and Jerseys; in the sheep, the Shropshires, Cotswolds and Leicesters, with the Tamworths and Berkshires in the swine.

The demand for land increases rapidly. Purchasers come from all parts. The lands held for homesteading are being rapidly taken up by a class of men who make good settlers and intend making Manitoba and the Northwest their homes.

The number of homestead entries granted in this agency keeps decreasing yearly, as with the exception of a few scattered quarters, there is nothing to be obtained, and it is only through the cancellation of an existing entry that a homestead of any value can be secured. The cancellations grow less, the homesteader, being anxious to hold his land, makes every effort to fulfil the required duties, so the number of entries cancelled each year keeps decreasing, showing the advancement of the country.

Each year brings a large immigration apparently of a better class than the previous one; fewer complaints are received, and there is no lack of work for all farm hands and mechanics. The immigration hall here is a great convenience to the newcomers, and gives them comfortable quarters until they obtain work. So far the demand from the farmer is larger than the supply.

The following is a statement of the work performed during the year ending June 30, last:—

Homestead entries granted	162
Applications for patents received	637
Cancellation of entries	119
Letters received	11,504
Letters sent	10,357

I am, sir,
Your obedient servant,

L. J. CLEMENT,
Agent of Dominion Lands.

No. 6.

REPORT OF THE AGENT AT CALGARY.

DEPARTMENT OF THE INTERIOR,
DOMINION LANDS AND CROWN TIMBER OFFICE,
CALGARY, July 10, 1906.

The Commissioner of Dominion Lands,
Ottawa, Ont.

SIR,—I have the honour to submit my report of the work performed in this office during the year ended June 30, 1906.

The number of homestead entries, 2,082, is a decrease from the previous year of 99. This I attribute to the fact that during the present year settlers have had to go 45 to 50 miles from the railway to obtain entries.

The revenue from lands amounts to $83,395.21, exclusive of a very large amount paid at head office on account of sales of lands, coal lands, grazing leases, &c., being an increase of $43,603.82 over the revenue of the previous year.

As the business for the timber and mines branch for this district is also conducted at this office, I may mention that the revenue from this branch amounts to $17,738.33, which exceeds the amount for the previous year by $5,940.36. A separate report in connection with the timber and mines branch is being prepared.

The crops never looked better in the history of this country.

The winter was a very good one and stock wintered well on the ranges.

The price of cattle is very low at present, principally on account of the large ranchers being forced to sell owing to lack of range where they have been located for years.

Horses have never been a better price for many years.

The settlers throughout Alberta appear to be doing well and are perfectly satisfied and contented. The city of Calgary is forging ahead at a very rapid pace, and has now a population of about 18,000 people.

The number of people accommodated at the immigration hall here during the year is, according to the report furnished by Mr. James Winn, caretaker, 1,203, but this does not give any adequate idea of the number of people who came into the country. Settlement this season has directed itself northeasterly from Calgary in the Knee Hill country, and directly north of same to township 34, as far east as the Red Deer river, also west of the fifth meridian, townships 30-34, ranges 5 and 6. The immigration into the whole of Alberta has been very large, and the settlers of an excellent class.

I append hereto a detailed statement of receipts on account of Dominion lands.

Attached hereto also find statement of work performed at this office.

Although there has been a slight decrease in the number of entries there has been a very large increase in the number of letters received and written; also applications for patent, timber permits issued, &c.

I have the honour to be, sir,
Your obedient servant,

J. R. SUTHERLAND,
Agent of Dominion Lands.

CALGARY DOMINION LANDS AGENCY.

Statement of receipts on account of Dominion lands, for the year ending June 30, 1906.

Homestead entries	$20,565 00
Payments on account of improvements	3,283 83
Land sales	59,217 53
Sundry payments	23 35
Seed grain collections	305 50
Total	$83,395 21

No. 7.

REPORT OF THE AGENT AT DAUPHIN.

DOMINION LANDS OFFICE,
DAUPHIN, MAN., June 30, 1906.

The Commissioner of Dominion Lands,
Ottawa, Ont.

SIR,—I have the honour to submit the annual report for the Dauphin land district, for the year ending this day.

General prosperity has been enjoyed throughout the district during the year, marked improvement is noticeable in the towns and villages, as well as in the farming districts, business in all lines has been brisk and many new establishments have opened up.

The crops last year were good, and prices fair, not less than 1,200,000 bushels of wheat having been shipped out, and a very considerable quantity manufactured in the local mills; the grades were Nos. 2 and 3 Northern.

Coarse grains were grown to a considerable extent more than in the past, and found a ready market for local consumption, being in strong demand for the railway construction and lumbering camps throughout the district.

Considerable attention was paid to mixed farming, though more sheep and hogs could well be carried; and some creameries were established, all of which are doing good business. Industries under this heading could be profitably increased, and will, no doubt, as more lands are cleared.

A number of well-bred stud animals were brought in, and the improvement of stock is marked.

All farm produce has commanded fair prices, the demand being in excess of the supply.

Great improvement has been made in the roads, grading and new bridges having been built, each municipality doing what its means would warrant on these lines, and as all the settled parts of the district are now organized, these works are spread over a large area. Taxes, though somewhat high, were well met.

Settlers have come to us in large numbers, as homesteaders, as well as buyers of wild and improved lands, many transactions in sales having been carried through, some at high values, $19,000 having been paid for a half-section some 3 miles from Dauphin.

The district to the east of Lake Dauphin has been settled to a considerable extent, owing no doubt to the fact that a branch of the Canadian Northern Railway is shortly looked for, and there is still much good land in that locality for settlement.

Lumbering operations during the past winter were carried on with the usual vigour, though the early break of the roads somewhat curtailed the output, still the regular dealers were successful in taking out average stocks; a very large amount of lumber was taken out on settlers' permits, and close supervision was kept on all operations by the officers of the department, so far as possible. I would suggest that more attention should be paid to such matters, with a view to protecting the timber, which is being cut off at a very rapid rate, and enforcing rigid economy in the manufacture of trees cut, this among irresponsible operators of portable mills evidently not being considered necessary.

The demand for farm labour has been met locally, and owing to the presence of a large number of Galicians, these conditions will most likely obtain for some time; so far there has not been any necessity of bringing in help, though many young men, principally from Great Britain, have secured places with farmers, where they can learn the methods in vogue, preparatory to making a start for themselves.

Railway service has improved to a marked extent, though no new branches have been built, and as a consequence postal facilities have increased.

The general health of the district has been good, no epidemic having visited us, and the various hospitals have been well able to cope with all demands made on them.

I attach a statement of some of the principal items of work, transacted in this office, which compares favourably with former ones.

I am, sir,
Your obedient servant,

F. K. HERCHMER,
Agent of Dominion Lands.

Statement of work in the Dauphin office during year ending June 30, 1906.

Homestead entries granted	621
Homestead entries cancelled	222
Improvement collections	24
Timber permits issued	1,386
Hay permits issued	131
Timber seizures	32
Mining locations granted	4
Seed grain collections	27
Letters received	7,725
Letters written	5,248
Applications for patent received	268
Number of staff	2
Cash received for Dominion lands account	$8,631 20
Cash received for timber and mines	$11,702 38
Cash received for miscellaneous	$ 767 58
Total cash received	$21,101 16

No. 8.

REPORT OF THE AGENT AT EDMONTON.

Department of the Interior,
Dominion Lands Office,
Edmonton, Alberta, July 2, 1906.

The Commissioner of Dominion Lands,
Ottawa, Ont.

Sir,—I have the honour to submit the annual report of this office for the year ending June 30, 1906.

The city of Edmonton and the whole district are most prosperous. The crop outlook is excellent. The changing of the homestead and timber regulations from time to time to meet the changed conditions is proving very beneficial to the country and the bona fide settlers. The statement given below (taken at random from the weekly returns of homestead entries of this office), shows that the west is getting the very cream of the world's immigration.

Number and nationality of homesteaders making entry during the week ending April 15, 1906:—

Canadians	42
English	37
Americans	35
Norwegians	15
Scotch	14
Austrians	10
Irish	8
Swedes	7
Germans	5
Welsh	1
Russian	1
Total	175

One hundred and four of these are actual farmers.

The country to the north and west of Edmonton, which can easily absorb 2,000,000 people and has not as yet 2,000 people in it, stands waiting for settlers.

The active and successful immigration work of the past few years should be continued for years to come. More surveys are required. The great Peace River country and the McKenzie River basin will prove to be the '2nd last west.'

The necessity for, and establishment of, new sub-agencies at Daysland, Vegreville, Whitford, Saddle Lake, Lac Ste. Anne, Pembina River, Edison and Athabaska Landing show the great expansion of settlement.

The returns given below speak for the rapid progress and prosperity of the district:—

HOMESTEAD ENTRIES AND REVENUE.

	Entries.	Revenue.
1903-4	2,584	$41,816 38
1904-5	2,903	43,682 36
1905-6	4,601	70,984 81

SUMMARY OF ACTUAL BUSINESS DONE.

Letters received	26,978
Letters sent	24,664
Applications for patent	1,384
Homestead entries cancelled	1,302
Hay permits issued	84
Timber permits issued	1,393
Homestead entries granted	4,601
Land scrips located	97
Revenue	$70,984 81

Your obedient servant,

A. G. HARRISON,
Agent of Dominion Lands.

No. 9.

REPORT OF THE AGENT AT KAMLOOPS.

DEPARTMENT OF THE INTERIOR,
DOMINION LANDS OFFICE,
KAMLOOPS, B.C., July 2, 1906.

The Commissioner of Dominion Lands,
Ottawa, Ont.

SIR,—I have the honour to submit the annual report of this office for the year ending June 30, 1906.

The revenue collected at the office is practically the same as during the previous year, but if the collections at the head office be taken into consideration there is an increase of fully 50 per cent.

A number of settlers have squatted upon unsurveyed lands in townships 17, 18 and 19, range 17, west sixth meridian. The prompt action of the department in having the land surveyed will enable their claims to be adjusted in the near future. The prospects for an abundant harvest are bright. The snowfall during the past winter

was light, and many feared a light crop in consequence. Rain, however, in abundance came to the rescue and a good crop is now assured.

The following is a summary of the work done during the year:—

Letters received	5,800
Letters sent	4,007
Homestead entries granted	79
Homestead entries cancelled	42
Applications for patent received	47
Number of acres sold	3,287
Revenue collected	$17,818.05

All of which is respectfully submitted.

Your obedient servant,

JAMES BANNERMAN,
Agent of Dominion Lands.

No. 10.

REPORT OF THE AGENT AT LETHBRIDGE.

DEPARTMENT OF THE INTERIOR,
DOMINION LANDS AND CROWN TIMBER OFFICE,
LETHBRIDGE, ALTA., July 10, 1906.

The Commissioner of Dominion Lands,
Ottawa, Ont.

SIR,—I have the honour to submit for your consideration this office annual report for the year ending June 30, 1906.

I have much pleasure in stating that the prosperity of Southern Alberta is continuing and settlers in this part of the province have great faith in its future possibilities. Crops are at present looking well, due to the splendid rains during May and June, and the yield this year should be large. There is a much larger area of land under cultivation this season than ever before. This year's hay crop seems to be plentiful.

Settlement is reaching out in every direction, and one of the requirements to complete the settlement in the west is more railways.

Large tracts of lands have been purchased throughout this district from the railway and irrigation companies, and the purchasers seem to have little difficulty in disposing of same to intending settlers. A large percentage of the settlers locating in Southern Alberta are actual farmers from the United States, and should make a success of farming in this country.

Fruit growing should develop into one of the industries of this part of Alberta and at present small fruits are grown with success.

While the homestead entries for the Lethbridge agency are not quite as numerous as last year, the work of the office has increased materially and has been disposed of satisfactorily, although additional office accommodation is very necessary.

The entries of homesteaders who are not performing their duties are being cancelled in large numbers, after the entrant has been given plenty of time to defend himself, if he desires. These lands are rapidly taken up by people on the ground who desire homesteads in suitable localities.

The revenue of the timber and mines branch, as well as the land branch has increased. As a great deal of the timber business for this district is transacted through

the Calgary office, the revenue of the branch here is much smaller than it would be were the business pertaining to same done here. A very large percentage of the grazing rental is paid direct to the department, and therefore the amounts do not appear in my returns.

The staff of this office has worked faithfully, and is deserving of favourable mention.

Below is submitted a partial list of work performed during the past year:—

Letters received	23,290
Letters written	19,370
Homestead entries granted	1,751
Homestead entries cancelled	900
Applications for patent received	598

Your obedient servant,

J. W. MARTIN,
Agent of Dominion Lands.

No. 11.

REPORT OF THE AGENT AT MINNEDOSA.

DEPARTMENT OF THE INTERIOR,
DOMINION LANDS OFFICE,
MINNEDOSA, July 3, 1906.

The Commissioner of Dominion Lands,
Ottawa, Ont.

SIR,—I have the honour to submit my report of the work performed in this office during the year ending June 30, last.

Homestead entries granted	259
Letters received	5,073
Letters sent	3,595
Applications for patent received	204
Hay permits issued	155
Timber permits issued	224

From the above it will be seen that the homestead entries granted in this district during the past year are in excess of those granted during the previous year, and that the ordinary work of the office is much the same as in previous years. This being one of the smallest and oldest settled districts, the number of homesteads available for entry is small as compared with the newer and larger districts further west, and although we have had numerous inquiries for homesteads the greater number of those making such inquiries have gone to those districts where larger areas of homestead lands are available and open for settlement.

The crops last year were good and the prospects for similar or better and larger crops this year most promising. The pasturage too is excellent, and those who raise cattle will benefit largely thereby. Indeed a wave of prosperity is sweeping over the country and many of the older settlers who bravely faced the trials and privations incident to the early settlement of the country are now reaping a rich and well-deserved reward.

One of the strongest evidences of this prosperity is the rapid increase in the value of land. A few years ago purchasers were scarce, but now investors are anxious to obtain lands at prices which a few years ago would have been considered as fabulous.

Your obedient servant,

JOHN FLESHER,
Agent of Dominion Lands.

No. 12.

REPORT OF THE AGENT AT NEW WESTMINSTER.

Department of the Interior,
Dominion Lands Office,
New Westminster, B.C., July 3, 1906.

The Commissioner of Dominion Lands,
Ottawa, Ont.

Sir,—In accordance with the departmental instructions, I have the honour to submit the report of the transactions of this office for the year ended June 30, 1906.

As a preliminary statement, permit me to recall the fact that the Dominion lands office in British Columbia was opened very soon after the passing by the British Columbia legislature, on December 19, 1883, of the 'Settlement Act' so called; and that although surveys in the Dominion belt have been vigorously prosecuted ever since, yet, owing to the rugged character of much of the belt, many gaps were continuously calling for delayed work.

Smaller settlements could not be overtaken in isolated localities until after the chief governing lines were first laid down. Contact with provincial surveys of the early days required careful handling. As a consequence, the granting of entries, and the closing up of transactions needed patience on the part of the people on the lands, as well as the officials administering.

In the spring of 1890, the office at Kamloops was opened, and relieved the pressure of correspondence as to the eastern part of the belt, and operations followed surveys. Now, however, several cases of long waiting can be adjusted, as other business permits, and some progress was made in this respect during the year that has closed. Many others are ripening for disposal at an early date.

To go into details on my part would be lengthy, but I may express what is generally recognized, that I am the only one left in British Columbia in connection with these offices from the opening, in 1883. I have been familiar with nearly all of the old field notes of lands dealt with before the transfer of the belt to the Dominion and with the history of the belt since that time. It is, therefore, impossible that I can escape numerous inquiries as to matters of surveys and transactions, and equally impossible for me to evade response. I am satisfied, however, that this part of my work has been good service, averting many disputes and causes of dissatisfaction. The actual numbers of book entries of finished transactions form no criterion of the extent of the duties overtaken here. I may venture to say that much of this is true of the office at Kamloops as well. I have good reason to feel that the district is developing in a healthful manner in the increase of settled areas, and the comfort of the people.

There is one great desideratum—the dyking of the Sumas valley. As it is, the New Westminster district is badly cut in two portions. The dyking of that land would mean accelerated progress for the whole district.

A summary of the monthly schedules sent to your office shows:—

Letters received	2,068
Letters sent, besides circulars	1,890
Homestead entries	29
Applications for patent—	
(*a*) Recommended	5
(*b*) Waiting for inspections	13
Entries cancelled	5
Total receipts	$2,707.42
Total contingent expenditure	$196.20

Respectfully submitted,

JOHN McKENZIE,
Agent of Dominion Lands.

No. 13.

REPORT OF THE AGENT AT PRINCE ALBERT.

DOMINION LANDS OFFICE,
PRINCE ALBERT, July 4, 1906.

The Commissioner of Dominion Lands,
Ottawa, Ont.

SIR,—I beg to submit the report of this agency for the fiscal year ending June 30, 1906. The revenue from all sources was $45,819.77, being an increase over last year of $1,591.21.

The number of homestead entries for the year shows a decrease of 250 as compared with the previous year, but this is owing to the fact that the bulk of the surveyed land of this agency is now taken up. The year just closed has been a very prosperous one, and the development of all branches of industry in this district has been phenomenal. The bountiful harvest of last year, together with the high prices ruling for wheat has had its effect, and this, together with the large influx of desirable settlers, and with the vast sums expended by the different railway systems in pushing lines through the country, have given an impetus to all branches of trade beyond the hopes of the most sanguine, and I see no reason why this prosperity should not continue, as the reports from all sections of this district of the present crop prospects are the most favourable in the history of the country, and capital is steadily coming in from outside countries for the purpose of developing all natural resources, which are varied and many. I am pleased to report an increased demand for scrub land, as the settlers are beginning to realize that this land when once cleared is practically inexhaustible, and as we have a very large extent of this class of country to the north and northeast of this city a portion of which is now being surveyed, I look for a very considerable influx of settlers this coming season to fill up these lands. It was thought until just recently that the north Saskatchewan river formed the northern boundary of the arable land, but the settlements of Sturgeon Lake and Shellbrooke have proven this estimate of the capacity of this northern country to be entirely wrong, and I am of opinion that at least 5,000 settlers can be placed to the north and east of this point. The completion of the Canadian Northern Railway has marked a new era in the history of this

city and district, and has filled a long-felt want of the settlements of the famous Carrot River valley to the south and east of us, and as we now have two great railway systems competing for trade, the settlers are bound to reap the benefit. The following figures represent the work done at this office during the year, and in closing I beg to express my appreciation of the efficient work done by the staff under my charge.

Total revenue, including the timber and mines branch	$45,819.77
Applications for patent	627
Hay permits	69
Timber permits	1,352
Homestead entries granted	1,888
Homestead entries cancelled	747
Letters received	11,474
Letters sent	11,548

Your obedient servant,

R. S. COOK,
Agent of Dominion Lands.

DOMINION LANDS OFFICE,
PRINCE ALBERT, July 4, 1906.

R. S. COOK,
Agent of Dominion Lands.

No. 14.

REPORT OF THE AGENT AT RED DEER.

DEPARTMENT OF THE INTERIOR,
DOMINION LANDS AND CROWN TIMBER OFFICE,
RED DEER, July 14, 1906.

The Commissioner of Dominion Lands,
Ottawa, Ont.

SIR,—I have the honour to submit my annual report for the year ending the 30th ulto. Since my last report this district has made prodigious progress in every respect. The influx of settlers has been largely in excess of any previous year, and the standard of excellence of the immigrant, for which this district is justly noted, has been maintained. The large majority of settlers coming to this district during the past, as in previous years, are from the United States, who bring with them not only valuable experience, but ample means to commence farming operations on a scale superior even to those employed in older communities.

The yield from all cereals was very satisfactory, and especially that of winter wheat, which in many cases went as high as 55 bushels to the acre, of excellent quality. This wheat found a ready sale in the home market at prices ranging from $1 to $1.30 per bushel, and was used for seeding purposes. About 50 per cent more ground was sown to winter wheat last season than the previous one, and a fair average yield is confidently anticipated, although much of it was winter-killed, especially on high ground, owing to lack of covering, there being very little snow last winter.

The cut-worm has done considerable damage through this district this year, more especially in gardens. In some cases, however, I have been told that it has laid waste whole fields of early grain, especially barley. There is, however, an antidote for this pest, as where a mixture of bran, Paris green and molasses has been judiciously applied, comparatively little or no damage has been done by them.

Owing to extremely dry weather in the early spring, forest fires were very prevalent, and did much damage; many farm-houses, barns, much fencing, and a large quantity of hay, which had been kept over, being destroyed; much valuable timber was also consumed, and the pity of it is that many of these fires, from all I can learn, were started through pure carelessness. The cattle industry throughout this district during the past season has been very satisfactory, and although much of the range lands were burnt over in the spring, there will be no scarcity of feed, and an ample crop of hay is assured, owing to frequent and copious rains during the summer. Large numbers of fruit trees have been set out during the past two years, and last year Mr. Guissinger, living about 12 miles east of Red Deer, had five apple trees, out of eight planted, bearing fruit, and he informs me that the eight trees are covered with fruit this year. I may say that these are standard apple trees.

A flour mill, with a capacity of 150 barrels a day, has been built in Red Deer since my last report. It has been running steadily every day since early spring, and as the company buy all good wheat offered for sale, paying the highest market price, the farmers are encouraged to raise more wheat, and find the mill a great convenience in other respects. The creameries throughout the district are well patronized, and are kept running to their full capacity, several new ones being built since my last report.

The following statement shows the business transacted in the office during the year:—

	Number.	Revenue.
Homestead entries	3,859	$38,525 00
Cancellations	815	
Improvements	112	3,033 75
Land sales	26	1,746 09
Sundries	....	90 00
Timber permits	481	229 26
Timber seizures	3	105 40
Hay permits	33	258 80
Grazing	13	148 58
Coal lands	....	249 20
Revenue from sale of Indian lands	....	3,265 57
Total revenue		$47,651 65
Letters received		16,180
Letters written		13,775
Applications for patent		616
Entries cancelled		924

I am, sir,
Your obedient servant,

W. H. COTTINGHAM,
Agent of Dominion Lands.

No. 15.

REPORT OF THE AGENT AT REGINA.

DEPARTMENT OF THE INTERIOR,
DOMINION LANDS AND CROWN TIMBER OFFICE,
REGINA, SASK., August 21, 1906.

The Commissioner of Dominion Lands,
Ottawa, Ont.

SIR,—I have the honour to submit my report for the year ending June 30, 1906. Statement of work performed as follows:—

	Number.	Revenue.
Homestead entries	11,942	$118,800 00
Improvements	187	7,761 77
Land sales	225	16,777 47
Sundries	....	265 20
Timber permits	1,316	493 70
Timber seizures	4	14 55
Hay permits	290	771 20
Grazing rents	21	215 36
Mining fees	1	5 70
School lands sales	....	972 68
Seed grain collections	76	2,859 43
Total		$148,937 60

Letters received	74,938
Letters written	64,950
Applications for patent	1,948
Entries cancelled	4,191

The work done in this office during the past year shows an increase of nearly 50 per cent, and the staff have been kept busy night and day trying to cope with it.

The special work which has been performed by the homestead inspectors since April last, increased the work and kept three clerks busy attending to it alone.

The new regulations issued regarding inspections and homesteading in person, have proved very satisfactory and for the best interest of the country.

The crop prospects for this year were never better, and the season is about one month earlier than any other year.

Your obedient servant,

L. RANKIN,
Acting Agent of Dominion Lands.

No. 16.

REPORT OF THE AGENT AT WINNIPEG.

DEPARTMENT OF THE INTERIOR,
DOMINION LANDS AND CROWN TIMBER OFFICE,
WINNIPEG, September 1, 1906.

The Commissioner of Dominion Lands,
Ottawa, Ont.

SIR,—I have the honour to submit the annual report upon the business of the Dominion lands and Crown timber and mines offices of the department at Winnipeg for the twelve months ended June 30, 1906.

The total revenue from all sources amounted to $170,675.99, of which sum $55,330.50 was received from lands and $115,345.43 on account of timber, hay and mines.

LANDS BRANCH.

In no previous year has such demand been made on the office for general information from intending settlers seeking homestead land, and knowledge of the country in its different parts. Special attention was given to this work which proved of great advantage to these people, which was gratefully acknowledged by not a few. The three-sheet map issued by the department showing marked thereon the lands disposed of, and which indicates the trend settlement is taking was found a useful guide in connection with this work.

The number of homestead entries granted during the year was 761, a gain in number over the preceding year of nearly one hundred.

The lands remaining for disposal as homesteads in the Winnipeg district are almost wholly wooded and not of a class inviting to Canadians and settlers coming from Great Britain and the United States who prefer the open prairie land of the west.

The entrants for homesteads were, for the most part, natives of Austria (Galicians) and Scandinavia (Icelanders and Swedes). The Galicians and Swedes have proved themselves to be good pioneers, and where they possessed sufficient capital at the start to enable them to live upon their homesteads and employ their full time in making improvements thereon, excellent showing has been made.

For the most part, however, they are without the necessary capital to do this, and are obliged to find outside employment to support themselves and their families. While the homesteader is so engaged the family upon the homestead do more or less in making improvements thereon, which seldom goes beyond a garden patch and some fencing.

The work these men follow is chiefly at railway construction, and in the cities and towns as common labourers.

The life led in their wanderings has a tendency to unfit them for settling down upon their farms and making them a chief means of support.

The trend of settlement continues northward between Lakes Winnipeg and Manitoba, which district is being opened up in that direction by the extension of two branch lines of the Canadian Pacific Railway from Teulon and Winnipeg Beach, and the Canadian Northern Railway from Oak Point to Lily Bay. In the interests of settlement the surveys in this district should be extended northward between the two lakes to the Little Saskatchewan river. The tract also lying between Whitemouth station and the eastern boundary of the province traversed by the Canadian Pacific Railway, and that by the Grand Trunk Pacific should be subdivided and made available for settlement.

SQUATTING.

For some years past considerable difficulty has been met with over persons squatting upon lands in advance of survey, and upon those surveyed which are vested in the province and in the University of Manitoba. During the year steps were taken to secure to these persons their holdings. By an arrangement reached with the provincial government and the university council this has, to some extent, been accomplished, other land being accepted in exchange for those squatted upon. Squatting upon Dominion lands is not authorized by the department, and it should not be permitted to take place. When a squatter is allowed to remain upon lands not available for homesteading, and to get himself firmly established by improvements made thereon, action cannot be taken to dispossess him without inflicting a hardship. If the department was advised by its officers immediately squatting took place, and the case promptly investigated and action, when necessary, taken to force a removal, other means failing, it would be to the public interests and not bear heavily upon the squatter. At the present time there are a large number of cases to be dealt with of squatters upon valuable timber lands who have made substantial improvements thereon.

AGRICULTURAL ADVANCEMENT.

While it is too early to give accurate figures representing the grain crop for the present year, it is a known fact that it will bulk largely in excess of any previous year. From statistics published by the provincial government of Manitoba the area planted in grain was 4,803,630 acres, and under other crops 108,805 acres. The acreage exceeded that for 1905 by 655,856 acres. It is confidently expected by the best authorities that wheat will average nineteen bushels to the acre, which is a little under earlier expectation, the depreciation being caused by the occurrence of hot winds during the early part of August. Other cereals were also likewise affected, to what extent will not be known until threshing returns are received.

The following estimate for 1906 of the acreage in crop of under-mentioned cereals was prepared from information obtained from the Provincial Department of Agriculture, viz.:—

	Acres.
Wheat	3,141,537
Oats	1,155,961
Barley	474,242
Other areas under cultivation are:—	
Flax	18,700
Rye	4,195
Peas	2,559
Corn	6,246
Brome	23,864
Rye grass	13,251
Timothy	33,646

The dairy products of Manitoba for the year ending December, 1905, were:—

	Value.
Butter, 4,160,956 lbs.	$796,591 15
Cheese, 1,261,382 lbs.	127,346 49
Making a total value of	$896,937 64

No statistics are available since December, 1905.

The year's yield of potatoes up to that date was 4,759,646 bushels, the average yield per acre being 187 bushels.

For the same period the poultry disposed of by Manitoba farmers was: turkeys, 40,099 lbs.; geese, 60,759 lbs.; chickens, 521,325 lbs.

The average yield of the three principal cereals last year was: wheat, 21·07 bushels; oats, 42·6 bushels, and barley, 34·2 bushels.

The estimated amount expended in new farm buildings was $3,944,101, and the number of threshing outfits in operation in the province was 2,465.

No case of failure on the part of a homesteader in making a comfortable living in Manitoba has come to my notice. A general contentment prevails and property is gained very much in degree as it is worked for.

For a radius of 40 miles about Winnipeg the settlers find an active market in the city for the sale of dairy products, poultry, eggs, &c., and many take advantage of selling direct, avoiding the commission man, thereby obtaining a higher price for their goods.

MANITOBA AGRICULTURAL COLLEGE.

The Manitoba legislature passed an Act in the year 1903 for the establishment within the province of an agricultural college. A site was secured comprising 117 acres fronting on the south side of the Assiniboine river in the parish of St. James, acquired at a cost of $115,000.

The college buildings are handsome structures, built of brick and stone at a cost, with equipment, of about $300,000. The opening for practical use took place in the month of February last.

The course of study comes under the following heads:—

Agriculture.

Soil physics, soil cultivation, summer fallowing, soil fertility, plant growth, plant disease, crops, weeds, plant breeding and improvement and farm management.

Animal Husbandry.

Breeds, judging, breeding, feed and feeding, care and management.

Veterinary Science.

Anatomy, materia medica, pathology.

Farm Dairying.

Milk testing, care of milk and manufacture of butter and cheese.

The other subjects for study in all their phases are: Horticulture, farm forestry, entomology, poultry, farm machinery, farm mechanics, English and mathematics, economics of agriculture and parliamentary practice.

The college opened for a course of eight weeks in February last, with an attendance of twenty-six students. The formal opening is advertised to take place on November 6 next, when it is expected that seventy students will be enrolled. It is considered by the leading agriculturists that the government was wise in its choice of a principal for the college in the appointment of Mr. W. J. Black, late Provincial Deputy Minister of Agriculture.

TIMBER, GRAZING AND MINES.

It will be seen from statements 'A' and 'B,' appended, that the revenue for the year derived from timber, grazing, hay and mines, from this agency was $115,345.43, that from the same sources for the previous year was only $69,835.53. The increase came about through a greater number of timber berths being sold by tender, from which the department received $50,318.36 as against $8,817.31 for year ended June 30, 1905.

Statement 'B' gives the names of the holders of timber berths within the agency that are being operated upon, and the extent thereof based on the production at the mills.

LUMBER SALES.

Following the customary practice, I give herewith a statement of the lumber sales for the year within this agency, which includes all of Manitoba, and part of Saskatchewan. The figures were compiled from data furnished by the Department of Customs at Ottawa, as to importation of products from the United States, and from lumbermen, representing the different interests, and from the railway companies. Care was taken to insure correctness, and while the figures cannot be vouched for as an accurate showing, they are as close as it is possible to get them.

For the purpose of comparison is given also the amount of lumber sold during the preceding year.

From mills located in Ontario west of Lake Superior—

	1904-5. Ft. B.M.	1905-6. Ft. B.M.
Canadian logs	82,000,000	86,000,000
American logs	88,000,000	93,000,000
British Columbia—		
Manufactured	116,000,000	130,000,000
Dominion lands—		
License	40,385,368	50,755,905
Permit	16,500,000	18,000,000
	342,885,368	395,755,905
Sawn lumber imported from the United States	37,015,821	16,800,849
	379,901,189	412,556,754

It will be noted while a large increase in the sales is shown, that the importation of Ameriean lumber has fallen off upwards of 50 per cent.

Lumber prices to dealers were considerably higher this year, as indicated by the statement hereunder:—

	1905.	1906.
Pine and fir—		
Dimension lumber	$16 to $23	$20 to $26
Fir for interior finishing	$30 to $40	$30 to $40
Flooring, siding and ceiling	$25 to $30	$25 to $33
Ship lap and eommon boards	$18 to $21	$18 to $23
Spruce—		
Dimension	$16 to $18	$18 to $20
Siding, flooring, ceiling	$17 to $18	$20 to $22
Ship lap and common boards	$16 to $18	$17 to $20
Lath	$2.75 to $3.75	$3.25 to $4.25
Shingles	$2.00 to $2.50	$2.00 to $2.85

The rise in price was due to various causes, mainly to the large demand for railway construction material. Another influence was the marketing of a proportion of the cut of the coast mills at San Franeisco, whieh point was made temporarily a free port of entry, by the federal government at Washington, on aceount of the destruction caused to the city by earthquake. It may be pointed out also that the cost of production has inereased. Labour is higher and also equipment.

FUEL.

The figures given hereunder give approximately the sales of eoal to consumers in the provinees of Manitoba and Saskatchewan for the year ended June 30, 1905, and those of the year 1905-6.

	1904-5. Tons.	1905-6. Tons.
Ameriean anthraeite	54,000	58,000
" bituminous	11,000	60,000
Canadian anthracite	2,000	8,000
" bituminous (Galt)	70,000	66,000
" " (Tabor)	.....	27,000
" lignite	96,000	96,126
	233,000	315,126

Thc price at which sold was about the same through the two years, namely, $10.50 to $11 for anthracite, $7 to $8.50 for bituminous and $4 to $5 for lignite.

CORDWOOD.

The sales of cordwood fell short of last year by about 25,000 eords, the amount being estimated at 115,000 cords. This is accounted for by the faet that a number of the large eonsumers of fuel in Winnipeg during the year substituted eoal for cordwood for steam purposes.

The priee for eordwood fluetuates with the seasons, the average, however, has kept mueh the same in the last three years, $4.50 to $5 for poplar; $5.75 to $6.50, tamarac; $4.75 to $6, spruee, and $5 to $5.50 for jack pine.

During the year 19,815 cords of wood were brought in from the United States for the Winnipeg market. This amount is ineluded in the total, 115,000 cords, approximated to have been sold during the year.

There is an increasing demand to aequire rights to cut timber upon the public domain. The revenue paid in bonuses accepted with tenders by the department for

timber berths during the year in the Winnipeg district amounted to $50,318.36. It is not known to what extent that sum represents the true value of the standing timber acquired in their grants, a government estimate of the amount of timber in each case not having been obtained.

FOREST FIRES.

Fires during the year did much damage to the timber in different parts of the district, notably in the Turtle Mountain timber reserve, on the east shore of Lake Winnipeg, between Bad Throat river and Rice river, and north of the Saskatchewan river, in the neighbourhood of Nawew (Beaver) lake, and also Moose lake.

HAY.

The number of permits to cut hay upon Dominion lands and school lands exceeds that of the previous year. For season 1905 there were issued 646, and for the present year 664.

The amount of hay secured this year will approximate 16,000 tons.

Care is taken to see that hay cut under settlers' permits is all used in feeding their own stock, and that none of it is bartered or sold, the policy of the department in the distribution of the hay crop upon the lands of the Crown being to only authorize cutting to take place in each instance in extent to meet the actual requirements of the permittee.

The ruling trade price during the year for wild hay was $6.50 per ton and for timothy and cultivated grasses $10 to $11.

MINING.

During the year fourteen mining claims were recorded, of which six were iron, six gold and silver, one mica and one plumbago.

Free miners' certificates to the number of eighty-one were issued.

Considerable speculation exists as to the value of the country to be traversed by the extension of the Canadian Northern Railway from the Saskatchewan river to Fort Churchill. Several prospecting parties have been in the field, some of whom have returned, reporting having found nothing of sufficient value to warrant staking.

Those mines that are being held under certificate are only being developed to the extent required under the regulations to retain them in good standing.

GYPSUM.

The Manitoba Gypsum Company (Limited), owning extensive gypsum deposits at Lake St. Martin, secured from the government, have experienced a most successful year. They had the misfortune to lose their mill on Lake Manitoba by fire in the month of July. Notwithstanding, the output of plaster, finishing plaster and plaster of paris, exceeded that of the previous year by 6,000 tons.

In erecting new mills it was decided to place them in Winnipeg. Construction is being proceeded with, and by October will have been completed and the mill in operation. The mills will have a capacity of 200 to 250 tons of finished product in twenty-four hours. The selling price of hard wall plaster manufactured by this company marketed during the year was from $10 to $15 per ton, f.o.b. Winnipeg.

WATER-POWERS.

The various water-powers on the Winnipeg river, both developed and undeveloped, have attracted an unusual amount of attention recently. The practical completion of the magnificent works of the Winnipeg General Power Company, and the completion of their system of transmission to Winnipeg, have marked a notable era in power-

development. The entire street railway and electric light systems of the city are now being supplied from that source. The cost of construction and completion of this work is given as over $3,000,000. The citizens of Winnipeg, however, recently by an overwhelming vote declared in favour of a by-law authorizing the expenditure of some $3,000,000 in securing a city-owned power, either by construction or by purchase. After elaborate surveys and investigations the engineers engaged by the city recommended the Point du Bois falls as the one most suitable and available. Other power proposals which have kept themselves prominently before the public during the past year are the Silver Falls and Great Falls Power Companies, while others of more or less importance are talked of or projected. With cheap power and ample supply to meet all demands brought to Winnipeg it would quickly take a place among the cities of Canada as a manufacturing centre.

RAILWAYS.

Possibly in no province in the Dominion has railway construction been so extensively carried on as in the province of Manitoba during the past few years.

The Grand Trunk Pacific Railway has under construction from Winnipeg to the western boundary of the province, 215 miles which it is expected will be completed early in next year. Mr. J. D. McArthur, under contract with the federal government, is pushing the construction of the line from Winnipeg eastward to the boundary of Ontario, a distance of about 75 miles. A full force is at present engaged on the work, and it is confidently expected that the line will be finished during the coming year.

The Midland Railway is building from the international boundary line to Morden, a distance of 15 miles; from Gretna to Portage la Prairie, 85 miles, and from the international boundary to Brandon, a distance of 100 miles. These lines, it is stated, will be completed also in the year 1907.

The Canadian Pacific Railway Company report that their work of construction during the year is composed of the Lauder extension, 20 miles; the Reston extension towards Wolseley, 18 miles; the Winnipeg Beach extension to Gimli, 9·1 miles; the extension of the Teulon branch north, about 20 miles; the cut-off from Winnipeg to Molson, 36 miles; and the double tracking of the main line east from Molson to the Ontario boundary, 56 miles, a total of 159·1 miles.

The Canadian Northern Railway has also had a busy year in railway construction, as is shown from the following list furnished by the resident engineer:—

Ridgeville branch	47·49
Dundee branch	18·37
Lines connecting Oak Point branch with Winnipeg	7
Carman branch	78·59
De Lourdes spur	2·64
Carberry-Brandon branch	25·57
Brandon-Regina	10
Virden	37·46
Rossburn	53
Oakland	40

From this showing it will be seen that no less than 969·13 miles of railway will have been constructed in the province during the years 1905 and 1906.

Respectfully submitted,

E. F. STEPHENSON,
Agent of Dominion Lands.

REPORT OF THE AGENT AT YORKTON.

No. 17.

DEPARTMENT OF THE INTERIOR,
DOMINION LANDS AND CROWN TIMBER OFFICE,
YORKTON, July 17, 1906.

The Commissioner of Dominion Lands,
Ottawa, Ont.

SIR,—I beg to submit for your consideration the annual report of this office for the year ending the 30th ultimo.

The number of homestead entries granted for the year was 4,161, a decrease of 310. The nationality of the homesteaders was largely English-speaking.

During the year four homestead inspectors were engaged on special work, inspecting each quarter-section for which entry had been granted previous to September 1, 1905, and not patented. This inspection has failed to disclose 'blanketing' of homesteads. So far 260 entries have been summarily cancelled. Against 50 per cent of these entries, ordinary cancellation proceedings had already been instituted.

A special inspection of the Doukhobor colonies and enumeration of these settlers were also inaugurated during the winter months, the findings of which are now subjects of action. These special inspections seriously impeded the ordinary business of the office, involving a vast amount of clerical work and necessitating the full staff working after office hours during the winter and spring months.

A sale of school lands by public auction was held last November at Yorkton and Saltcoats, and farmers generally availed themselves of this opportunity to acquire more land.

The past year has witnessed the complete evolution of the district from stock raising to grain growing. The country for miles around Yorkton is occupied by farmers who counted crop acres by hundreds. One million and a half bushels of grain were exported last year from Yorkton alone. Threshermen show thirty, thirty-five and thirty-seven bushels of wheat per acre to be common. Prices were good, and thus throughout the district, farmers are accumulating bank credits. The coming of strong healthy young men from Great Britain has kept in the background to some extent the under supply of farm labour. More of these men are wanted, otherwise, seedtime and harvest must inevitably become a serious problem to the large farmer.

Nearly one thousand applications for patent were recommended, and of these a large percentage was made by Galicians, who in most instances, had brought considerable more land under cultivation and done other improvements than is required by law, which demonstrates that these people must be recognized as a potent factor in the agricultural progress and prosperity of western Canada.

The prospects for the present year are unrivalled. Unless untoward events happen, such as hail or prolonged rain storms during harvest, a fair estimate of the grain sent from this district may be set at five million bushels.

The following is a summary of the work transacted:—

Homestead entries	4,161
Sales	115
Scrip located (acres)	1,920
Timber permits	569
Hay permits (Dominion lands)	30

Hay permits (school lands)	84
Letters received	46,340
Letters written	29,157
Applications for patent	975
Entries cancelled	1,794
Revenue	$61,652.47

Your obedient servant,

JAS. E. PEAKER,
Agent of Dominion Lands.

No. 18.

REPORT ON TIMBER, MINERAL, GRAZING AND IRRIGATION.

DEPARTMENT OF THE INTERIOR,
OTTAWA, August 31, 1906.

The Deputy Minister of the Interior,
Ottawa, Ont.

SIR,—I have the honour to submit the twenty-sixth annual report of the Timber and Mines Branch of the Department of the Interior.

The revenue derived from timber, grazing, hay, irrigation and minerals on Dominion lands for the fiscal year which ended June 30 last, amounted to $649,802.35.

Statement lettered 'A,' showing how this amount was made up, will be found at the end of this report.

The total revenue received from July 1, 1872, to July 1, 1906, was $10,785,785.93.

Reports received from the Crown timber agents at Winnipeg, Edmonton, Calgary, Prince Albert and New Westminster, showing the revenues collected on Dominion lands within their respective agencies and other information are appended hereto. The report of the Commissioner of Irrigation is also appended.

The total revenue of the Winnipeg agency for the fiscal year 1905-6 was $111,905.87.

The price of lumber within the Winnipeg agency was from $10 to $19.75 per thousand feet B.M. There are 39 mills in operation within the agency cutting timber under government license.

The revenue received from the British Columbia agency during the fiscal year 1905-6 was $82,482.97.

Lumber sold at the average price of $10 to $14.95 per thousand feet B.M.

There are 24 mills within the agency operating under license from the Dominion government.

The total amount of dues collected within the Calgary agency during the year 1905-6 amounted to $20,272.17.

The price of lumber at Calgary was $16 to $21 per thousand feet B.M.

Fifteen saw-mills were operating within the agency last year under government license.

The total amount of dues collected within the Edmonton agency during the fiscal year amounted to $19,388.57.

The average price of lumber during the year was $15 per thousand feet B.M.

There are twelve saw-mills in operation within this agency.

The total amount of dues collected within the Prince Albert agency during the year amounted to $28,477.31.

Lumber sold at Prince Albert at the average price of $17.80 per thousand feet B.M.

There are seven saw-mills in this agency cutting timber under license.

The total amount of dues collected within the Yukon Territory on account of timber dues during the fiscal year was $20,637.69.

There are ten saw-mills in this agency cutting timber under license.

Saw-mill returns received at this department give the following quantities of building materials as having been manufactured and sold during the year within the above-mentioned agencies:—

	Manufactured. Ft. B.M.	Sold. Ft. B.M.
Sawn lumber	123,523,205	121,781,792
Shingles	579,604	443,104
Laths	8,667,067	6,675,350

The quantity of lumber manufactured and sold within each agency will be found in the agents' reports appended hereto.

Seven hundred and seventy-one licenses were prepared. The areas in the provinces of Manitoba, Saskatchewan and Alberta, in the Northwest Territory, on Dominion lands in the province of British Columbia, and in the Yukon Territory in force on July 1, 1906, are as follows:—

	Square Miles.
Manitoba	1,151·36
Alberta	2,505·23
Saskatchewan	2,209·23
Northwest Territory	246·80
British Columbia	1,929·22
Yukon Territory	275·11

The number of applications received during the year to cut timber was 263; the number of berths granted was 93.

Within the past year 18 berths were cancelled or relinquished by the owners thereof.

The number of berths under license or authorized to be licensed in the provinces of Manitoba, Saskatchewan, Alberta and the Northwest Territory is 320, and on Dominion lands in the province of British Columbia 345. In the Yukon Territory 117 berths have been granted, covering a total area of 275·11 square miles.

The number of berths covered by permits on July 1, 1906, was 118.

MINING LANDS OTHER THAN COAL.

During the fiscal year 29 entries for quartz claims were granted by the agents of Dominion lands in Manitoba and the Northwest Territories.

In the Yukon Territory 34,760 placer claims, 6,009 quartz claims, 49,442 renewals and re-locations were recorded up to July 1, 1906. The returns for the fiscal year ending June 30, 1906, show that 787 entries for placer claims, 496 entries for quartz claims, 5,455 renewals and re-locations were recorded. The revenue collected from this source and from fees for registering other documents in connection with mining operations was $86,842.75.

Up to July 1, 1906, 93,657 free miners' certificates have been issued, producing a revenue of $933,436.01. During the fiscal year 4,569 free miners' certificates were issued, and the revenue derived therefrom was $28,118.02.

The following is a list of the government agencies whereat free miners' certificates were issued during the year, and the number issued at each within the year:—

Dominion lands agency at—	
Calgary, Alta.	22
Edmonton, Alta.	38
Lethbridge, Alta.	54
Winnipeg, Man.	81
Regina, Sask.	1
Agencies within the Yukon Territory—	
Clear Creek.	24
Dawson.	3,492
Duncan.	121
Kluahne.	97
Whitehorse.	531
Walsh Creek.	28
Other agencies and agents—	
Ottawa, Ont., Department of the Interior.	49
London, Eng., the High Commissioner's office.	10
Vancouver, B.C., the Dominion assay office.	10
Victoria, B.C., the Collector of Customs.	11
Total.	4,569

The total revenue received for dredging leases in the Yukon Territory up to July, 1906, was $149,564.60, and for the fiscal year, $881.70.

The total revenue received for the rent of the leaseholds in the Northwest Territory up to July 1, 1906, was $34,658.61, and for the past fiscal year $942.92.

The total sum collected up to July 1, 1906, for royalty on the gross output of placer mining claims in the Yukon Territory, after deducting the exemption allowed by the regulations, was $3,470,013.11. Of this amount the sum of $163,963.25 was collected during the last fiscal year.

The royalty was collected at the following places:—

Dawson.	$161,359 56
Whitehorse.	2,595 06
Fortymile.	8 63
Total.	$163,963 25

DREDGING.

Fifty-two leases to dredge for minerals other than coal in the submerged beds of rivers in the Yukon Territory are in force, covering a total mileage of 251 miles.

Sixty-four leases to dredge for minerals in the beds of rivers in the provinces of Alberta and Saskatchewan are in force, covering a total mileage of 342·75 miles.

HYDRAULIC MINING.

Sixteen leases are in force. The total frontage of the leaseholds is 41·90 miles. The leaseholds are all situated in the Yukon Territory, within a radius of 100 miles of Dawson.

COAL MINING LANDS.

The number of applications received during the year was 1,051. The revenue for the year derived from the sale of coal mining lands was $125,754.12. The area sold was 46,259 acres. The total area of coal lands sold up to July 1, 1906, was 148,440·43 acres, and the total amount received therefor was $544,567.57.

Twenty-five coal mining licenses, embracing an area of 9,076 acres in the Rocky Mountains Park of Canada, have been issued.

The revenue derived therefrom during the year ending on July 1, 1906, is as follows, viz.: $4,361.30, made up as follows: Rental, $1,488; royalty collected on coal mined thereunder, $2,873.

Total amount of rental collected to July 1, 1906, $5,882.97.

Total amount of royalty collected to July 1, 1906, $5,278.50.

GRAZING LANDS.

The total number of leases in force is 748, including a total area of 2,773,453·99 acres, distributed as follows:—

	Acres.
Province of Manitoba	11,950·00
Province of Saskatchewan	784,986·29
Province of Alberta	1,551,372·50
Railway Belt, B.C.	425,145·20

IRRIGATION.

During the year 55 applications for authority to divert water for irrigation and other purposes were received, and 44 authorizations to construct works in accordance with the provisions of the Northwest Irrigation Act were issued. One hundred and ninety-five licenses have been issued up to date to divert water.

The following is a statement of the office work performed from July 1, 1905, to June 30, 1906:—

Letters received and recorded	28,708
Letters sent	28,107
Pages of memoranda and schedule	12,802
Plans and sketches prepared	661
Timber—	
Berths applied for	263
Berths granted	93
Berths cancelled	18
Licenses for timber berths prepared in duplicate	771
Instructions issued for survey of timber berths	66
Returns of surveys of timber berths examined	32
Returns of saw-mills received and verified	1,489
Permits to cut timber issued by agents, also entered and checked	9,620
Accounts kept posted	855
Timber seizures entered and checked	393
Grazing—	
Applications for grazing lands received	1,048
Leases of grazing lands issued	87
Number of leases cancelled and relinquished	103
Applications for hay lands	22
Accounts kept posted—grazing	751
Accounts kept posted—hay	6
Hay permit forms used by the Dominion lands agents, also entered and checked over at this office	797
Mining—	
Accounts kept posted—dredging, 180, and hydraulic, 27	207
Applications for coal locations received	1,051
Applications for mining locations other than coal	50
New entries and renewals for mining locations granted in Manitoba and Northwest	29

New entries and renewals for mining locations granted in Yukon Territory	6,738
Applications for petroleum	88
Water-power	19
Applications for reservoir sites	1
Applications for gold dredging	78
Irrigation—	
Applications *re* irrigation recorded	55
Memorials examined	76
Plans examined	131
Authorizations for construction of ditches issued	44
Assignments of irrigation applications examined and recorded	4
Certificates issued by inspector, examined and recorded	29
Cancellation of irrigation applications issued and recorded	9
Irrigation licenses issued (in triplicate)	21
Miscellaneous—	
Applications to purchase or lease land in the Yukon Territory received and dealt with during the course of the year	37
Applications for water frontage	6
Leases for agricultural lands cancelled	1
Leases for water frontage issued	1

Your obedient servant,

R. H. CAMPBELL,
Chief Clerk.

No. 19.

REPORT OF THE INSPECTOR OF CROWN TIMBER AGENCIES.

DEPARTMENT OF THE INTERIOR,
DOMINION LANDS AND CROWN TIMBER OFFICE,
WINNIPEG, September 12, 1906.

W. W. CORY, Esq.,
Deputy Minister of the Interior,
Ottawa.

SIR,—I beg to submit my annual report in connection with my work as inspector of Crown timber agencies for the departmental year ended June 30, 1906.

Along the line of my duties I gave direction to the agents and forest rangers in the conduct of their work.

I visited during the year a number of the Crown timber offices, and made a thorough inspection of the books and accounts and the method of dealing with the business, a report upon which was forwarded to you in each instance at the time.

I spent the month of November and part of October and December making inspection of the operations of millmen in the New Westminster district. Assisted by the agent, Mr. Leamy, the books and accounts of a large number of operators were examined. My findings were given to you in an exhaustive report forwarded from Winnipeg.

From my inspection reports and those which I have had occasion to make during the year, dealing with administration, it was shown there was much need in some quarters for improvement. The action that should be taken in this regard, according to my views, has been given to you, and while deemed unnecessary to reiterate them, I would like to point out that as conditions at present exist at many of the offices the agents have not the necessary time at their disposal for exercising proper supervision over the work in the office or of the forest rangers in the field.

I am kept in close touch with the work of these offices by my inspections, and through the checking of the agents' weekly returns prepared for the department, which pass through my hands in transit.

The saw-mill returns also pass through my hands, and receive careful checking. Where errors are discovered, the agent and the department are advised, and it is seen that the necessary corrections are made.

The disbursement accounts of the forest rangers also pass through my hands for the purpose of being checked, payment thereof being made on my approval. The correspondence arising over the checking of these returns and accounts and the answering of letters of general inquiry from the agents is large, and calls in a large measure for my personal attention.

The demands for timber upon the lands of the Crown, and the value thereof are steadily increasing, as is evidenced by the large number of timber berths awarded during the year, and the bonuses paid. Permits to cut timber upon Dominion lands for individual use for buildings, fencing and fuel were granted to upwards of ten thousand settlers, and those for hay to upwards of two thousand.

LUMBERING INDUSTRY.

In my annual report as agent upon the work of the Crown timber office at Winnipeg, on another page, I give a statement which purports to show the amount of timber sold within the Winnipeg district during the year, and also for comparison the sales

for the previous year. As indicated by these figures, the demand for lumber has increased enormously during this year, which increase it is expected will continue to grow with succeeding years at greater ratio.

The following statistics giving the number of saw-mills, stationary and portable, and the amount of lumber manufactured at same during the year in the provinces of Saskatchewan and Alberta, were prepared by the agents at Calgary, Edmonton and Prince Albert:—

		Lumber Manufactured. Ft. B.M.
Calgary district—		
Number stationary mills	15	18,670,956
" portable mills	10	2,163,154
Edmonton district—		
Number stationary mills	7	12,981,834
" portable mills	45	11,000,000
Prince Albert—		
Number stationary mills	6	19,282,345
" portable mills	10	1,225,000
Total	93	65,323,289
Winnipeg district, including Manitoba and Eastern Saskatchewan—		
Number stationary mills	39	50,755,905
" portable mills	48	18,000,000
Total	180	134,079,194

This lumber was practically all disposed of as manufactured, the demand in all parts of the country being very active. In addition to quantities given above there was imported and sold, approximately: 179,000,000 ft. B.M. from province of Ontario; 360,000,000 ft. B.M. from province of British Columbia; 24,000,000 ft. B.M. from United States, bringing the total sales of lumber during the year in the provinces of Manitoba, Saskatchewan and Alberta to almost 700,000,000 feet.

Your obedient servant,

E. F. STEPHENSON,
Inspector of Crown Timber Agencies.

DOMINION LANDS AND CROWN TIMBER OFFICE,
NEW WESTMINSTER, B.C., October 8, 1906.

The Commissioner of Dominion Lands,
Ottawa, Ont.

SIR,—I have the honour to submit herewith my annual report for the twelve months ending June 30, 1906.

The receipts of this office for the fiscal year ending June 30, 1906, amounted to $33,627.27, which together with $48,855.70 collected at head office on account of this agency, make a total of $82,482.97.

I also inclose schedule of mills situated in the Dominion Railway Belt in the province of British Columbia, which gives the usual statistics respecting the timber trade.

I am pleased to be able to say that the lumber business in this province has increased very materially since my last annual report.

While the volume of business in Dominion timber is not much greater than that of last year, considerable more business has been done in timber cut on provincial lands than usual.

This is largely owing to the fact that the lumbermen find it more advantageous to hold, instead of working their Dominion leases, as they consider that greater security is afforded them under the Dominion regulations, instancing the question of fire-guarding; for this and other reasons they prefer holding their Dominion leases in abeyance.

I may say that we have been very successful in coping with forest fires during the past season, there not having been $5,000 worth of merchantable timber destroyed by fire within the Dominion Railway Belt.

The season was an extremely hot and dry one, little, if any, rain having fallen during the months of July and August.

All of which is respectfully submitted.

I have the honour to be, sir,
Your obedient servant,

JAMES LEAMY,
Crown Timber Agent.

No. 21.

REPORT OF THE CROWN TIMBER AGENT AT EDMONTON.

DEPARTMENT OF THE INTERIOR,
DOMINION LANDS OFFICE,
EDMONTON, July 7, 1906.

The Commissioner of Dominion Lands,
Ottawa, Ont.

SIR,—I have the honour to inclose herewith schedules 'A' and 'B' relative to the work of the timber and mines branch of this agency for the year ending June 30, 1906.

The total amount cut in B.M. by berth owners was 9,819,262 feet B.M., and for the settlers by portable mills the estimated cut in round figures was 10,000,000 feet B.M.

The returns of John Walter, the largest operator of berths, for the three months ending June 30 have not yet been received.

The average price per thousand feet B.M. was $15.

I have the honour to be, sir,
Your obedient servant,

A. G. HARRISON,
Crown Timber Agent.

SCHEDULE A.

STATEMENT of Receipts from Timber, Grazing and Hay Lands at the Crown Timber Office, Edmonton, Sask., for the 12 months ending June 30, 1906.

A. G. HARRISON,
Crown Timber Agent.

No. 22.

REPORT OF THE CROWN TIMBER AGENT AT CALGARY.

DEPARTMENT OF THE INTERIOR,
DOMINION LANDS AND CROWN TIMBER OFFICE,
CALGARY, July 31, 1906.

The Commissioner of Dominion Lands,
Ottawa, Ont.

SIR,—I have the honour to inclose herewith the following statements for the twelve months ending June 30, 1906.

Schedule 'A,' statement of receipts on account of Crown timber, covering the period referred to, amounting to $20,272.17.

Schedule 'B,' showing the saw-mills within the Crown timber agency in operation under government license to June 30, 1906.

Schedule 'C,' general office work.

You will observe that the quantity manufactured from licensed berths during the year amounts to 19,397,856 ft. B.M., quantity sold, 17,960,248 ft. B.M., manufactured by portable mills under permits, approximately, 2,052,198 ft. B.M., and from lands other than Crown lands, 440,000 ft. B.M., making a total of 21,890,054 ft. manufactured and 17,960,248 ft. sold.

Hereto annexed please find Chief Forest Ranger Margach's report. Lumber is considerably higher than it was last year, and manufacturers find difficulty in supplying the demand.

I have the honour to be, sir,
Your obedient servant,

J. R. SUTHERLAND,
Crown Timber Agent.

No. 22A.

REPORT OF CHIEF FOREST RANGER MARGACH.

(Appended to report of Calgary Crown Timber Agent.)

CALGARY, ALTA., July 30, 1906.

The Agent of Dominion Lands,
Calgary, Alta.

SIR,—In reference to lumber cut at portable mills during the year ending June 30, 1906, I beg to say that the total amount cut by such mills was 2,492,198 ft. B.M., 2,052,198 ft. B.M. was cut under authority of permits issued for use on the lands of the permittee, and 440,000 was taken from lands other than Crown lands, making the total of 2,492,148 ft. B.M. The present prices of lumber will average from $3 to $4 per M. more at the local yards than a year ago, it is also very difficult for yardmen to get their orders filled by the British Columbia millmen, owing to the demand of taking the material from the saw, hence the mill stocks are very light.

There have been very bad fires on and in the vicinity of timber berths No. 252 and 253 during the months of April and May of this year, and I do not think that there is any doubt but what those fires are caused from people who are clearing land, and squatters as well as those who have homestead entries, and I think that it is impossible to work with fire in clearing lands where it is grass and spruce. One man can start such fires, while a ranger with an army of men cannot stop it in timber that has such a growth of grass in and about the timber, as in this country the spruce cones will ignite the grass half a mile away, making fire-breaking an impossibility.

In my opinion settlers should not be allowed to go on to lands that have a timber value, or in the vicinity of timber that has a merchantable value. In the above-mentioned fire I believe at least 100,000,000 ft. were destroyed.

There have been no new coal mines opened in this district, although large investments have been made for the purpose of procuring a supply of building material at the stone quarries, brick yards and in the two plants for the manufacturing of Portland cement at Kananaskis, and Calgary, both of which plants are modern.

Your obedient servant,

J. W. MARGACH,
Chief Forest Ranger.

J. R. SUTHERLAND,
Crown Timber Agent.

No. 23.

REPORT OF THE CROWN TIMBER AGENT AT PRINCE ALBERT.

DOMINION LANDS OFFICE,
PRINCE ALBERT, July 6, 1906.

The Commissioner of Dominion Lands,
Ottawa, Ont.

SIR,—I have the honour to inclose herewith my report for the year ending June 30, 1906.

Schedule 'A,' statement of receipts on account of Crown timber, grazing, mining and hay.

Schedule 'B,' statement showing saw-mills operating under government license.

Schedule 'C,' statement showing general work during the year.

The increase in the revenue received at this office over the previous year is $1,526.50.

Owing to the fact that the Saskatchewan Lumber Company's mill at Crooked river and the large mill of the Telford Lumber Company at this point were both destroyed by fire last summer, the output of lumber was not as large as it otherwise would have been. The former company have now a first-class mill in operation at Crooked river, and the Prince Albert Lumber Company have taken over the business of the Telford Lumber Company at this point and their new mill is the largest and most complete mill between Rat Portage and British Columbia, with a daily output, with one double cutting band saw and one gate, of 100,000 feet, which will be increased to 160,000 feet in the course of a few days, as they are adding another band saw.

The five large saw-mills operating under government license in this district have all increased their capacity and the cut this coming season will be more than double that of last. There are also thirteen portable mills scattered throughout the district and an approximate estimate of the cut is 2,000,000 feet.

The average selling price of lumber for the year is $17.80 per thousand feet.

The demand for lumber from the prairie districts to the west of us is largely in excess of the supply and as there are over 850 square miles of good spruce timber under

license tributary to this point and a very considerable extent along the Prince Albert branch of the Canadian Northern Railway, the future of the lumber industry looks bright.

Your obedient servant,

R. S. COOK,
Crown Timber Agent.

SCHEDULE A.

STATEMENT of Receipts from Timber, Grazing and Hay Lands at the Crown Timber Office, Prince Albert, Sask., for the 12 months ending June 30, 1906.

No. 24.

CANADIAN IRRIGATION SURVEYS.

Report of John Stewart, D.L.S., C.E., Commissioner and Chief Engineer of Irrigation.

Department of the Interior,
Irrigation Office,
Calgary, Alta., July 8, 1906.

The Commissioner of Dominion Lands,
Ottawa, Ont.

Sir,—During the year 1905-6 the contour surveys in connection with this branch were continued by a survey party in charge of Mr. J. F. Hamilton, C.E., in townships 21 and 22, in ranges 24, 25 and 26 west of the fourth meridian, contouring that township, and worked east to the east boundary of range 21 in same township, returning worked west in township 18, to east boundary of range 24, and this work was afterwards carried on in township 17, ranges 28 to 21, inclusive, special attention being given to all topographical features in any way affecting the different watersheds of the country, and all streams, watercourses and ridges of any extent, all heights of land located and elevations of same obtained wherever possible. The surveys showed the country north of Bow river to be a clay loam, free from stones, and that the general slope of the townships was toward the southeast, draining into Bow river. After moving south of that river a traverse was made of the height of land through township 19, range 23, west of the fourth meridian, commencing at the quarter-section south of section 6, along the highest ridge of Buffalo hill into section 35; and it was found that the west and north portion of the township drained into the Little Arrowwood creek and Bow river, and the south and east portion drained into the Snake Creek valley. This township 19, range 23 west of the fourth meridian is very rough, and quite unsuited to grain growing, the soil is light clay loam and sandy loam, with gravel and stones in the ridges and hills; there are numerous fresh water sloughs in the northeastern part of the township, but the southern and western portions are dry. The soil in township 19, ranges 21 to 22 west of fourth meridian drains eastward into Rattlesnake lake,

whilst township 19, range 21 drains, generally, into the same lake, with a considerable quantity of alkali in the soil around the lake.

A sub-party, in charge of Mr. Ralph J. Burley, was organized in Calgary, and commenced work in township 21, range 26, west of the fourth meridian running levels, and continued same in township 21, range 26, west of the fourth meridian, but as there was no water in this township, camp was moved down to township 20, range 25, west of the fourth meridian, and both townships worked from there. Levels were also run over township 20, ranges 26, 27 and 28; township 19, ranges 28, 27, 26, 25 and 24; and township 18, range 24, township 21, ranges 28, 27, 26, 25, and township 22, range 25, all west of fourth meridian, and a record obtained of all leading topographical features.

Towards the middle of November, 1905, a very heavy snowstorm prevented further field work, and both parties were, therefore, called into headquarters.

Owing to the old Northwest Territories being absorbed in the new provinces of Saskatchewan and Alberta, the minister decided to remove the irrigation office from Regina to Calgary, and continue the work of the office under the temporary supervision of John Stocks, C.E., who had formerly had charge, under the arrangements made in 1896, between the Department of the Interior and the government of the Northwest Territories. This removal interrupted to some extent the work of the office, entailing a large amount of extra work on the staff in preparing the records for shipment to Calgary, and arranging for the satisfactory conduct of the business after arrival at that city.

In January, 1906, by direction of the minister a special party was organized under the charge of Mr. J. F. Hamilton, C.E., to make an examination of the Bow river, at Kananaskis Falls, to obtain data as to the flow of the river, the depth of fall, and such other information as would be necessary to demonstrate the value of these falls for power purposes. A very thorough contour survey was made of the country in that vicinity, and numerous gaugings made of the Bow river, the Kananaskis river, and Old Bow Fort creek, and a full report was made thereon and submitted to the department on March 12, last.

The work of the irrigation office was carried on under Mr. Stocks' supervision up to the end of April, 1906, when I assumed charge on appointment as Commissioner and Chief Engineer of Irrigation.

In the spring of this year (1906) I arranged to discontinue the contour surveys, and have one party devote its whole time to gauging rivers and large streams to determine the flow of water therein, and also to obtain information for the hydrographic branch of these surveys; and two other parties were organized to gauge the smaller creeks and also to inspect and report upon the various irrigation schemes which had been authorized but not completed, with a view to having the intending irrigators continue their schemes to completion, or to cancel same if it is found the schemes are not feasible.

During the past year the Alberta Railway and Irrigation Company's canal for the diversion of water from St. Mary's river has been considerably enlarged and extended, and the company have now in operation 150 miles of main and lateral canals. This undertaking has been the means of large numbers of persons settling within the tract of land served by this system, and quite a number of small towns and villages have come into existence in the southwestern portion of the province of Alberta.

The Canadian Pacific Railway Company's canal to divert water from Bow river, near Calgary, has been partly constructed, and a considerable amount of work done in connection therewith, and about the middle of May, 1906, water was turned on into the canal for a distance of 46 miles. I made an inspection of the head works and first portion of the canal prior to the water being turned in, and found them to be of a very complete and substantial nature. The company has not, as yet, entered into any agreements for the sale of water, but it is expected that this will be done in the near future.

As regards the inside work of the irrigation office, I find its volume is much greater

than I anticipated, and during the past year some 6,200 communications have been dealt with, as well as 90 applications for water rights (in duplicate); 350 agreements for supply and use of water, granting of right of way, &c. (in quadruplicate), also some 250 records in connection with gauge rods established on several rivers and creeks throughout the provinces of Saskatchewan and Alberta.

Your obedient servant,

JOHN STEWART,
Commissioner of Irrigation.

No. 25.

REPORT OF THE ORDNANCE AND ADMIRALTY LANDS BRANCH.

DEPARTMENT OF THE INTERIOR,
ORDNANCE AND ADMIRALTY LANDS BRANCH,
OTTAWA, August 15, 1906.

W. W. CORY, Esq.,
Deputy Minister, Department of the Interior.

SIR,—I have the honour to submit the following report on the work of this branch of the department for the fiscal year ending June 30, 1906.

In this connection permit me to remark that in accordance with your instructions, I assumed charge of this branch on June 22, last, almost at the close of the fiscal year, in addition to the work with which I was previously entrusted, namely: copying and comparing, printing, indexing and arranging in book form, the orders in council passed from time to time relating to this department.

The annexed statements are somewhat similar to those which accompanied previous reports of the yearly transactions of this branch, and comprise statements 'A,' 'B,' 'C' and 'D,' respectively, and in connection with statement 'B,' I may draw your attention to the fact that there is a substantial increase in the revenue for the year.

A.—Statement showing the amount received since the date of the last annual report, on account of the sale of land and the redemption of lots in the several localities where ordnance lands are situated, totalling $4,221.38.

(1) Chambly.—In the autumn of 1905 preliminary arrangements were made to offer for sale at public competition all the lots remaining at the disposal of the department in this locality, but prior to the date fixed for the sale it was decided, upon representations made by the residents of this locality, to withdraw from sale that portion of the reserve known as 'the Common,' embracing twenty lots. The remaining thirteen lots were put up at auction and sold to the highest bidder. The amount realized from this sale was $2,500, of which $532.50 was paid at the time of the sale, being the first instalment of the purchase money. Four of the lots sold have been since the date of sale, paid for in full and letters patent issued. The sale of lot No. 8 has since been cancelled, and the amount received on account refunded.

(2) Grand Falls.—The lots comprised within this reserve are gradually passing from government into private ownership. During the past year fifteen lots have been redeemed and letters patent issued; the amount for which these lots were sold being $696.20, and the balance of the purchase money received during the year $158.65.

(3) Nepean.—Nine lots forming part of the subdivision of the ordnance reserve in lot K, concession C, of this township which had been previously sold were fully redeemed and patents issued; the amount of consideration money being $743, of which $594.40 was paid during the past year.

(4) Rideau Navigation.—Two small islands situated in the line of the Rideau navigation between the townships of Pittsburg and Storrington, containing an area of about two and one-half acres, and which formed the subject of 'paragraph 7' of the report of this branch for 1904-5, were not sold for the sum of $20, as therein stated; it having been decided before the above offer was finally accepted, that tenders should be publicly advertised for. An offer of $135 having been received, the islands in question were disposed of in October last, for that sum.

(5) Ottawa.—A triangular piece of ordnance property situated between the west side of Nicholas street and the canal reserve, and being composed of part of lot D, concession D, Rideau front, township of Nepean (now within the limits of the city of Ottawa), was offered for sale, public competition being invited. The land in question was sold to the highest tenderer for $1,400 cash.

In accordance with the provisions contained in the original leases granted by the Imperial authorities to tenants of ordnance lots in this locality, three lots and three half lots were redeemed and letters patent issued therefor, the total amount received for these lots being $996.33.

(6) Quebec.—Two part lots fronting on First street, containing together an area of 4,950 square feet, and forming part of the subdivision of the tract of land known as the 'Cove Field' were paid for in full and letters patent were issued therefor. The amount received for these two pieces of property was $330, of which $132 was paid during the fiscal year.

B.—Statement showing the several localities where ordnance lands are situated, on account of which moneys have been received. The total net revenue derived from these lands since the date of the last report, amounts to $10,840.67, an increase of $532.01 over last year.

C.—Statement showing the amount received each month of the fiscal year and classified as fees, rents or interest, and principal.

D.—Statement showing the amounts due and unpaid at the end of the fiscal year, in the several localities where ordnance lands are situated, classified as principal money and rent or interest. The total amount shown to be due and remaining unpaid is $61,014.35.

During the year twenty draft letters patent were prepared and thirteen assignments registered. In other respects the work of the branch was about the same as that of the preceding year.

Respectfully sumbitted,

JOS. P. DUNNE,

Clerk in Charge of Ordnance and Admiralty Lands Branch.

SESSIONAL PAPER No. 25

STAMEMENT showing amount received on account of sales made and lots redeemed during the year ending June 30, 1906 (including sales made in previous years on which balance was paid during the last fiscal year).

JOS. P. DUNNE,
Clerk in Charge.

DEPARTMENT OF THE INTERIOR,
ORDNANCE AND ADMIRALTY LANDS BRANCH,
OTTAWA, August 15, 1906.

No. 26.

REPORT OF THE ACCOUNTANT.

DEPARTMENT OF THE INTERIOR,
ACCOUNTS BRANCH,
OTTAWA, September 17, 1906.

W. W. CORY, Esq.,
Deputy Minister of the Interior,
Ottawa.

SIR,—I have the honour to submit statements of revenue collected from various sources during the fiscal year 1905-6, as follows:—

A. Dominion lands, including Yukon Territory	$1,709,315 28
B. Ordnance lands	10,893 17
C. School lands	608,960 79
D. Registration fees	180,310 73
E. Fines and forfeitures, N.W.T.	3,304 77
F. Casual revenue	8,496 09
G. Seed grain repayments	12,577 29
	$2,533,858 12

A statement of the revenue on account of Dominion lands (marked 'H') shows the receipts monthly, classified under sub-heads.

Statement (marked 'I') shows a comparison between the receipts on account of Dominion lands for 1905-6, as compared with the revenue of the previous fiscal year.

Your obedient servant,

CHAS. H. BEDDOE,
Accountant.

A.—DOMINION Lands Revenue (Cash and Scrip) for the fiscal year ended June 30, 1906.

CHAS. H. BEDDOE,
Accountant.

Department of the Interior,
Accounts Branch,
Ottawa, September 17, 1906.

No. 27.

REPORT OF THE REGISTRAR.

Department of the Interior,
Correspondence Registration Branch,
Ottawa, August 31, 1906.

W. W. Cory, Esq.,
Deputy Minister of the Interior.

Sir,—I have the honour to place before you a statement showing in part the work done by this branch during the fiscal year 1905-6.

From the nature of the work it is impossible to give, in tabulated form, a report which would show adequately the duties involved in properly recording the many letters received.

Since January of this year it has been found necessary to add another indexer, and at the present rate of increase a fifth will be needed before the year is closed.

The quantity of mail matter received shows an increase of more than 41 per cent over the preceding year, and with such rapid growth it was impossible to get the correspondence through as expeditiously as it should have been.

The sum of $875,933.54, in cash or its equivalent, was received, recorded and sent to the accountant; 110,085 pages of letter book were indexed and 2,735 pages of documents compared.

Your obedient servant,

J. M. ROBERTS,
Clerk in Charge.

STATEMENT showing the number of Letters Received and Recorded in the Correspondence Registration Branch during the fiscal year 1905–1906.

—	Letters Received.	Letters Sent.	Registered Letters.		Telegrams	Total for 1905–1906.
			Received.	Sent.		
1905.						
July	12,636	15,308	467	2,314	72	30,797
August	12,717	16,366	484	2,468	90	32,125
September	12,105	16,150	462	2,168	96	30,981
October	12,646	15,471	489	2,597	82	31,285
November	13,532	16,004	528	2,879	110	33,053
December	14,020	15,247	639	2,366	63	32,335
Total	77,656	94,546	3,069	14,792	513	190,576
1906.						
January	14,710	18,506	618	2,736	82	36,652

Aggregate for the year 1904–1905	135,908	179,772	6,014	24,436	634	346,764
Net increase	40,821	37,836	979	8,011	368	88,015

J. M. ROBERTS,
Clerk in Charge.

INTERIOR DEPARTMENT,
CORRESPONDENCE REGISTRATION BRANCH,
OTTAWA, August 31, 1906.

No. 28.

REPORT OF THE GEOGRAPHER.

DEPARTMENT OF THE INTERIOR,
GEOGRAPHER,
OTTAWA, June 30, 1906.

W. W. CORY, Esq.,
Deputy Minister of the Interior,
Ottawa.

SIR,—I have the honour to report as follows on the work of my office for the past year.

The staff at present is as follows:—

J. E. Chalifour, chief draughtsman.
H. E. Baine, draughtsman.
A. Akerlindh, draughtsman.

M. W. Sharon, draughtsman.
W. Anderson, draughtsman.
H. M. Blatchly, draughtsman.
G. E. Dumouchel, draughtsman.
Jas. K. Bennie, draughtsman.
R. W. Craig, draughtsman.
C. G. Wood, draughtsman.
M. Darrach, draughtsman.
H. W. Wilson, draughtsman.
A. Groulx, draughtsman.
J. P. McElligott, draughtsman.
S. Chandler, draughtsman.
J. S. Gagnon, clerk.
S. B. R. Roach, messenger.
Mrs. D. E. Waine, stenographer.

Mr. W. Anderson was appointed December 5, for special work, contouring, hachuring, &c.

Mr. A. Akerlindh was transferred from the Immigration Branch, January 28, and has taken charge of the registration, &c., of all plans and maps.

Mr. A. Groulx was transferred from the Surveyor General's office, November 1.

Mr. S. B. R. Roach was appointed as messenger, May 18.

For some time past the work of my office has been seriously hampered by lack of room. On April 1, we moved to new and commodious quarters in the fourth floor of the Woods building, Slater street. The new offices are airy, well lighted and in every way superior to those that we vacated.

The large 'Mineral' map—25 feet by 15—for the Exhibition Branch of the Department of Agriculture, was commenced June, 1905, and completed early in April last. The scale 1·1,000,000 or 16 miles (nearly) to 1 inch, permitted the delineation of the topography, &c., on a scale that will easily be read at a distance of even 25 or 30 feet. The mineral signs were also drawn large enough to be read by a spectator at a considerable distance. After completion it was shipped to London, England, for exhibition in the Imperial Institute.

Owing partly to strikes in the lithographic establishments and partly to the enormous amount of work involved in the compilation of the maps—concurrently with the other work of the office—the Economic Atlas is not yet completed, though the end is in sight, and I hope that it will be ready for distribution next winter.

During the past year 18,648 letters and circulars were sent out, and 16,168 received, also 14,938 maps and books were sent out and 41,673 received.

Below is a list of maps published, and in progress:—

MAPS PUBLISHED.

Dominion of Canada and Newfoundland, eight sheets, each 25 inches by 26 inches; extends from the Atlantic to the Pacific and from Maryland and Oregon on the south, to Cumberland Sound and Herschell island on the north. Scale 35 miles to 1 inch.

Dominion of Canada and Newfoundland, 16 inches by 36 inches. Scale 100 miles to 1 inch.

Dominion of Canada (with map of world on reverse). Scale 58 miles to 1 inch.

Relief map of Canada. Scale 100 miles to 1 inch.

Resource map of Canada. Scale 1·12,500,000 or 197·3 miles to 1 inch.

Water-power map—average rainfall at principal points in Canada. Scale 100 miles to 1 inch.

National Transcontinental Railway map—shows approximate route of the National Transcontinental Railway, Moncton to Pacific. Scale 100 miles to 1 inch.

Explorations in northern Canada and adjacent portions of Greenland and Alaska. Scale 75 miles to 1 inch.

Rocky mountains—Banff sheet—contoured map of mountains in the vicinity of Banff. Scale 2 miles to 1 inch.

Rocky mountains—Lake Louise sheet—contoured map of mountains in the vicinity of Laggan and Field. Scale 2 miles to 1 inch.

Manitoba and Northwest Territories, includes Manitoba, Assiniboia, Saskatchewan, Alberta and southwestern portion of Keewatin; three sheets, each 25 inches by 36 inches. Scale 12½ miles to 1 inch.

Index map showing townships in Manitoba and Northwest Territories, plans of which have been printed. Scale 35 miles to 1 inch.

General map of the northwestern part of the Dominion of Canada. Edition of 1898. In 2 sheets. Scale 35 miles to 1 inch.

Map showing railways in Manitoba, Alberta, Assiniboia and Saskatchewan. Scale 35 miles to 1 inch.

Manitoba. Scale 12½ miles to 1 inch.

Assiniboia. Edition of 1904. Scale 12½ miles to 1 inch.

Saskatchewan. Edition of 1904. Scale 12½ miles to 1 inch.

Alberta. Edition of 1904. Scale 12½ miles to 1 inch.

Regina land district. Scale 12½ miles to 1 inch.

Red Deer land district. Scale 12½ miles to 1 inch.

Calgary land district. Scale 12½ miles to 1 inch.

Winnipeg land district. Scale 12½ miles to 1 inch.

Alameda land district. Scale 12½ miles to 1 inch.

Lethbridge land district. Scale 12½ miles to 1 inch.

Edmonton land district. Scale 12½ miles to 1 inch.

Dauphin land district. Scale 12½ miles to 1 inch.

Yorkton land district. Scale 12½ miles to 1 inch.

Prince Albert land district. Scale 12½ miles to 1 inch.

Battleford land district. Scale 12½ miles to 1 inch.

Brandon land district. Scale 12½ miles to 1 inch.

Minnedosa land district. Scale 12½ miles to 1 inch.

Peace and Athabaska district—Alberta and Athabaska—includes the country between Wetaskiwin and Lake Athabaska and between Athabaska river and the eastern boundary of British Columbia. Scale $\frac{1}{800000}$, or 12·63 miles to 1 inch.

Map showing new provinces of Alberta and Saskatchewan. Scale 100 miles to 1 inch.

Map showing electoral divisions (for provincial legislature) in Alberta and Saskatchewan. Scale 35 miles to 1 inch.

Map showing electoral divisions (for provincial legislature) in Southern Saskatchewan. Scale 12½ miles to 1 inch.

Map showing all the even-numbered sections patented to May 1, 1906, and all even-numbered sections homesteaded and unpatented or finally allotted to railway companies to that date, in Manitoba, Saskatchewan and Alberta; 3 sheets. Scale 12½ miles to 1 inch.
